A SUMMARY OF THE PRINCIPAL ASTRONOMICAL AND METEOROLOGICAL OCCURRENCES FOR THE YEAR 1877.

By F. Abbott, F.R.A.S., etc.

Explanation.—*Sun's Rising and Setting.*—These numbers show the mean time when the Sun's centre, elevated by refraction, appears on the horizon, the eye being on a level with it.

Phases of the Moon.—The times are here given to the nearest second when the Moon is respectively 0deg., 90deg., 180deg., and 270deg. of longitude from the sun. *Apogee* is the time of her greatest distance from the earth ; *Perigee* the time of her nearest approach to it.

Geographical Positions.—The position arrived at for the Magnetic Observatory in 1852 by Commander Kay gave to Fort Mulgrave, east longitude 9h., 49m. 29·6s. Captain Denham, of H.M.S. *Herald*, with 32 chronometers 1856 to 1858, gave 9h. 49m. 28·8s., giving a mean longitude 9h. 49m. 29·2s. The private Observatory lies on a direct line North and South with Fort Mulgrave, and taken in connection with observations made on the transit of Mercury over the Sun's disc Nov. 5th, 1868, gives a very close result to 9h. 49m. 29·2s., which has been here adopted.

ECLIPSES.

In the year 1877 there will be three eclipses of the Sun, and two of the Moon.

First.—A total eclipse of the Moon on the morning of February 28th, visible in Australia. At Hobart Town the different phases will take place approximately as follow :—

First contact with the penumbra,	Feb. 28th	2h. 22m. a.m.
First contact with the shadow	,,	3h. 19m. a.m.
Beginning of total eclipse	,,	4h. 17m. a.m.
Middle of the eclipse	,,	5h. 05m. a.m.
End of total eclipse	,,	5h. 53m. a.m.
Last contact with the shadow	,,	6h. 51m. a.m.
Last contact with the penumbra	,,	7h. 46m. a.m.

The magnitude of the eclipse is 1·66 times the moon's diameter.

Second.—A partial eclipse of the Sun on March 15th, invisible in Australia, principally visible in Russia and Siberia.

Third.—A partial eclipse of the Sun on August 9th, invisible in Australia, but visible in the northern part of North America.

Fourth.—A total eclipse of the Moon on the morning of August 24th, invisible in the eastern part of Australia.

Fifth.—A partial eclipse of the Sun on September 7th, invisible in Australia. This eclipse will be visible in the southern part of South America.

PROGRESS OF ASTRONOMY.

The Recent Transit of Venus ; the Forthcoming Opposition of Mars ; and the Minor Planets.

The reductions of English observations for the transit of Venus are proceeding vigorously under the superintendence of Captain Tupman. The amount of work involved is something marvellous. About 5,000 transits of stars were taken for the correction of clock and instrumental errors. Mr. Burton has made more than 6,000 microscopic measures to determine the optical distortion of the photoheliograph. A considerable time may still be expected to elapse before the final result even of the British observations can be made known.

The Opposition of Mars, from July 18th to October 21st, 1877.—The determination of the solar-parallax within desirable limits of error is still a work of the future, and it behoves astronomers not to leave untried any method that promises to yield valuable aid in the solution of this important problem. The Opposition of Mars in 1877 will afford a favourable opportunity for employing observations of this planet in the determination of the solar-parallax with little or no extra expense to either Governments or individuals that are already provided with meridian instruments in fixed observatories. The *Nautical Almanac* for 1877 gives an ephemeris of stars to be observed with Mars near the opposition, with a view to the determination of the parallax of that planet, from corresponding observations of the difference of declination between the planet and stars made at places differing considerably in latitude, such as observations made in the northern and southern hemispheres.

Minor Planets.—Last year we noted 147 of these new minor planets between Mars and Jupiter. Up to December, 1876, we have to record the present amount at 167. The amount of calculation which falls upon those who have undertaken to provide annual ephemerides of the minor planets has now become so onerous that it is feared it will be found impossible to keep pace with them, and many of the more recently discovered may be ultimately lost (as a few already are) for the want of being able to keep correct elements of their orbits.

It is clear from the foregoing table that Hobart Town has the most equable climate in the list. This arises from its insular position. Heat absorbed by a fluid increases the rate of its evaporation, and the evaporating process reduces the sensible amount of latent heat which the body has acquired. Every accession of temperature brings with it its own remedy ; for at night the process is reversed, radiation takes place more slowly, from which together with minor causes in connection with that of sea breezes, the temperature at the surface remains comparatively unaltered, and renders our beautiful Island the Queen of the South.

AUSTRALIAN SEASONS.

name, or below when they are of contrary names; whence, by adding or subtracting from its meridian passage, the apparent time of its rising and setting for this latitude may be computed.

None of the Planets are visible till the Sun is a certain number of degrees below the horizon, viz.:

Mars	11° 30′
Jupiter	8° 00′
Saturn	10° 00′

GARDENERS' CALENDAR.—*Fruit Garden.*—Where budding is required it may still be performed, choosing, if possible, showery weather. Cut off all surplus shoots from young trees, if they are not required for scions in the Spring. Continue to pinch off all lateral shoots from vines. *Flower Garden.*—Choice carnations may be increased by cuttings and layers with shade and moisture. Choice flowers should be marked for seed. Annuals that have done flowering should be removed, or some will become troublesome weeds. *Kitchen Garden.*—Plant celery in trenches, and a succession of French beans; sow turnips when the weather is moist; take up early potatoes that are ripe; gather all kinds of seeds as they ripen; cut from strawberries all runners that are not wanted for plants, to give strength to the roots. *Greenhouse.*—Calceolarias, cinerarias, etc., may still be sown. Geraniums that have done flowering should be cut down; re-pot as soon as they begin to make fresh shoots. Cuttings struck now will make good plants next year, with care. Continue to shade and water as directed last month.

JANUARY 6.—Called *Twelfth Day*, as being that number after Christmas, and *Epiphany* from a Greek word signifying "appearance." It is a festival of the church in commemoration of the manifestation of Christ to the Gentiles,—more expressly to the three magi or wise men of the East who came, led by a star, to worship him immediately after his birth. The Queen, through the Lord Chamberlain, annually on this day presents gold, frankincense, and myrrh at the Chapel Royal.

GARDENERS' CALENDAR.—*Fruit Garden.*—Little is required this month besides attending to the buds. Strawberry runners should be kept moist to form robust plants in time for transplanting in the first Autumn rains. *Flower Garden.*—Cut off all flower stalks as soon as done flowering, except those required for seed. The flowering season is prolonged by cutting off surplus seed as soon as formed. Verbenas, pentstemons, petunias, and other herbaceous perennial plants may now be propagated by cuttings. Encourage asters, chrysanthemums, dahlias, etc., by frequent watering. Use the rake to preserve a neat appearance. *Kitchen Garden.*—In showery weather vegetables may be sown to come in during the Winter. Mark out plants of the cabbage tribe to run to seed. Earth up peas and potatoes; hoe and stir the surface among all descriptions of crops. *Greenhouse.*—As the principal displays of this season are over, turn your attention to preparation for the next by propagating by seed and cuttings, and preserving such old plants as are desirable for another year. This is the time for forming plants of the early flowers, too frequently neglected by amateurs until the flowering season. Sow mignonette for Winter flowering.

SEPTUAGESIMA and the next two Sundays are preparatory to the Lenten fast, which begins about forty days before Easter, and hence is called Quadragesima. Their names are significant of their situation, thus :—Septuagesima (seventy days), Sexagesima (sixty days), and Quinquagesima (fifty days) before Easter.

Collect the leaves as they fall and convert them into manure. *Flower Garden.*—Continue the general directions given for last month, and sow seed of perennial and annual flowers for Spring flowering as they ripen. *Kitchen Garden.*—Sow cabbage, cauliflowers, lettuce, spinach, and onions for early use. Sow turnips, thin out those sown last month. Earth up celery, take up potatoes, and house onions when well dried. *Greenhouse.*—Continue the general directions given for last month.

SHROVETIDE (Feb. 11) derives its title from the practice of being *shriven* or *shrove*—that is, confessing and receiving absolution—before the Lenten fast.

ASH WEDNESDAY (Feb. 14).—So called on account of penitents wearing sackcloth next their skin and sprinkling ashes on their heads.

ST. PATRICK.—The shamrock is said to be worn by the Irish upon the anniversary of this their tutelar saint for the following reason:—When he preached the gospel to the pagan Irish, he illustrated the doctrine of the Trinity by showing them a trefoil, or three-leaved grass, with one stalk; which operating to their conviction, the shamrock, which is a bundle of this grass, was ever afterwards worn upon this saint's anniversary, to commemorate the event.

GARDENERS' CALENDAR.—*Fruit Garden.*—Continue to prepare the ground intended for planting with strawberries and fruit trees; secure the leaves as directed last month. *Flower Garden.*—Plant jonquils, snowdrops, crocuses, ranunculuses, anemones, and other early flowering bulbs; sow seeds of stocks, wall-flowers, sweet-williams, and other biennials, for transplanting in the Spring, if you have not sufficient Spring-sown ones. Verbenas, petunias, pentstemons, etc., may still be propagated by cuttings. Dahlias should be taken up and stored in a dry airy place soon after the frost has killed the stems. Plant deciduous trees. *Kitchen Garden.*—Sow cauliflowers, cabbages, and lettuce; plant out those sown last month; sow spinach and turnips; sow onions for planting out; earth up celery. Carrots may be sown for early use. *Greenhouse.*—Remove all tender plants into the house; encourage the growth of geraniums, calceolarias, cinerarias, etc., by re-potting as soon as the present pots are filled with roots, and keep them free from *aphis* by washing, fumigation, etc. Fuchsias that have done flowering should be kept moderately dry during the dormant state; give plenty of air during fine weather.

GARDENERS' CALENDAR.—*Fruit Garden.*—Planting of vines and fruit trees may be commenced towards the end of the month; in the meantime keep the ground well worked in dry weather, and dig between the old trees as soon as the leaves have fallen. Keep the surface of the ground loose between the rows of newly planted strawberries, and dig between the rows of the old ones. *Flower Garden.*—Plant bulbs of nearly all the hardy species in dry weather; dig and manure borders between shrubs and herbaceous plants, and form new ones where required, leaving the ground rough. Carnations, etc., that have been propagated during the Summer may now be formed into beds; and shrubs, roses, etc., may be planted towards the end of the month. Examine the haunts of slugs, as every one destroyed now will save considerable trouble and annoyance in the Spring. *Kitchen Garden.*—Continue to sow and plant a succession of vegetables, salading, etc.; dig and manure all spare ground in dry weather. Dress asparagus beds for the Winter. *Greenhouse.*—Cuttings of geraniums that have struck root should be potted into small pots, to be shifted into larger as they advance in growth. The same rule applies to cinerarias, calceolarias, etc.; give air freely during fine weather, and water moderately during damp or wet weather. Gloxinias, achimenes, and other bulbous plants that have done flowering, should be allowed to dry off; primulas and cyclamens that are coming into bloom should be kept near the glass and watered freely.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be proceeded with in dry weather, taking care to leave the surface of the ground loose after the operation. The general pruning of fruit trees, vines, etc., may be commenced towards the end of the month, especially of such as are in a weak state of growth. Root-prune where necessary. All the ground should now be dug up roughly, burying the leaves and what manure can be afforded. *Flower Garden.*—Now is the time for putting in order all flower borders, shrubberies, etc., by pruning the shrubs and roses, trimming the edges, dividing and regulating the herbaceous plants, digging the borders and thereby creating a neat appearance during the Winter months, and obviating the necessity for digging amongst the roots of plants in the Spring; it likewise breaks into the favourite haunts of the slugs, whereby they are more easily found and destroyed; where new borders are to be formed and planted, it should now be done. *Kitchen Garden.*—Plant out cabbage, cauliflower, and lettuce. Sow peas, broad beans, and carrots for early use. Sow spinach and onions. Make plantations of rhubarb and asparagus. *Greenhouse.*—Little can be done in the greenhouse beyond giving plenty of air on all favourable occasions, guarding against night frost, watering when the earth becomes dry, and keeping the plants free from vermin and dead leaves. Keep all growing plants as near the glass as possible.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be completed this month; should it not be convenient to do so, the trees intended to be planted next month, or later, should now be lifted and laid in by the heels, which will keep them back, always choosing dry weather for the operation; stir the ground around those planted previous to heavy rains as soon as it is dry enough for the purpose. All pruning should be finished this month. *Flower Garden.*—Continue the general directions for last month, and complete the planting of deciduous trees and shrubs. Keep the ground between bulbs free from weeds. *Kitchen Garden.*—Plant early potatoes, etc., in a warm dry border. Early peas and beans may be sown once a fortnight or three weeks from this time. Sow the main crops of onions and carrots, also some radishes, lettuces, spinach, and early cabbage. Propagate plants which are increased by rooted off-sets. Transplant for seed, if not done in Autumn, carrots, turnips, beet, celery, parsnips, etc. *Greenhouse.*—Continue the general directions for last month. Fuchsias that have shed their leaves should now be prepared for the following season by cutting back and repotting them. Geraniums that are growing tall and thin should have the ends of the shoots pinched off, which will make them more bushy and compact. Re-pot cinerarias and calceolarias as soon as the present pots are filled with roots. This rule applies to growing plants generally.

LAMMAS DAY, August 1.—This is one of the most ancient quarter-days. It has been conjectured that Lammass or Lambmass originated from St. Peter being the supposed patron of lambs: the mass being therefore instituted in his honour, that lambs might escape the danger arising from cold after being shorn at that season.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vine cuttings may be planted. Prepare for grafting: the proper time is as soon as the stocks are well started. Raspberry and strawberry borders may still be prepared, and new ones formed. Look carefully over apple trees, and dress the parts affected by *aphis* or American blight. Manure freely vines and fruit trees that are weakly. *Flower Garden.*—Flower beds should be manured and dug; edgings formed, trimmed, and repaired; herbaceous plants divided; biennials planted. Roses may be pruned, and most sorts increased by cuttings. Seeds of hardy annuals may be sown in the borders; tender ones on a moderate heat for transplanting. Choice dahlias should be placed in a gentle heat, for the purpose of propagating by cuttings. Verbenas, shrubby calceolarias, pentstemons, etc., may be increased by the same means. *Kitchen Garden.*—Earth up, plant, and sow asparagus; transplant, hoe, and sow cabbage; sow and plant as directed last month, and at end of month sow French beans in a warm border and vegetable marrows in sheltered places; plant out and sow lettuces for succession; sow and earth up peas. *Greenhouse.*—Admit air freely in fine weather; re-pot geraniums, cinerarias, calceolarias, etc., as the roots advance to the sides of

the pot. Fuchsias that have been dormant should have their roots reduced and be re-potted in fresh soil. Cacti and other plants may be watered more freely than in the depth of Winter. Sow seeds of balsams, cockscombs, egg plants, etc., on a gentle heat ; keep all plants clear of *aphis*, scale, etc.

GARDENERS' CALENDAR.—*Fruit Garden.*—The principal work this month is grafting, the chief aim being to bring the bark of the stock and the scion to fit closely ; loosen the ground with a hoe after the operation ; the same between vines and fruit trees in general ; in dry weather mulch raspberries. *Flower Garden.*—Seeds of annuals, biennials, perennials, and shrubs should now be sown ; tender ones raised in heat may be transplanted towards the end of the month. Dahlia roots may be planted : propagate choice varieties as recommended last month ; take the cuttings out of heat as soon as they have struck root, and protect them from the frost till it is safe to plant them. Lay shrubs that are difficult of propagation by other means. Keep the hoe at work in dry weather, but do not use the rake, except for covering small seeds. *Kitchen Garden.*—Asparagus beds, keep free from weeds. Transplant cabbage, onions, and lettuce. Sow carrots, red beet, celery, turnips, French beans, spinach, radishes, vegetable marrow, scarlet runners. Plant potatoes, sow peas, and earth up those that are ready. Cucumbers may be sown in ridges. Keep the hoe among the crops, it will assist them in their growth. *Greenhouse.*—Follow the directions for last month. The plants in flower will require watering copiously and shading from the mid-day sun.

GARDENERS' CALENDAR.—*Fruit Garden.*—Look over the vines and rub off all superfluous buds. Disbud wall trees. Destroy caterpillars on fruit trees. Keep the surface of the ground loose with the hoe at all convenient seasons, whether there are weeds or not. Place a layer of fresh stable manure between the rows of strawberries : it will increase the size of the fruit and render it free from grit or sand. *Flower Garden.*—Seeds of annuals may still be sown. Tender species raised under shelter may be transplanted into the borders, choosing showery weather for the operation. Dahlias from seed and cuttings, and other tender plants, may be planted about the middle of the month. Mark the flowers of choice bulbs, etc., with the view of collecting their seed. Stake and tie the shoots of herbaceous and other plants as they advance. Where quality rather than quantity is the object, the number of flowering shoots should be reduced. Destroy slugs, *aphis*, scale, bugs, etc. *Kitchen Garden.*—Continue to sow and plant successional crops. Earth up potatoes and peas, sow all kinds of brocoli, Scotch kale, savoys, cauliflowers, tomatoes, and capsicums. Thin early sown carrots, turnips, and spinach, and keep them free from weeds. *Greenhouse.*—Azaleas, camellias, ericas, etc., that have done flowering should be taken out of the house and placed in a shady situation towards the end of the month. Water sparingly the bulbs of achimenes, gloxinia, gesnera, etc., until they appear above the ground. Re-pot all fast-growing plants as often as the pots fill with roots. Use the syringe in the evening during sunny weather; guano or manure-water occasionally will assist flowering plants whose pots are full of roots. Wage continual war against insects.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vines not yet attended to should be done immediately, and as the lateral shoots appear they should be taken off to within one joint of the main shoots. Young apple or plum trees infested with red spider should be frequently syringed with tobacco water or soft soap well diluted. Brush off American blight as it appears on the young shoots of apple trees. Peaches, etc., on walls will now require frequent attention. Budding may be performed towards the end of the month. *Flower Garden.*—Dahlias, hollyhocks, etc., require frequent attention. Where fine show dahlias are required, one stem alone should be allowed to grow, and the lower lateral shoots removed from that, and the number of flower buds reduced; a liberal mulching will greatly promote their growth during the approaching hot weather. Bulbs of choice hyacinths, tulips, ranunculuses, anemones, etc., should be taken up and stored as they become dormant. Neatness is now the order. *Kitchen Garden.*—Earth up French beans, peas, and scarlet runners; a succession may be planted; prepare trenches and plant celery; transplant all kinds of brocoli, cauliflowers, savoys, and cabbage for winter use; tomatoes and capsicums, if not put out, should now be done; vegetable marrows may yet be sown; sow turnips this month, and earth up late potatoes. *Greenhouse.*—Cinerarias, calceolarias, etc., that are intended to be kept for another season, should be removed into a shady situation as soon as they have done flowering. Fuchsias, geraniums, etc., that are flowering may be watered occasionally with liquid manure. Shade and water freely during hot weather.

IMMIGRATION DEPARTMENT.

Commissioners.—The Colonial Secretary (president), the Colonial Treasurer, the Hon. Henry Butler, M.H.A., the Hon. Sir J. M. Wilson, M.L.C., and the Hon. James R. Scott, M.L.C. Secretary and Immigration Agent, Hobart Town, B. Travers Solly. Immigration Agent, Launceston, George Smith.

Offices.—Public Buildings, Hobart Town and Launceston.

The following are the regulations for the guidance of persons desirous of introducing immigrants from the United Kingdom under the bounty system :

Application, stating sex and class of immigrants, must be made on printed forms, which will be supplied by the Immigration Agents, the Wardens of Municipalities, or the Police Magistrates.

For a ticket for a single person above 60 years of age £16 must be paid, and in the case of families, if either of the parents is over 60 years of age, the applicant must deposit £20. Documentary evidence of the age of any immigrant must be produced upon his or her arrival, if required by the Immigration Agent.

If any immigrant be found on arrival not to answer to the description stated in the application, the applicant will be liable to be called upon for payment of any money which may have been paid from the public funds on account of such immigrant.

The immigrant must sign an engagement (for self and family) agreeing not to leave the colony within four years after arrival without paying one of the Immigration Agents one-fourth of the passage money for every year short of the four years, and a proportionate sum for every part of the year.

Persons introducing immigrants under these regulations must provide for their reception on arrival ; or if received into a Government estab-

lishment a charge of two shillings a day or part of a day will be made against the introducer.

In the event of death on the voyage half passage money only will be paid.

Payments required from Applicants.—Family ticket including man, wife, and the children under 12 years of age, £15 ; single man, £10 ; single woman, £5. Children of 12 years and upwards considered as adults.

Bounty Rates of Passage Money.—Each adult, £16 ; each child between 3 and 12 years of age, £8 ; ditto under three years, £4.

Land Orders.—Under the Immigration Acts, 1867 and 1874, immigration agents may be appointed abroad, who shall issue to approved emigrants proceeding to Tasmania at their own expense land order warrants entitling the holders, on arrival in the colony, to a land order in respect of each person named therein. Such land orders to be of the nominal value of £18 for each immigrant of and over fifteen years of age, and of £9 for each child between twelve months and fifteen years of age, and to be available to their full value in payment for land purchased under the Waste Lands Act.

Any cabin or intermediate passenger (excepting persons who have been resident for one year or upwards in any Australian colony or New Zealand) arriving with the intention of settling in the colony, and who has not received a land order under the previous section, may at any time within twelve months after his arrival obtain from the Board of Immigration a certificate entitling him to select 30 acres of land ; if married he shall be entitled, within twelve months after the arrival of his family, to further certificates authorising the selection of twenty acres in respect of his wife, and ten acres in respect of each child. Selection to be made within a year after the date of the certificates. These certificates to be received by the Commissioner of Crown Lands in payment for lands selected for purchase under the Waste Lands Act.

Persons purchasing or selecting land by virtue of these land orders or certificates must reside for five years in Tasmania before becoming entitled to grants from the Crown of such land ; but in the event of death before the expiration of that term, their heirs-at-law or devisees shall, after five years from the date of the land orders or certificates, be entitled to grants, if, in the opinion of the Commissioner of Crown Lands, permanent improvements to the value of £1 per acre have been made on the land.

The Board of Immigration's agents in England are the Emigrant and Colonists' Aid Corporation, Limited ; C. Dugald Buckler, Esq., secretary, 25 Queen Ann's Gate, Westminster ; to whom all applications for land order warrants, as well as general information about the colony, should be made.

Arrangements have been made with Messrs. Money Wigram and Sons for the conveyance of Bounty Emigrants to Tasmania in their line of steamers, free of all expense to the emigrants from the port of embarkation to Hobart Town or Launceston as may be desired. Messrs. Money Wigram and Sons' agents in London are Messrs. Allport and Morgan, 7 Leadenhall-street, London.

Similar arrangements have also been made for the conveyance of emigrants by the Black Ball and Eagle line of packets and the Liverpool

and Australian Navigation Company; the agents in England being Gibbs, Bright, and Co., James-street, Liverpool; and Thomas Irving and Co., 17 Gracechurch-street, London.

TASMANIAN COUNCIL OF EDUCATION.

Board Room, Public Buildings, Macquarie-street, Hobart Town. Meets on the third Wednesday in every month, at 3 p.m.

Members.—Rev. R. D. Poulett-Harris, M.A. (president), Right Rev. the Bishop of Tasmania, J. W. Agnew, M.D., Morton Allport, Hon. H. Butler, M.H.A., Hon. T. D. Chapman, M.L.C., Rev. Canon Davenport, B.A., His Honour Mr. Justice Dobson, Very Rev. W. J. Dunne, Rev. Canon Hudspeth, M.A., Hon. F. M. Innes, M.H.A., Hon. Sir R. Officer, M.H.A., Rev. W. W. Spicer, William Tarleton, and Hon. James Whyte, M.E.C.

Secretary.—George Richardson.

The Council of Education is authorised by 22 Vict. No. 21 and 35 Vict. No. 16 to hold examinations in imitation of the Oxford and Cambridge annual local examinations, and to confer annually two Tasmanian scholarships and the degree of Associate of Arts.

Tasmanian Scholarships.—Eight scholarships, each of the value of £200 per annum and tenable for four years at a British university, are founded; of which two are annually competed for by male Associates of Arts of above sixteen and under twenty years of age and who have resided in the colony for at least the preceding five years.

A.A. Degree.—This degree is open to persons of any age and of either sex. Candidates above nineteen years of age who take honours are placed in separate class lists, and are not eligible for prizes. Tasmanian law students who have the degree of A.A. are exempted from a literary examination prior to admission to the bar; and in England the General Council of Education and the Royal College of Surgeons accept the degree in lieu of the literary examination required from medical students, provided the Associate has passed in both Latin and Mathematics. Candidates passing in certain subjects, but not qualifying for the degree, are entitled to certificates.

Dry Scholarship.—A scholarship bearing this name is granted each year to the senior Associate of the year, provided he declares his intention to proceed with his studies for the Tasmanian Scholarship. In the event of his declining to do so, the scholarship is awarded to the second student on the list of Associates of the year, and so on.

Exhibitions.—Two exhibitions of £20 each, tenable for four years at such schools as shall be named by the parents or guardians and approved by the Council, are annually bestowed on boys under fourteen years of age who have not during the previous six months been pupils of a Government school, and who have been resident in the colony for two years immediately preceding the 1st of June.

Gilchrist Scholarship.—A scholarship of £100 per annum, tenable for three years either at the University of Edinburgh or at University College, London, is biennially awarded to the candidate who passes highest at the matriculation examination of the University of London carried on at Hobart Town. Candidates must either be natives of Tasmania or have been resident in the colony for five years or over, and

be above 16 and below 22 years of age. The next examination will take place in or about August, 1877, under the supervision of the Council of Education; the papers being sent home for decision.

Matriculation at the Melbourne University.—Local examinations for matriculation at the Melbourne University are held in the July and October terms, under the superintendence of the Council, the papers being sent to Melbourne for decision. Candidates may also be examined in the February term, upon payment of the additional expense.

All regulations must be approved of by the Governor-in-Council and be published in the *Gazette* before they are of any force. The Public Schools Acts, 32 Vict. No. 14 and 37 Vict. No. 11, provide for the appointment yearly of local school boards of not more than nine members, and direct that every child between seven and fourteen years of age, resident within two miles from any public school, must be sent to school, unless the parent or guardian holds a certificate of exemption from the local school board. In the absence of such certificate, any parent or guardian refusing or neglecting to send such child to school may be summoned before two justices, who may order the child to be sent, and may determine what charge, if any, shall be made for it. Any person refusing to obey such order, or ceasing after a time to obey it, is liable to a fine of £2.

Number of schools in operation during 1875, 154; number of distinct children on the rolls during the year, 12,271; average number on rolls, 8,142; average daily attendance, 5,703, or a per centage of 70·02. Total expenditure, £14,598 3s. 1d.; average cost per head of scholars in daily attendance, £2 11s. 2¼d.; average receipts from school fees per head ditto, 16s. 9¾d. The average number of free scholars under instruction was 1603·25; amount paid by the Board for their instruction, £593 16s. 1d.

Exhibitions.—The Board awards annually twelve exhibitions to superior schools of the value of £16 13s. 4d. each,—six to boys tenable for four years from 1st July; and six to girls tenable for one year from 1st July. Candidates must be between ten and twelve years of age, and have attended one of the public schools for at least twelve months prior to 1st June.

Night Schools.—A free grant of books and school requisites is made to night schools, if held in buildings under the control of the Board, and established with its sanction. An average attendance of ten scholars above the age of twelve years is required, and provision is made for the remuneration of the teacher at a weekly rate founded upon the average attendance.

PENAL ESTABLISHMENT, PORT ARTHUR.

A settlement for male convicts under sentence of penal servitude with hard labour. A lunatic asylum is attached to the establishment, together with an invalid hospital and pauper depôt.

Civil Commandant and Medical Officer, John Coverdale, M.D., who is also a coroner and a magistrate for the territory ; Church of England Chaplain and Stipendiary Magistrate, Rev. Rowland Hayward ; Roman Catholic Chaplain, Rev. James Holehan ; Station Officer and Engineer, George Whittington ; Dispenser, G. A. Robinson ; Head Keeper of Insane, Alexander Muirhead ; Clerk and Assistant Storekeeper, J. H. Roberts ; Storekeeper, Postmaster (money order office), and Deputy-Registrar, J. C. Mawle. Master of local school under Board of Education, W. Todd ; mistress, Miss Todd. Master Government schooner, Charles Anderson. Local School Board ; John Coverdale, M.D. Rev. R. Hayward, Rev. J. Holehan, A. Muirhead, G. A. Robinson.

The staff further consists of 1 overseer for the separate prison, 2 overseers for the Penitentiary, 2 under keepers of insane, 10 attendants on insane, 1 senior and 15 petty constables, 4 seamen of schooner, 1 signalman Mount Augustus.

Telegraph communication with Hobart Town is maintained by semaphores, situated at the Settlement, Mount Arthur, Mount Communication, and Mt. Augustus, which last passes messages to Mt. Nelson.

From the 1st January, 1877, there will probably be not less than 70 convicts under detention at Port Arthur, whilst there will be about 120 invalid paupers, and 80 lunatics ; making a total of 270.

Intercourse with the metropolis is kept up by the Government schooner, a vessel of about 40 tons. The passage is generally made in a day, and seldom if ever exceeds two days ; and as a rule the schooner makes a trip weekly. It is necessary that persons wishing to visit the Peninsula, either by schooner or overland, should obtain authority to do so from the Colonial Secretary. The traveller on horseback should cross from Hobart Town to Kangaroo Point by steamer ; thence ride *vid* Cambridge and the Causeway to Sorell ; whence proceed onward through the Carlton district to East Bay Neck, where good accommodation will be found at Scrimger's hotel. The road up to this point, and for some distance beyond it, is tolerably good. Eagle Hawk Neck is now fourteen miles away, and some parts of the road are very rugged. A constable is stationed here, whose duty it is to prevent persons passing from Forestier's on to Tasman's Peninsula without the necessary authority. Port Arthur is twelve miles hence, and the road, after reaching Norfolk Bay, can be traversed by vehicles. The journey through occupies a day and a half, but can be completed in one day in summer time.

COUNTRY DISTRICTS.*

The colony of Tasmania is divided into nineteen rural municipalities and eight police districts. Seven councillors were, in the first instance, elected by the ratepayers of the respective municipalities. Two councillors retire annually on the second Friday in December for two successive years, and every third year three retire ; in each case they are eligible for re-election. The councillors elect one of their number as Warden, whose term of office extends over one year. All powers by law vested in Police Magistrates are by Act of Parliament vested in the Warden while holding office ; and the Governor has the power of appointing the councillors to be justices of the peace within their respective municipalities during the term of office. Provision is thus made for the discharge of all legal business which formerly devolved on paid officers of the central Government.

Every male of the age of 21 years, assessed as owning property of the annual value of £5, or occupying property of the annual value of £10, is entitled to a vote in the election of councillors.

TO FIND THE TONNAGE OF SHIPS.

Multiply the length of the keel, taken within the vessel, or as much as the ship treads upon the ground, by the length of the midship beam, taken also within, from plank to plank; and that product by half the breadth, taken as the depth. Then divide the product by 94, and the quotient will give the tonnage.

The following are the results of a Chemical Examination of a Sample af **GUANO**, from LACEPEDE ISLANDS, near the Australian coast, viz. :

	Per centage.
Phosphates of Calcium and Magnesium (Bone Earth)...	77·45
Calcic Carbonate (Chalk)	0·73
Organic Matter	11·90
Ammonia	1·85
Soluble Salts, Chlorides and Sulphates	1·02
Fine Sand	0·90
Moisture	6·15
	100·00

It will be seen from these results that the sample examined is a fine specimen of the so-called **Phospho-Guano**, resembling that of Maldon Island, but superior to it, containing more Phosphates and much less sandy matter.

ANTIBILIOUS PILLS,

AS PREPARED BY

WEAVER AND CO.,
CHEMISTS.

These Pills, being prepared from pure *Vegetable Extracts*, are free from the objections usually advanced against Proprietary Medicines (on account of their containing *mineral preparations*). TESTIMONIALS.

DEAR SIRS,—I cannot leave the colony without acquainting you that I have for many years derived great benefit from your Antibilious Pills, insomuch that, under Providence, I ascribe the vigorous health and green old age enjoyed by me, at over eighty years of age, to a free use of that INVALUABLE MEDICINE. Indeed the best proof of the estimation in which your ANTIBILIOUS PILLS are held by me is that I have taken FORTY DOZEN of them to England; and I have no hesitation in pronouncing them one of the *best and safest medicines in the world.*

JAS. DUFF MACKAY.

45 Euston-square, London, September 26, 1865.

DEAR SIRS,—Many thanks for your prompt attention to my commission,—the pills come to hand in fine condition. I now request that you will have the goodness *to send me another box containing twenty dozen of the same Antibilious Pills*, per first mail, to my address as above.

WEAVER'S

RE-CARBONATED

FLUID MAGNESIA.

The high estimation in which FLUID MAGNESIA has been held for many years has induced the Proprietors to manufacture the above preparation in a state of great purity and of uniform strength—thus affording the *Medical Practitioner* an opportunity of administering *this safe and effectual Medicine* with confidence, and giving to the public generally a remedy which can at all times be used with safety and success, either alone or in combination with the ACIDULATED RASPBERRY SYRUP. As most of the FLUID MAGNESIA commonly sold is of uncertain strength, and seldom contains the quantity represented, MESSRS. WEAVER & CO. have imported apparatus at a great expense for the purpose of manufacturing FLUID MAGNESIA on a large scale, and with which they can produce a solution of great purity and uniform strength.

During the oppressive heat of summer
WEAVER'S RE-CARBONATED

FLUID MAGNESIA,

Mixed with the proper proportion of the

ACIDULATED RASPBERRY SYRUP,

Instantly produces the most *Refreshing Beverage*, in which the flavor of the *Raspberry* is fully developed, and the degree of cold consequent on the formation of the CITRATE OF MAGNESIA is nearly equal to an *Iced Beverage*

CAUTION.—*The great strength of this FLUID MAGNESIA renders it necessary to cork the Bottles quickly and securely after opening, so as to prevent crystallisation.*
