WILLCOX & GIBBS

SILENT FAMILY

SEWING MACHINE.

Every kind of Family Sewing is done more easily, more quietly, more beautifully, more perfectly, and every way more satisfactorily, by the WILLCOX AND GIBBS SILENT SEWING MACHINE, than by any other Sewing Mechanism yet devised.

MACHINE DETACHED FROM STAND.

This machine is exceedingly simple; and the workmanship, finish, and adjustment of it perfect. It is scarcely ever out of order, and is always ready for use. The parts of which it is composed are so few, and its movements are so easily understood, that everybody can use it, even without instructions—though printed "directions" are always sent with it. Not merely the female head of the household, but the little girl of six years, and the grandmother of 70, the unskilful, the feeble, even the blind—every member of the family who is able to do anything, can operate and manage this machine successfully.

Its needle is straight, and the shortest in use. It is also self-adjusting, and cannot be set wrong; and it is scarcely ever broken, even in careless hands.

Its work is unequalled in beauty, strength, and durability by that of any other machine; or even by the most perfect hand-sewing. There being but one thread, there is no rewinding, and adjusting of shuttles and under-tensions. The stitch is more secure and elastic than any other stitch now made.

Though the Willcox and Gibbs is comparatively a new machine, having been only about ten years in the market, there have been upwards of 200,000 of the machines sold—nearly all of them for use in families; and so far as we know every one of them has given satisfaction.

"The best and cheapest family machine in the world."

Price List and other information forwarded on application.

Page 183.—George Town.—*Add* IRON MINES.—Iron ore having been discovered at Ilfracombe and Anderson's Creek, on the west bank of the Tamar, two companies have been formed to work those localities. The Tasmanian Charcoal Iron Company obtained from the Tasmanian Government five leases of 80 acres each, and began operations on the 16th of September, 1872, when Mr. W. Leonard, the mining manager, took charge. Since then a jetty has been built at West Arm; a tramway has been formed through the bush to the mines, a distance of $4\frac{3}{4}$ miles; buildings have been erected at West Arm and Anderson's Creek; a large quantity of charcoal has been burnt ready for smelting operations; nearly 50,000 bricks are ready for the kiln, and an iron smelting furnace, the corner stone of which was laid by His Excellency the Governor on 6th December, 1872, is being built. Mining operations have also been commenced on the company's land, and many thousands of tons of iron ore laid bare. A new township, "Leonardsburgh," has been reserved and proclaimed by Government on Anderson's Creek, opposite the site of the company's works; and another new township has been surveyed on the private property of the company, at West Arm, where already a commodious hotel and several stores are being built. The Ilfracombe Iron Company purposes working the Ilfracombe Estate, confining their operations to casting iron and steel.

ECLIPSES, 1873.

In the year 1873 there will be two eclipses of the Sun, and two of the Moon.

1. A total eclipse of the Moon, May 12th, visible in Tasmania.

	H.	M.
First contact with the penumbra	6	16·6 p.m.
First contact with the shadow	7	19·9 p.m.

Last contact with the shadow	10	59·3 p.m.
Last contact with the penumbra	12	02·6 p.m.

Magnitude of the eclipse (moon's diameter = 1), 1·428.

The first contact with the shadow occurs at 124° from the northernmost point of the moon's limb towards the east. The last contact at 82° towards the west. In each case for direct image.

2. A partial eclipse of the Sun, May 26th, invisible at Tasmania.

NOTES ON METEOROLOGICAL TABLE.

As the following statement will shew, the results of the thirty years' observations agree very closely with those of the twenty-five years previously published ; the difference in many cases amounting to only a second or third place of decimals. This will tend to prove that the observations have been correctly made and carefully recorded :—

Barometer, mean for 30 years, 29·850, being + .043 in excess of 25 years' mean.
Temperature, ditto, 54·72, being + .27 ditto.
Diurnal range of temperature, ditto, 17·91, being + ·05 ditto.
Solar intensity, mean for 15 years, 93·39, being + ·40 in excess of 10 years' mean.
Terrestrial radiation, ditto, 43·01, being + ·15 ditto.
Dew point, mean position for 30 years, 45·49, being + ·04 in excess of 25 years' mean.
Humidity of air, mean for 30 years, 75 per cent., being the same as for 25 years.
Elastic force of vapour, ditto, ·316, being + ·001 in excess of 25 years' mean.
Rainfall, ditto, 22·71in., being + ·06 ditto.
Number of days on which rain fell, mean for 16 years, 139·88, being — 5·39 below 11 years' mean.
Ozone, mean for 14 years, 7·24, being + ·06 above 9 years' mean.
Prevailing direction of wind, N.W. and S.E., is the same as in the 25 years' tables.
Wind force, mean for 14 years, 58·37 lbs., is — 4·63 lbs. below the 9 years' mean in the 25 years' tables.

During the years 1866, 1867, 1868, 1869, and 1870 the Meteorological Observations were, as previously, under my own charge ; the general management of all the operations connected with the department being carried on by me at the private observatory.

It is clear from the foregoing table that Hobart Town has the most equable climate in the list. This arises from its insular position. Heat absorbed by a fluid increases the rate of its evaporation, and the evaporating process reduces the sensible amount of latent heat which the body has acquired. Every accession of temperature brings with it its own remedy; for at night the process is reversed, radiation takes place more slowly, from which, together with minor causes in connection with that of sea breezes, the temperature at the surface remains comparatively unaltered, and renders our beautiful island the Queen of the South.

GARDENERS' CALENDAR.—*Fruit Garden.*—Where budding is required it may still be performed, choosing, if possible, showery weather. Cut off all surplus shoots from young trees, if they are not required for scions in the Spring. Continue to pinch off all lateral shoots from vines. *Flower Garden.*—Choice carnations may be increased by cuttings and layers with shade and moisture. Choice flowers should be marked for seed. Annuals that have done flowering should be removed, or some will become troublesome weeds. *Kitchen Garden.*—Plant celery in trenches, and a succession of French beans; sow turnips when the weather is moist; take up early potatoes that are ripe; gather all kinds of seeds as they ripen; cut from strawberries all runners that are not wanted for plants, to give strength to the roots. *Greenhouse.*—Calceolarias, cinerarias, etc., may still be sown. Geraniums that have done flowering should be cut down; re-pot as soon as they begin to make fresh shoots. Cuttings struck now will make good plants next year, with care. Continue to shade and water as directed last month.

JANUARY 6.—Called *Twelfth Day*, as being that number after Christmas, and *Epiphany* from a Greek word signifying "appearance." It is a festival of the church in commemoration of the manifestation of Christ to the Gentiles,—more expressly to the three magi or wise men of the East who came, led by a star, to worship him immediately after his birth.

GARDENERS' CALENDAR.—*Fruit Garden.*—Little is required this month besides attending to the buds. Strawberry runners should be kept moist to form robust plants in time for transplanting in the first Autumn rains. *Flower Garden.*—Cut off all flower stalks as soon as done flowering, except those required for seed. The flowering season is prolonged by cutting off surplus seed as soon as formed. Verbenas, pentstemons, petunias, and other herbaceous perennial plants may now be propagated by cuttings. Encourage asters, chrysanthemums, dahlias, etc., by frequent watering. Use the rake to preserve a neat appearance. *Kitchen Garden.*—In showery weather vegetables may be sown to come in during the Winter. Mark out plants of the cabbage tribe to run to seed. Earth up peas and potatoes; hoe and stir the surface among all descriptions of crops. *Greenhouse.*—As the principal displays of this season are over, turn your attention to preparation for the next by propagating by seed and cuttings, and preserving such old plants as are desirable for another year. This is the time for forming plants of the early flowers, too frequently neglected by amateurs until the flowering season. Sow mignonette for Winter flowering.

SEPTUAGESIMA and the next two Sundays are preparatory to the Lenten fast, which begins about forty days before Easter and hence is called Quadragesima. Their names are significant of their situation, thus:—Septuagesima (seventy days), Sexagesima (sixty days), and Quinquagesima (fifty days) before Easter.

GARDENERS' CALENDAR.—*Fruit Garden.*—Prepare borders for forming new beds of strawberries on the first approach of rain. The ground intended to be planted with fruit trees should now be well worked. Collect the leaves as they fall and convert them into manure. *Flower Garden.*—Continue the general directions given for last month, and sow seed of perennial and annual flowers for Spring flowering as they ripen. *Kitchen Garden.*—Sow cabbage, cauliflowers, lettuce, spinach, and onions for early use. Sow turnips, thin out those sown last month. Earth up celery, take up potatoes, and house onions when well dried. *Greenhouse.*—Continue the general directions given for last month.

SHROVETIDE (Feb. 23) derives its title from the practice of being *shriven* or *shrove*—that is, confessing and receiving absolution—before the Lenten fast.

ASH WEDNESDAY (Feb. 26).—So called on account of penitents wearing sackcloth next their skin and sprinkling ashes on their heads.

ST. PATRICK.—The shamrock is said to be worn by the Irish upon the anniversary of this their tutelar saint for the following reason:—When he preached the gospel to the pagan Irish, he illustrated the doctrine of the Trinity by showing them a trefoil, or three-leaved grass, with one stalk; which operating to their conviction, the shamrock, which is a bundle of this grass, was ever afterwards worn upon this saint's anniversary, to commemorate the event.

GARDENERS' CALENDAR.—*Fruit Garden.*—Continue to prepare the ground intended for planting with strawberries and fruit trees; secure the leaves as directed last month. *Flower Garden.*—Plant jonquils, snowdrops, crocuses, ranunculuses, anemones, and other early flowering bulbs; sow seeds of stocks, wall-flowers, sweet-williams, and other biennials, for transplanting in the Spring, if you have not sufficient Spring-sown ones. Verbenas, petunias, pentstemons, etc., may still be propagated by cuttings. Dahlias should be taken up and stored in a dry airy place soon after the frost has killed the stems. Plant deciduous trees. *Kitchen Garden.*—Sow cauliflowers, cabbages, and lettuce; plant out those sown last month; sow spinach and turnips; sow onions for planting out; earth up celery. Carrots may be sown for early use. *Greenhouse.*—Remove all tender plants into the house; encourage the growth of geraniums, calceolarias, cinerarias, etc., by re-potting as soon as the present pots are filled with roots, and keep them free from *aphis* by washing, fumigation, &c. Fuchsias that have done flowering should be kept moderately dry during the dormant state; give plenty of air during fine weather.

GARDENERS' CALENDAR.—*Fruit Garden.*— Planting of vines and fruit trees may be commenced towards the end of the month; in the meantime keep the ground well worked in dry weather, and dig between the old trees as soon as the leaves have fallen. Keep the surface of the ground loose between the rows of newly planted strawberries, and dig between the rows of the old ones. *Flower Garden.*— Plant bulbs of nearly all the hardy species in dry weather; dig and manure borders between shrubs and herbaceous plants, and form new ones where required, leaving the ground rough. Carnations, etc., that have been propagated during the Summer may now be formed into beds, and shrubs, roses, etc., may be planted towards the end of the month; examine the haunts of slugs, as every one destroyed now will save considerable trouble and annoyance in the Spring. *Kitchen Garden.*—Continue to sow and plant a succession of vegetables, salading, etc.; dig and manure all spare ground in dry weather. Dress asparagus beds for the Winter. *Greenhouse.*— Cuttings of geraniums that have struck root should be potted into small pots, to be shifted into larger as they advance in growth. The same rule applies to cinerarias, calceolarias, etc.; give air freely during fine weather, and water moderately during damp or wet weather. Gloxinias, achimenes, and other bulbous plants that have done flowering, should be allowed to dry off; primulas and cyclamens that are coming into bloom should be kept near the glass and watered freely.

ROGATION.—From the Latin *rogare*, to beseech. Special prayers are appointed as a preparation for the observance of the Ascension.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be proceeded with in dry weather, taking care to leave the surface of the ground loose after the operation. The general pruning of fruit trees, vines, etc., may be commenced towards the end of the month, especially of such as are in a weak state of growth. Root-prune where necessary. All the ground should now be dug up roughly, burying the leaves and what manure can be afforded. *Flower Garden.*—Now is the time for putting in order all flower borders, shrubberies, etc., by pruning the shrubs and roses, trimming the edges, dividing and regulating the herbaceous plants, digging the borders and thereby creating a neat appearance during the Winter months, and obviating the necessity of digging amongst the roots of plants in the Spring; it likewise breaks into the favourite haunts of the slugs, whereby they are more easily found and destroyed; where new borders are to be formed and planted, it should now be done. *Kitchen Garden.*—Plant out cabbage, cauliflower, and lettuce. Sow peas, broad beans, and carrots for early use. Sow spinach and onions. Make plantations of rhubarb and asparagus. *Greenhouse.*—Little can be done in the greenhouse beyond giving plenty of air on all favourable occasions, guarding against night frost, watering when the earth becomes dry, and keeping the plants free from vermin and dead leaves. Keep all growing plants as near the glass as possible.

WHITSUNTIDE, June 1.—A pentecostal festival, so called, it is said, because in the primitive church the newly baptised appeared at worship between Easter and Pentecost in white garments.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be completed this month; should it not be convenient to do so, the trees intended to be planted next month, or later, should now be lifted and laid in by the heels, which will keep them back, always choosing dry weather for the operation; stir the ground around those planted previous to heavy rains as soon as it is dry enough for the purpose. All pruning should be finished this month. *Flower Garden.*—Continue the general directions for last month, and complete the planting of deciduous trees and shrubs. Keep the ground between bulbs free from weeds. *Kitchen Garden.*—Plant early potatoes, etc., in a warm dry border. Early peas and beans may be sown once a fortnight or three weeks from this time. Sow the main crops of onions and carrots, also some radishes, lettuces, spinach, and early cabbage. Propagate plants which are increased by rooted off-sets. Transplant for seed, if not done in Autumn, carrots, turnips, beet, celery, parsnips, &c. *Greenhouse.*—Continue the general directions for last month. Fuchsias that have shed their leaves should now be prepared for the following season by cutting back and repotting them. Geraniums that are growing tall and thin should have the ends of the shoots pinched off, which will make them more bushy and compact. Re-pot cinerarias and calceolarias as soon as the present pots are filled with roots. This rule applies to growing plants generally.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vine cuttings may be planted. Prepare for grafting: the proper time is as soon as the stocks are well started. Raspberry and strawberry borders may still be prepared and new ones formed. Look carefully over apple trees, and dress the parts affected by *aphis* or American blight. Manure freely vines and fruit trees that are weakly. *Flower Garden.*—Flower beds should be manured and dug; edgings formed, trimmed, and repaired; herbaceous plants divided; biennials planted. Roses may be pruned, and most sorts increased by cuttings. Seeds of hardy annuals may be sown in the borders; tender ones on a moderate heat for transplanting. Choice dahlias should be placed in a gentle heat, for the purpose of propagating by cuttings. Verbenas, shrubby calceolarias, pentstemons, etc., may be increased by the same means. *Kitchen Garden.* Earth up, plant, and sow asparagus; transplant, hoe, and sow cabbage; sow and plant as directed last month, and at end of month sow French beans in a warm border and vegetable marrows in sheltered places; plant out and sow lettuces for succession; sow and earth up peas. *Greenhouse.*—Admit air freely in fine weather; re-pot geraniums, cinerarias, calceolarias, etc., as the roots advance to the sides of the pot. Fuchsias that have been dormant should have their roots reduced and be re-potted in fresh soil. Cacti and other plants may be watered more freely than in the depth of Winter. Sow seeds of balsams, cockscombs, egg plants, etc., on a gentle heat; keep all plants clear of *aphis*, scale, etc.

GARDENERS' CALENDAR.—*Fruit Garden.*—The principal work this month is grafting, the chief aim being to bring the bark of the stock and the scion to fit closely; loosen the ground with a hoe after the operation; the same between vines and fruit trees in general; in dry weather mulch raspberries. *Flower Garden.*—Seeds of annuals, biennials, perennials, and shrubs should now be sown; tender ones raised in heat may be transplanted towards the end of the month. Dahlia roots may be planted: propagate choice varieties as recommended last month; take the cuttings out of heat as soon as they have struck root, and protect them from the frost till it is safe to plant them. Lay shrubs that are difficult of propagation by other means. Keep the hoe at work in dry weather, but do not use the rake, except for covering small seeds. *Kitchen Garden.*—Asparagus beds, keep free from weeds. Transplant cabbage, onions, and lettuce. Sow carrots, red beet, celery, turnips, French beans, spinach, radishes, vegetable marrow, scarlet runners. Plant potatoes, sow peas, and earth up those that are ready. Cucumbers may be sown in ridges. Keep the hoe among the crops, it will assist them in their growth. *Greenhouse.*—Follow the directions for last month. The plants in flower will require watering copiously and shading from the mid-day sun.

LAMMAS DAY, August 1.—This is one of the most ancient quarter-days. It has been conjectured that Lammass or Lambmass originated from St. Peter being the supposed patron of lambs: the mass being therefore instituted in his honour, that lambs might escape the danger arising from cold after being shorn at that season.

GARDENERS' CALENDAR.—*Fruit Garden.*—Look over the vines and rub off all superfluous buds. Disbud wall trees. Destroy caterpillars on fruit trees. Keep the surface of the ground loose with the hoe at all convenient seasons, whether there are weeds or not. Place a layer of fresh stable manure between the rows of strawberries: it will increase the size of the fruit and render it free from grit or sand. *Flower Garden.*—Seeds of annuals may still be sown. Tender species raised under shelter may be transplanted into the borders, choosing showery weather for the operation. Dahlias from seed and cuttings, and other tender plants, may be planted about the middle of the month. Mark the flowers of choice bulbs, etc., with the view of collecting their seed. Stake and tie the shoots of herbaceous and other plants as they advance. Where quality rather than quantity is the object, the number of flowering shoots should be reduced. Destroy slugs, *aphis*, scale, bugs, etc. *Kitchen Garden.*—Continue to sow and plant successional crops. Earth up potatoes and peas, sow all kinds of brocoli, Scotch kale, savoys, cauliflowers, tomatoes, and capsicums. Thin early-sown carrots, turnips, and spinach, and keep them free from weeds. *Greenhouse.*—Azaleas, camellias, ericas, etc., that have done flowering should be taken out of the house and placed in a shady situation towards the end of the month. Water sparingly the bulbs of achimenes, gloxinia, gesnera, etc., until they appear above the ground. Re-pot all fast-growing plants as often as the pots fill with roots. Use the syringe in the evening during sunny weather; guano or manure-water occasionally will assist flowering plants whose pots are full of roots. Wage continual war against insects.

GARDENERS' CALENDAR.—*Fruit Garden.*—Stop all shoots of vines, except the leaders at one joint beyond the fruit, and lay them to their trellis or supports; pinch off all unnecessary shoots in young fruit trees. Vines, newly-planted fruit trees, etc., will be much benefited by a mulching of half decomposed stable manure. Rub off the shoots from stocks that have been grafted, and remove the clay and binding as soon as they have joined, which may be known by their shooting vigorously; lay as many strawberry runners as may be required for new plantations, and remove allothes. *Flower Garden.*—The planting of dahlias and trim all annuals, if not done should be immediately; support all tall growing flowers as they advance; keep the surface of the ground loose with the hoe; clip and trim all edgings except roses; mark choice flowers for seed. *Kitchen Garden.*—Thin and hoe red beet, carrots, and all other Spring crops. Plant out capsicums and tomatoes. Prick out celery in small beds from the seed beds. Earth up peas, French beans, and potatoes. A succession of peas and French beans may be sown. *Greenhouse.*—Sow seeds of primula, cineraria, calceolaria, camellia, geranium, etc. Give plenty of air and water and shade during sunny weather.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vines not yet attended to should be done immediately, and as the lateral shoots appear they should be taken off to within one joint of the main shoots. Young apple or plum trees infested with red spider should be frequently syringed with tobacco water or soft soap well diluted. Brush off American blight as it appears on the young shoots of apple trees. Peaches, etc., on walls will now require frequent attention. Budding may be performed towards the end of the month. *Flower Garden.*—Dahlias, hollyhocks, etc., require frequent attention. Where fine show dahlias are required, one stem alone should be allowed to grow, and the lower lateral shoots removed from that, and the number of flower buds reduced; a liberal mulching will greatly promote their growth during the approaching hot weather. Bulbs of choice hyacinths, tulips, ranunculuses, anemones, etc., should be taken up and stored as they become dormant. Neatness is now the order. *Kitchen Garden.*—Earth up French beans, peas, and scarlet runners; a succession may be planted; prepare trenches and plant celery; transplant all kind of brocoli, cauliflowers, savoys, and cabbage for winter use; tomatoes and capsicums, if not put out, should now be done; vegetable marrows may yet be sown; sow turnips this month, and earth up late potatoes. *Greenhouse.*—Cinerarias, calceolarias, etc., that are intended to be kept for another season, should be removed into a shady situation as soon as they have done flowering. Fuchsias, geraniums, etc., that are flowering may be watered occasionally with liquid manure. Shade and water freely during hot weather.

The Board of Education is empowered to frame regulations for the distribution of all moneys granted by the Legislature for the purposes of education; to determine the *locale* of public schools; to regulate the course of instruction in the schools, the examination and classification of teachers, the issue of certificates of competency to teachers, the inspection of schools, and the functions and duties of Local School Boards; and to fix the maximum fees to be charged by teachers. All regulations must be approved of by the Governor-in-Council and be published in the *Gazette* before they are of any force. The Public Schools Act, 32 Victoria No. 14, provides for the appointment yearly of Local School Boards of not more than nine members, and directs that every child between seven and twelve years of age, resident within one mile from one of the public schools in the subjoined list (except those marked with an asterisk), must be sent to school, unless the parent or guardian holds a certificate of exemption from the Local School Board, which may be obtained on any one of the following grounds, namely:—That (1) the child is being privately educated in reading and writing, (2) is sent to some other school, (3) is prevented by ill-health, (4) can read and write, (5) or cannot safely attend school, or (6) that the parents cannot do in whole or in part without the labour of the child. In the absence of such certificate, any parent or guardian refusing or neglecting to send such child to school may be summoned before any two justices, who may order the child to be sent, and may determine what charge, if any, shall be made for such child. Any person refusing to obey such order, or ceasing after a time to obey it, is liable to a fine of not more than £2, to be enforced by distress only, not by imprisonment.

For a ticket for a single person above 60 years of age £16 must be paid, and in the case of families, if either of the parents is over 60 years of age, the applicant must deposit £20. Documentary evidence of the age of any immigrant must be produced upon his or her arrival, if required by the Immigration Agent.

If any immigrant be found on arrival not to answer the description stated in the application, the applicant will be liable to be called upon for repayment of any money which may have been paid from the public funds on account of such immigrant.

The emigrant must sign an engagement (for self and family) agreeing not to leave the colony within four years after arrival without paying one of the Immigration Agents one-fourth of the passage money for every year short of the four years, and a proportionate sum for every part of a year.

Persons introducing immigrants under these regulations must provide for their reception on arrival ; or if received into a Government establishment a charge of two shillings a day or part of a day will be made against the introducer.

In the event of death on the voyage half passage money only will be paid.

LAUNCESTON TIDE TABLE, 1873.

The calculations on the next page give the average time when high-water may be expected at Launceston, but the tides are so influenced by winds and other causes that the actual times of high-water will sometimes differ from the calculated ones by an hour or two.

It is high-water new and full moon at Launceston at 1h. 30m. p.m., and at George Town 11h. 45m. a.m. The tide in the Tamar flows nearly six hours and ebbs nearly seven hours, and rises from ten to twelve feet in settled weather.

High-water at the various sub-ports on the North Coast may be averaged as an hour and a half earlier than at Launceston.

Registered Letters must bear stamps to the value of sixpence as the registration fee, in addition to the ordinary postage. Unregistered letters containing coin are registered by the postmaster before transmission, the fee being charged upon delivery. The registering office is open from 10 a.m. till 4 p.m., except on English mail days at Hobart Town, when it is closed at 3 p.m.

Late Letters for inland mails are charged a uniform fee of 2d. each. Late ship letters pay 2d. extra at country post offices, and 3d. extra at the Hobart and Launceston offices. *Late Newspapers*, 1d. each. On English mail days at Hobart Town (when the ship reception boxes are closed at 4 p.m. sharp), ship letters and newspapers may be posted at the ordinary late fees until 4·30 p.m. ; and after that time letters for the United Kingdom and Victoria only until 6 p.m. at a fee of 1s. each.

Ship and Inland Packets must be in covers open at the ends or sides, and parcels of seed or samples of merchandise in bags or papers tied so as to be easily loosened and refastened. They must bear on the outside a statement of their contents and the name and address of the sender ; and must not contain any letter or epistolary communication. Packets exceeding 16 ounces in weight or of inconvenient form or size may be refused ; and the transmission of any exceeding eight ounces may be delayed for any time not longer than a week, unless for England.

Savings Bank Packets.-- Money or deposit books or documents referring thereto may be forwarded to or from Savings Banks in parcels not exceeding four ounces in weight at a charge of one penny only for each packet, if bearing the endorsement "Savings Bank Packet only" and the signature of the sender. Postmasters are bound to register these packets without fee.

unstamped letters are sent on, and charged on delivery with double the amount due. Unstamped letters and packages for the United Kingdom, the Australian Colonies, and New Zealand are detained and returned to the senders within seven days, if the postage still remains unpaid. When letters and packets for these countries are posted insufficiently stamped but bearing a single rate of postage, they are forwarded, but are charged on delivery with the deficiency, together with a fine of a single rate. Stamps must be affixed above the address, or the letter may be treated as unstamped.

LAUNCESTON AND WESTERN RAILWAY.

The L. & W. Railway was constructed by a company at a cost of £450,000, of which sum £50,000 were raised upon shares, the remaining £400,000 being provided by the sale in England of Government debentures bearing interest at 6 per cent., issued in exchange for the bonds of the company; the interest upon these debentures being secured upon the railway district. Under 36 Vict. No. 4, the Government raised an additional £60,000 by debentures bearing interest at 5 per cent., making a total sum of £510,000 chargeable to capital account. By resolutions of both Houses of the Legislature, the Railway District is now responsible for interest at 6 per cent. upon £250,000 only, the remainder being chargeable to the general revenue. The first sod was turned by H.R.H. the Duke of Edinburgh on the 15th of January, 1868; and the line was formally opened by His Excellency the Governor on the 10th of February, 1871. On the 3rd of August, 1872, the line was taken possession of by the Government, and it is now under the control of the Minister of Lands and Works.

SOCIETIES, PUBLIC INSTITUTIONS, COMPANIES, CLUBS, ETC., IN HOBART TOWN.

ACCLIMATISATION SOCIETY.—*Objects:* As far as possible to prevent the extinction of native game and to acclimatise British and foreign kinds in the colony. Franklin Island, where a gamekeeper is maintained by private subscriptions, is situated in the mouth of the River Derwent, at a distance of about 18 miles from Hobart Town, and was given by Lady Franklin (widow of the great navigator), after whom it was named, to the colonists of Tasmania. A comfortable weather-boarded cottage has been erected on the island, and a safe fishing boat provided free of charge, for the convenience of subscribers and visitors, who can engage a steam launch for a trip from Hobart Town. Safe-sailing barges pass the island almost daily, and afford comfortable accommodation for sportsmen who wish either to visit "Black Jack," where deer and kangaroo abound, or to skim around the fairy confines of the island-dotted and almost land-locked sheet of water known as Norfolk Bay. The sailors on board these vessels are invariably kind, civil, and obliging, and the cost of travel is hardly worth mentioning. Visitors who wish to land on Tasman's Peninsula must first obtain, through the Colonial Secretary, a licence from His Excellency the Governor to land; and this is almost always granted as a matter of course. Sloping Island, 400 acres, in Frederick Henry Bay, and Green Island, in D'Entrecasteaux Channel, are let by the Government to the trustees at a nominal rental. Trustees: Hon. Sir R. Officer, M.H.A., R. C. Gunn, Morton Allport, F.Z.S., J. W. Graves, the President of the Royal Society, the Colonial Treasurer, and the Surveyor-General. Hon. Secretary, J. W. COUNTRY DISTRICTS.*

The colony of Tasmania is divided into nineteen rural municipalities and seven police districts. Seven councillors are, in the first instance, elected by the ratepayers of the respective municipalities. Two councillors retire annually on the second Friday in December for two successive years, and every third year three retire ; in each case they are eligible for re-election. The councillors elect one of their number as Warden, whose term of office extends over one year. All powers by law vested in Police Magistrates are by Act of Parliament vested in the Warden while holding office ; and the Governor has the power of appointing the councillors to be justices of the peace within their respective municipalities during their term of office. Provision is thus made for the discharge of all legal business which formerly devolved on paid officers of the central Government.

Every male of the age of 21 years, assessed as owning property of the annual value of £5, or occupying property of the annual value of £10, is entitled to vote in the election of councillors.

FROM HOBART TOWN TO PORT ARTHUR.

Communication is kept up between Hobart Town and Port Arthur by the Government schooner, a vessel of about 40 tons burthen. The passage is generally made in a day, and seldom if ever exceeds two days ; and as a rule the schooner makes a trip weekly. It is necessary that persons wishing to visit the Peninsula should obtain authority to do so from the Colonial Secretary.

The traveller on horseback should cross from Hobart Town to Kangaroo Point by steamer ; thence ride to Cambridge, a distance of say nine miles ; then cross a ferry, about 300 yards wide, to Lewisham, at which place good accommodation exists at Jones's hotel ; whence proceed onward through the Carlton district to East Bay Neck, distant about 14 miles from Cambridge. Good accommodation will also be found at East Bay Neck, at Scrimger's hotel. The road up to this point, and for some distance beyond it, is tolerably good. Eagle Hawk Neck is now 15 miles away, and some parts of the road are very rugged. An armed guard is stationed here ; and a pass, signed by the Colonial Secretary, is necessary to enable a person to cross from Forestier's on to Tasman's Peninsula. Port Arthur is 14 miles hence, and the road is tolerably good. The journey through occupies a day and a half.

In connection with the above Table, it should be remembered that the new moon passes the meridian and rises and sets nearly at the same time as the sun ; and as she advances in her orbit eastward about 12½ degrees daily, so she rises and sets about 49 minutes daily later than the sun. At new moon, therefore, she rises and sets with the sun ; 7½ days after, when she is 90 degrees in advance of the sun, her time of rising will be about noon ; at full moon, when she has advanced 180 degrees, she will rise at about six ; and at waning, she will rise in her last quarter at about 12.

WEATHER TABLE.

The following table, constructed by the ingenious Dr. Kirwan upon philosophical considerations of the attraction of the sun and moon in their several positions respecting the earth, is submitted to notice, under the recommendation of actual observation in this colony, further confirmed by several years' experience in the Northern Hemisphere. It is not pretended to be infallible; but it comes so near the truth that in very few instances indeed will it be found to fail of furnishing the observer with the knowledge of what kind of weather there is the greatest probability of succeeding in any given quarter of the moon.

Strength of the Company evidenced by the addition of £616,794 to the funds in the last three years, after paying all outgoings.

The estimation in which this Company is held in England, and the perfect confidence reposed by the wealthy classes in its resources, is evidenced by the fact that the Corporation of the City of London, on the occasion of the visit of HH R.H. the Prince and Princess of Wales to the City, effected an Insurance for £50,000 on the additions and decorations to the Guildhall, and selected this office, as can be seen in the Money Article of *The Times* of 1st June, 1863, out of fifty-one Companies for this purpose.

LIFE BONUSES DECLARED EVERY FIVE YEARS.

The enormous capital and reserve fund of this Company is offered to Insurers in this Colony.

To insurance of Lives there is no question so important as that of security, and the estimate in which this company is held in England is evidenced by the unexampled increase of its business.

SUGAR LOAF

BRISBANE  STREET

GROCERY ESTABLISHMENT.

J. W. BRAND,

WHOLESALE AND FAMILY GROCER,

Launceston.

It is now acknowledged all over Launceston that J. W. BRAND is really the only grocer in Launceston who supplies goods with cheapness and excellence and purity of quality combined.

TEAS.—From the experience which J. W. Brand has had in the tea trade, the public may rely upon getting teas of surpassing excellence, and warranted pure as imported. HALF-CROWN TEA.—This is a mixture of the *finest teas imported*, having a character peculiar to itself, and a fine natural aroma totally distinct from any mixture of teas sold in the colony. The TWO-SHILLING TEA sold by Brand is quite equal to that sold by most grocers at 2s. 6d. per lb.

COFFEE.—The finest plantation and Java, ground daily; highly recommended to private families and general consumers for its purity and fine aroma.

SUGARS.—It is a noted fact that the Sugars sold by Brand are scarcely equalled, and certainly not surpassed, by any other house in the trade.

CHOICE GOODS for family use, a very large stock, too numerous to particularise, all of the *very best quality* and at truly *moderate prices.*

Families waited on for orders at all parts of the town and suburbs.

Prove the above facts yourself by a trial.

Don't mistake the address,

IMPORTANT CAUTION.

GROSS FRAUDS are now being practised by obscure manufacturers, more particularly in France and Germany, who imitate the labels of A. ROWLAND & SONS' perfumery. To prevent the substitution of counterfeits for the *genuine* articles, it is requested to purchase only of respectable dealers, and to observe the annexed small copies of A.R. and S.'s labels as they appear round the articles.

ROWLAND'S MACASSAR OIL, for promoting the growth, restoring, improving, and beautifying the human hair. Each bottle has a *Glass Stopper*, instead of cork, as formerly—all with the *cork* are counterfeits.

ROWLAND'S KALYDOR realises a healthy purity of complexion, and a softness and delicacy of skin, eradicates freckles, tan, pimples, spots, and discolourations. Each bottle has a *Glass Stopper*.

ROWLAND'S ODONTO, or PEARL DENTIFRICE, imparts a pearl-like whiteness to the teeth, eradicates tartar, strengthens the gums, and renders the breath pure and fragant.

NOTE.—The aim of the Editor of "BEST OF EVERYTHING" has been to treat each subject *exhaustively*, and not in the fragmentary manner which characterises books of this class.

LONDON—W. KENT AND CO., 23 Paternoster Row; and every Bookseller in Great Britain, Ireland, and the Colonies.

70 YEARS OF SUCCESS have proved beyond doubt that

ROWLAND'S

Macassar Oil, Kalydor, & Odonto

Are the Three most invaluable TOILET REQUISITES extant.

The MACASSAR OIL is the best and safest RESTORER and BEAUTIFIER of the HUMAN HAIR, being perfectly free from all poisonous or mineral mixtures.

CAUTION.—Each Bottle has a Glass Stopper instead of the Cork as formerly: all with the *Cork* are spurious imitations. This notice is deemed necessary, as the Proprietors have received intimation that a large quantity of Counterfeit, of the most pernicious quality, has lately been sent from France and Germany to India and the Colonies, under their names.

The KALYDOR produces PURITY OF COMPLEXION, and a Softness and Delicacy of Skin.

The ODONTO preserves the TEETH, imparts a peal-like whiteness to them, and gives a pleasing fragrance to the BREATH.

Sold by all Chemists and Perfumers, and at all Bazaars throughout India, China, and the Colonies. Ask for "ROWLAND'S" Articles, of 20 Hatton Garden, London.

MEDLOCK & BAILEY'S

PATENT BISULPHITE OF LIME,

FOR THE

Preservation of Meat, Fish, Poultry, Game, and all other Animal Substances, in Temperate or Tropical Climates and on board Ship.

By the use of this valuable Preparation fresh meat can be had throughout a voyage, however long, thus avoiding the expenses and losses incidental to the conveyance of live stock on board. No steamer or passenger ship should be without it, as it will enable Captains to lay in provisions at foreign ports, wherever they are cheap and good, relieving them of the necessity of providing for the voyage home. It imparts no flavour to the meat, nor does it lessen its nutritive value, while it prevents scurvy and destroys contagion wherever it is used.—For further particulars see Descriptive Pamphlet, and also Opinions of the Press, both sent post free for seven stamps.

Extract from *The Times* Money Article of the 10th December, 1870.

"There was a trial of Preserved Meat from Rosario, in the Argentine Republic, in the City, on Wednesday, with, it is stated, most satisfactory results. The preparation was effected by immersion in a solution of Bisulphite of Lime, according to the process of Medlock and Bailey, of the Horseley Fields Chemical Works, Wolverhampton, and the meat was sealed up in a cask in the presence of Mr. Hutchinson, the British Consul at Rosario, on the 10th of August last, and brought by him to this country in a recent steamer. It had, therefore, been kept four

months, and had a passage across the Line, yet was found perfectly fresh, not only in quality, but in appearance, and was deemed by the persons present at the trial equal to any good ordinary home beef. Amongst these persons were merchants largely interested in the commerce of the River Plate, by whom an unqualified conviction has since been expressed that the problem of bringing unlimited supplies of animal food from distant regions will now prove to have been solved, the method being alike simple and inexpensive, and capable of being adopted under any circumstances. At the trial on Wednesday not the slightest flavour of any chemical or other artificial agent was detected."

The meat was cooked at Simpson's, Bolt Court, Cornhill, and was partaken of by a number of influential gentlemen and merchants interested in the question, including M. B. Sampson, Esq., Consul-General of the Argentine Republic ; Consul-General Neil, of Uruguay copies of whose Official Certificates can be had on application, &c.

Extracts of a few of the Communications lately received by the Patentees.

Sir James Matheson, Bart., M.P., 20th July, 1868, enclosing a further order."—"Sir James Matheson is glad to tell Messrs. William Bailey and Son that their Bisulphite of Lime answered perfectly in carrying the carcases of a deer and calf from Stornoway to London, *quite fresh*, being on the journey and voyage four days, during the very hot days of June ; besides enabling the venison and veal to be kept for twelve days after arrival by using the Bisulphite according to directions."

Thomas J. Hutchinson, Esq., F.R.G.S., F.A.S.L., &c., &c., Her Britannic Majesty's Consul for Rosario, Rio de la Plata.—"When at Monte Video, I had the pleasure of tasting at breakfast a small piece of beef prepared by the Bisulphite of Lime sent out to the Plate. It was given to me by Mr. Prange. The preservation of that meat was perfect, and it was the first piece of real juicy beef that I have tasted for the last seven years."

Dr. Stone, Health Officer, Trinidad.—"I have found your Bisulphite of Lime of great value as a means of preserving meat."

The Governor of the City Poor House, Edinburgh, is "very highly pleased with the results obtained from the use of your Bisulphite."

Mr. J. W. Salisbury, Meat Salesman, of Newgate Market, London—"It is *a most valuable thing* for butchers."

Mr. George Blackman, Butcher, of Newport Market, London.—"I find Medlock and Bailey's Patent Preserving Liquid invaluable."

Mr. George Scarlett, Butcher, of Notting Hill, London.—"I believe there is nothing to be compared with your Bisulphite."

Mr. Alexander M'Allister, Fish and Game Salesman of Glasgow.—"By your Patent Process I have succeeded quite beyond my most sanguine expectations."

Thomas Sutton, Esq., B.A., of Rédon, France. 27th August, 1868.—"At last I have tried your Bisulphite of Lime, and I find it a grand success. We dined yesterday off a leg of mutton which I had preserved, and found it delicious—undistinguishable from fresh meat—no flavour of the Preservative—rich red gravy—no loss of weight—every word is true that you say in your pamphlet."

Messrs. Hoper and Scherwin, of Berlin, 17th Sept., 1868.—"We have much pleasure in informing to-day that our success with meat as well as beer has been complete beyond expectation."

In addition to its remarkable power in preserving animal substances from decay, Medlock and Bailey's Bisulphite of Lime is also an absolute specific against epidemic Cattle Disease, if used in accordance with the patentee's instructions. It thus enables the shipper to carry either "live or dead" meat in perfection, without fear of loss in transit, from the bad health of the one or the decomposition of the other.

RE-CARBONATED

FLUID MAGNESIA.

THE high estimation in which FLUID MAGNESIA has been held for many years has induced the Proprietors to manufacture the above preparation in a state of great purity and of uniform strength—thus affording the *Medical Practitioner* an opportunity of administering *this safe and effectual Medicine* with confidence, and giving to the public generally a remedy which can at all times be used with safety and success, either alone or in combination with the ACIDULATED RASPBERRY SYRUP. As most of the FLUID MAGNESIA commonly sold is of uncertain strength, and seldom contains the quantity represented, MESSRS. WEAVER & CO. have imported apparatus at a great expense for the purpose of manufacturing FLUID MAGNESIA on a large scale, and with which they can produce a solution of great purity and uniform strength.

During the oppressive heat of summer

WEAVER'S RE-CARBONATED

FLUID MAGNESIA,

Mixed with the proper proportion of the

ACIDULATED RASPBERRY SYRUP,

Instantly produces the most *Refreshing Reverage*, in which the flavour of the *Raspberry* is fully developed, and the degree of cold consequent on the formation of the CITRATE OF MAGNESIA is nearly equal to an *Iced Beverage.*

CAUTION.—*The great strength of this FLUID MAGNESIA renders it necessary to cork the Bottles quickly and securely after opening, so as to prevent crystallization.*

TESTIMONIALS.

DEAR SIRS,—I cannot leave the colony without acquainting you that I have for many years derived great benefit from your Antibilious Pills, insomuch that, under Providence, I ascribe the vigorous health and green old age enjoyed by me, at over eighty years of age, to a free use of that INVALUABLE MEDICINE. Indeed, the best proof of the estimation in which your ANTIBILIOUS PILLS are held by me is that I have taken FORTY DOZEN of them to England; and I have no hesitation in pronouncing them one of the *best and safest medicines in the world.*

They have long since been used in one of the largest County Hospitals in Great Britain, and received the commendation of several eminent Physicians and Surgeons ; and during the last thirty-five years have proved their value in thousands of instances in diseases of the *Head, Chest, Bowels, Liver*, and *Kidneys ;* also in *Ulcers, Sores*, and *Rheumatism ;* and in all Skin Complaints

DR. J. COLLIS BROWNE'S

CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE.

ADVICE TO INVALIDS.—If you wish to obtain quiet, refreshing sleep, free from headache, relief from pain and anguish, to calm and assuage the weary achings of protracted disease, invigorate the nervous media, and regulate the circulating systems of the body, you will provide yourself with that marvellous remedy discovered by Dr. J. Collis Browne (Member of the College of Physicians, London), to which he gave the name of

CHLORODYNE,

and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for Coughs, Consumption, Bronchitis, Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever, Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, etc.

From LORD FRANCIS CONYNGHAM.

Mount Charles, Dec. 11, 1868.

Lord Francis Conyngham, who this time last year bought some of Dr. J. Collis Browne's Chlorodyne from Mr. Davenport, and has found it a most wonderful medicine, will be glad to have half-a-dozen bottles sent at once to the above address.

*** Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manilla to the effect that Cholera has been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864.

CAUTION.—BEWARE OF PIRACY AND IMITATIONS.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. Collis Browne was undoubtedly the Inventor of CHLORODYNE; that the story of the defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See *Times*, July 13, 1864.

Sold in Bottles at 1s. 1½d., 2s. 9d., 4s. 6d. None is genuine without the words, "Dr. J. COLLIS BROWNE'S CHLORODYNE" on the Government Stamp. Overwhelming medical testimony accompanies each bottle.

THIS CUT REPRESENTS

WILLCOX & GIBBS SEWING MACHINE

DETACHED FROM STAND.

With regard to the capabilities of the WILLCOX & GIBBS machine, we consider it the best Family Machine ever invented. The entire mechanism is evidently of the simplest kind, hence it is not liable to derangement, and being exquisitely made, cannot, with fair usage, get out of order. It is also easily learned and managed, and we can answer from experience that it does its work, which is most durable, in the neatest and most substantial manner. We know of some that have been constantly used for three or four years without any stoppage for repairs, having done the hard work of a dressmaking establishment during the whole of that time. All that we have seen in families have, without a single exception, given the greatest satisfaction.—*The Queen.*

2. Machine, on polished Black Walnut Table, with Drawer and Lock; Ornamental Iron Stand. **PRICE £9 10/.**

I have long been an enthusiast, if not an expert, among Sewing Machines. Besides, my wife is practically familiar and experienced with the leading kinds. I have made critical examinations, and severe tests, of twelve different Machines claiming to be "first class," and I am entirely satisfied that the WILLCOX & GIBBS is so far above all others in practical worth, that it is without a rival.—*Rev. H. A. Reid, Beaver Dam, Wis.*
