A SUMMARY OF THE PRINCIPAL ASTRONOMICAL AND METEOROLOGICAL OCCURRENCES FOR THE YEAR 1882.

By F. Abbott, F.R.A.S., etc.

Explanation.—*Sun's Rising and Setting.*—These numbers show the mean time when the Sun's centre, elevated by refraction, appears on the horizon, the eye being on a level with it.

Phases of the Moon.—The times are here given to the nearest second when the Moon is respectively 0deg., 90deg., 180deg., and 270deg. of longitude from the Sun. *Apogee* is the time of her greatest distance from the earth; *Perigee* the time of her nearest approach to it.

Geographical Positions.—The position arrived at for the Magnetic Observatory in 1852 by Commander Kay gave to Fort Mulgrave, east longitude 9h. 49m. 29·6s. Captain Denham, of H.M.S. *Herald*, with 32 chronometers 1856 to 1858, gave 9h. 49m. 28·8s., giving a mean longitude of 9h. 49m. 29·2s. The private Observatory lies on a direct line North and South with Fort Mulgrave, and taken in connection with observations made on the transit of Mercury over the Sun's disc November 5th, 1868, gives a very close result to 9h. 49m. 29·2s., which has been here adopted.

ECLIPSES IN THE YEAR 1882.

In the year 1882 there will be two Eclipses of the Sun, also a Transit of Venus, over the face of the Sun.

First.—A Total Eclipse of the Sun, on the afternoon of May 17, invisible in Tasmania. The central line passes through Africa, Red Sea, Arabia, and China ; as a Partial Eclipse it will be seen in England.

Second.—An Annular Eclipse of the Sun on the morning of November 11th, partially visible in Tasmania. The central line of Eclipse passes through New Guinea, New Caledonia, and the South Pacific. At Hobart rather more than one-third of the Sun's diameter will be obscured. The time for Hobart will be :—

	H.	M.	S.
First contact...	6	54	30 a.m.
Greatest obscuration	7	56	35
Ends	9	12	16

The first contact takes place 32 degrees westerly from the Sun's south point.

A Transit of Venus across the Sun's Disc will take place on the morning of December the 7th, the egress only being visible in Tasmania and the eastern half of Australia, no part of the phenomenon being visible in the west.

The sun rises at 4h. 23m. 35s., with the planet near its contact at egress, which takes place 5h. 30m. 35s.

No Transit of Venus, across the Sun's Disc, will again occur until the year 2004.

This table exhibits half the time that a celestial object continues above the horizon when the declination and latitude are of the same name, or below when they are of contrary names; whence, by adding or subtracting from its meridian-passage, the apparent time of its rising and setting for this latitude may be computed.

None of the Planets are visible till the Sun is a certain number of degrees below the horizon, viz.:

Mercury	10°	Jupiter	8° 00′
Venus	5°	Saturn	10° 00′
Mars	11° 30′	Herschell	17° 30′

WEATHER TABLE.

The following table, constructed by the ingenious Dr. Kirwan, upon philosophical considerations of the attraction of the sun and moon in their several positions respecting the earth, is submitted to notice, under the recommendation of actual observation in this colony, further confirmed by several years' experience in the Northern Hemisphere. It is not pretended to be infallible ; but it comes so near the truth that in very few instances indeed will it be found to fail of furnishing the observer with the knowledge of what kind of weather there is the greatest probability of succeeding in any given quarter of the moon.

Quarter of the Moon.	*Summer.*	*Winter.*
If the Moon enters either of her quarters at 12 noon ...	The weather will be Very rainy	The weather will be Snow and rain
If between the hours of		
12 and 2 p.m.	Changeable	Changeable
2 ,, 4 ,, ...	Ditto	Fair and mild
4 ,, 6 ,, ...	Fair	Fair
6 ,, 8 ,, ...	Fair if wind N.N.W. or N.E., rainy if wind W., S.W., or S.	Fair if wind N.N.W. or N.E. rainy if wind W., S.W., or S.
8 ,, 10 ,, ...	Ditto	Ditto
10 ,, 12 night	Fair	Fair
12 ,, 2 a.m.	Ditto	Fair and frosty
2 ,, 4 ,, ...	Cold and showery	Rain
4 ,, 6 ,, ...	Rain	Ditto
6 ,, 8 ,, ...	Squally	Stormy weather
8 ,, 10 ,, ...	Changeable	Changeable
10 ,, 12 noon	Showery and windy	Cold and rain.

MOONLIGHT NIGHTS.

Moon's Age.	Winter.	Summer.
1st to 3rd day	From dark until 7 p.m....	Almost invisible
3rd to 8th day	From dark until 12 night	From dark until 12 night
8th to 12th day.....	From dark until 4 a.m....	From dark until daylight
12th to 16th day.....	From 7 p.m. till daylight	From 7 p.m. till daylight
16th to 23rd day	From 9 p.m. till daylight	From 9 p.m. till daylight
23rd to 29th day.....	From 1 a.m. till daylight	From 1 a.m. till daylight

In connection with the above Table, it should be remembered that the new moon passes the meridian and rises and sets nearly at the same time as the sun ; and as she advances in her orbit eastward about 12½ degrees daily, so she rises and sets about 49 minutes daily later than the sun. At new moon, therefore, she rises and sets with the sun ; 7½ days after, when she is 90 degrees in advance of the sun, her time of rising will be about noon ; at full moon, when she has advanced 180 degrees, she will rise at about six ; and at waning, she will rise in her last quarter at about 12.

GARDENERS' CALENDAR.—*Fruit Garden.*—Where budding is required it may still be performed, choosing, if possible, showery weather. Cut off all surplus shoots from young trees, if they are not required for scions in the Spring. Continue to pinch off all lateral shoots from vines. *Flower Garden.*—Choice carnations may be increased by cuttings and layers with shade and moisture. Choice flowers should be marked for seed. Annuals that have done flowering should be removed, or some will become troublesome weeds. *Kitchen Garden.*—Plant celery in trenches, and a succession of French beans; sow turnips when the weather is moist; take up early potatoes that are ripe; gather all kinds of seeds as they ripen; cut from strawberries all runners that are not wanted for plants, to give strength to the roots. *Greenhouse.*—Calceolarias, cinerarias, etc., may still be sown. Geraniums that have done flowering should be cut down; re-pot as soon as they begin to make fresh shoots. Cuttings struck now will make good plants next year, with care. Continue to shade and water as directed last month.

JANUARY 6.—Called *Twelfth Day*, as being that number after Christmas, and *Epiphany* from a Greek word signifying "appearance." It is a festival of the church in commemoration of the manifestation of Christ to the Gentiles,—more expressly to the three magi or wise men of the East who came, led by a star, to worship him immediately after his birth. The Queen, through the Lord Chamberlain, annually on this day presents gold, frankincense, and myrrh at the Chapel Royal.

GARDENERS' CALENDAR.—*Fruit Garden.*—Little is required this month besides attending to the buds. Strawberry runners should be kept moist to form robust plants in time for transplanting in the first Autumn rains. *Flower Garden.*—Cut off all flower stalks as soon as done flowering, except those required for seed. The flowering season is prolonged by cutting off surplus seed as soon as formed. Verbenas, pentstemons, petunias, and other herbaceous perennial plants may now be propagated by cuttings. Encourage asters, chrysanthemums, dahlias, etc., by frequent watering. Use the rake to preserve a neat appearance. *Kitchen Garden.*—In showery weather vegetables may be sown to come in during the Winter. Mark out plants of the cabbage tribe to run to seed. Earth up peas and potatoes; hoe and stir the surface among all descriptions of crops. *Greenhouse.*—As the principal displays of this season are over, turn your attention to preparation for the next by propagating by seed and cuttings, and preserving such old plants as are desirable for another year. This is the time for forming plants of the early flowers, too frequently neglected by amateurs until the flowering season. Sow mignonette for Winter flowering.

SHROVETIDE (Feb. 21) derives its title from the practice of being *shriven* or *shrove*—that is, confessing and receiving absolution—before the Lenten fast.

ASH WEDNESDAY (Feb. 22).—So called on account of penitents wearing sackcloth next their skin and sprinkling ashes on their heads.

ST. PATRICK (Mar. 17).—The shamrock is said to be worn by the Irish upon the anniversary of this their tutelar saint for the following reason :—When he preached the Gospel to the pagan Irish, he illustrated the doctrine of the Trinity by showing them a trefoil, or three-leaved grass, with one stalk ; which operating to their conviction, the shamrock, which is a bundle of this grass, was ever afterwards worn upon this saint's anniversary, to commemorate the event.

GARDENERS' CALENDAR.—*Fruit Garden.*—Planting of vines and fruit trees may be commenced towards the end of the month; in the meantime keep the ground well worked in dry weather, and dig between the old trees as soon as the leaves have fallen. Keep the surface of the ground loose between the rows of newly planted strawberries, and dig between the rows of the old ones. *Flower Garden.*—Plant bulbs of nearly all the hardy species in dry weather; dig and manure borders between shrubs and herbaceous plants, and form new ones where required, leaving the ground rough. Carnations, etc., that have been propagated during the Summer may now be formed into beds; and shrubs, roses, etc., may be planted towards the end of the month. Examine the haunts of slugs, as every one destroyed now will save considerable trouble and annoyance in the Spring. *Kitchen Garden.*—Continue to sow and plant a succession of vegetables, salading, etc.; dig and manure all spare ground in dry weather. Dress asparagus beds for the Winter. *Greenhouse.*—Cuttings of geraniums that have struck root should be potted into small pots, to be shifted into larger as they advance in growth. The same rule applies to cinerarias, calceolarias, etc.; give air freely during fine weather, and water moderately during damp or wet weather. Gloxinias, achimenes, and other bulbous plants that have done flowering, should be allowed to dry off; primulas and cyclamens that are coming into bloom should be kept near the glass and watered freely.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be proceeded with in dry weather, taking care to leave the surface of the ground loose after the operation. The general pruning of fruit trees, vines, etc., may be commenced towards the end of the month, especially of such as are in a weak state of growth. Root-prune where necessary. All the ground should now be dug up roughly, burying the leaves and what manure can be afforded. *Flower Garden.*—Now is the time for putting in order all flower borders, shrubberies, etc., by pruning the shrubs and roses, trimming the edges, dividing and regulating the herbaceous plants, digging the borders and thereby creating a neat appearance during the Winter months, and obviating the necessity for digging amongst the roots of plants in the Spring; it likewise breaks into the favourite haunts of the slugs, whereby they are more easily found and destroyed; where new borders are to be formed and planted, it should now be done. *Kitchen Garden.*—Plant out cabbage, cauliflower, and lettuce. Sow peas, broad beans, and carrots for early use. Sow spinach and onions. Make plantations of rhubarb and asparagus. *Greenhouse.*—Little can be done in the greenhouse beyond giving plenty of air on all favourable occasions, guarding against night frost, watering when the earth becomes dry, and keeping the plants free from vermin and dead leaves. Keep all growing plants as near the glass as possible.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be completed this month; should it not be convenient to do so, the trees intended to be planted next month, or later, should now be lifted and laid in by the heels, which will keep them back, always choosing dry weather for the operation; stir the ground around those planted previous to heavy rains as soon as it is dry enough for the purpose. All pruning should be finished this month. *Flower Garden.*—Continue the general directions for last month, and complete the planting of deciduous trees and shrubs. Keep the ground between bulbs free from weeds. *Kitchen Garden.*—Plant early potatoes, etc., in a warm dry border. Early peas and beans may be sown once a fortnight or three weeks from this time. Sow the main crops of onions and carrots, also some radishes, lettuces, spinach, and early cabbage. Propagate plants which are increased by rooted off-sets. Transplant for seed, if not done in Autumn, carrots, turnips, beet, celery, parsnips, etc. *Greenhouse.*—Continue the general directions for last month. Fuchsias that have shed their leaves should now be prepared for the following season by cutting back and re-potting them. Geraniums that are growing tall and thin should have the ends of the shoots pinched off, which will make them more bushy and compact. Re-pot cinerarias and calceolarias as soon as the present pots are filled with roots. This rule applies to growing plants generally.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vine cuttings may be planted. Prepare for grafting : the proper time is as soon as the stocks are well started. Raspberry and strawberry borders may still be prepared, and new ones formed. Look carefully over apple trees, and dress the parts affected by *aphis* or American blight. Manure freely vines and fruit trees that are weakly. *Flower Garden.*—Flower beds should be manured and dug ; edgings formed, trimmed, and repaired ; herbaceous plants divided ; biennials planted. Roses may be pruned, and most sorts increased by cuttings. Seeds of hardy annuals may be sown in the borders ; tender ones on a moderate heat for transplanting. Choice dahlias should be placed in a gentle heat, for the purpose of propagating by cuttings. Verbenas, shrubby calceolarias, pentstemons, etc., may be increased by the same means. *Kitchen Garden.*—Earth up, plant, and sow asparagus ; transplant, hoe, and sow cabbage ; sow and plant as directed last month, and at end of month sow French beans in a warm border and vegetable marrows in sheltered places ; plant out and sow lettuces for succession ; sow and earth up peas. *Greenhouse.*—Admit air freely in fine weather ; re-pot geraniums, cinerarias, calceolarias, etc., as the roots advance to the sides of the pot. Fuchsias that have been dormant should have their roots reduced and be re-potted in fresh soil. Cacti and other plants may be watered more freely than in the depth of Winter. Sow seeds of balsams, cockscombs, egg plants, etc., on a gentle heat ; keep all plants clear of *aphis*, scale, etc.

GARDENERS' CALENDAR.—*Fruit Garden.*—The principal work this month is grafting, the chief aim being to bring the bark of the stock and the scion to fit closely; loosen the ground with a hoe after the operation; the same between vines and fruit trees in general; in dry weather mulch raspberries. *Flower Garden.*—Seeds of annuals, biennials, perennials, and shrubs should now be sown; tender ones raised in heat may be transplanted towards the end of the month. Dahlia roots may be planted: propagate choice varieties as recommended last month; take the cuttings out of heat as soon as they have struck root, and protect them from the frost till it is safe to plant them. Lay shrubs that are difficult of propagation by other means. Keep the hoe at work in dry weather, but do not use the rake, except for covering small seeds. *Kitchen Garden.*—Asparagus beds, keep free from weeds. Transplant cabbage, onions, and lettuce. Sow carrots, red beet, celery, turnips, French beans, spinach, radishes, vegetable marrow, scarlet runners. Plant potatoes, sow peas, and earth up those that are ready. Cucumbers may be sown in ridges. Keep the hoe among the crops, it will assist them in their growth. *Greenhouse.*—Follow the directions for last month. The plants in flower will require watering copiously and shading from the mid-day sun.

GARDENERS' CALENDAR.—*Fruit Garden.*—Look over the vines and rub off all superfluous buds. Disbud wall trees. Destroy caterpillars on fruit trees. Keep the surface of the ground loose with the hoe at all convenient seasons, whether there are weeds or not. Place a layer of fresh stable manure between the rows of strawberries: it will increase the size of the fruit and render it free from grit or sand. *Flower Garden.*—Seeds of annuals may still be sown. Tender species raised under shelter may be transplanted into the borders, choosing showery weather for the operation. Dahlias from seed and cuttings, and other tender plants, may be planted about the middle of the month. Mark the flowers of choice bulbs, etc., with the view of collecting their seed. Stake and tie the shoots of herbaceous and other plants as they advance. Where quality rather than quantity is the object, the number of flowering shoots should be reduced. Destroy slugs, *aphis*, scale, bugs, etc. *Kitchen Garden.*—Continue to sow and plant successional crops. Earth up potatoes and peas, sow all kinds of brocoli, Scotch kale, savoys, cauliflowers, tomatoes, and capsicums. Thin early sown carrots, turnips, and spinach, and keep them free from weeds. *Greenhouse.*—Azaleas, camellias, ericas, etc., that have done flowering should be taken out of the house and placed in a shady situation towards the end of the month. Water sparingly the bulbs of achimenes, gloxinia, gesnera, etc., until they appear above the ground. Re-pot all fast-growing plants as often as the pots fill with roots. Use the syringe in evening during sunny weather; guano or manure-water occasionally will assist flowering plants whose pots are full of roots.

GARDENERS' CALENDAR.—*Fruit Garden.*—Stop all shoots of vines, except the leaders, at one joint beyond the fruit, and lay them to their trellis or supports; pinch off all unnecessary shoots in young fruit trees. Vines, newly planted fruit trees, etc., will be much benefited by a mulching of half-decomposed stable manure. Rub off the shoots from stocks that have been grafted, and remove the clay and binding as soon as they have joined, which may be known by their shooting vigorously; lay as many strawberry runners as may be required for new plantations, and remove all others. *Flower Garden.*—The planting of dahlias and trimming of all annuals, if not done, should be immediately; support all tall growing flowers as they advance; keep the surface of the ground loose with the hoe; clip and trim all edgings except roses; mark choice flowers for seed. *Kitchen Garden.*—Thin and hoe red beet, carrots, and all other Spring crops. Plant out capsicums and tomatoes. Prick out celery in small beds from the seed beds. Earth up peas, French beans, and potatoes. A succession of peas and French beans may be sown. *Greenhouse.*—Sow seeds of primula, cineraria, calceolaria, camellia, geranium, etc. Give plenty of air and water and shade during sunny weather.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vines not yet attended to should be done immediately, and as the lateral shoots appear they should be taken off to within one joint of the main shoots. Young apple or plum trees infested with red spider should be frequently syringed with tobacco water or soft soap well diluted. Brush off American blight as it appears on the young shoots of apple trees. Peaches, etc., on walls will now require frequent attention. Budding may be performed towards the end of the month. *Flower Garden.*—Dahlias, hollyhocks, etc., require frequent attention. Where fine show dahlias are required, one stem alone should be allowed to grow, and the lower lateral shoots removed from that, and the number of flower buds reduced; a liberal mulching will greatly promote their growth during the approaching hot weather. Bulbs of choice hyacinths, tulips, ranunculuses, anemones, etc., should be taken up and stored as they become dormant. Neatness is now the order. *Kitchen Garden.*—Earth up French beans, peas, and scarlet runners; a succession may be planted; prepare trenches and plant celery; transplant all kinds of brocoli, cauliflowers, savoys, and cabbage for winter use; tomatoes and capsicums, if not put out, should now be done; vegetable marrows may yet be sown: sow turnips this month, and earth up late potatoes. *Greenhouse.*—Cinerarias, calceolarias, etc., that are intended to be kept for another season, should be removed into a shady situation as soon as they have done flowering. Fuchsias, geraniums, etc., that are flowering may be watered occasionally with liquid manure. Shade and water freely during hot weather.

IMMIGRATION DEPARTMENT.

Commissioners — The Colonial Secretary (President), the Colonial Treasurer, the Hon. Henry Butler, M.H.A., the Hon. F. M. Innes, M.L.C., and the Hon. P. O. Fysh. Secretary and Immigration Agent, Hobart, B. Travers Solly. Immigration Agent, Launceston, George Smith.

Offices—Public Buildings, Hobart and Launceston.

The following are the regulations for the guidance of persons desirous of introducing immigrants from the United Kingdom under the bounty system :

Application, stating sex, age and class of immigrants, must be made on printed forms, which will be supplied by the Immigration Agents, the Wardens of Municipalities, or the Police Magistrates.

For a ticket for a single person above 60 years of age £16 must be paid, and in the case of families, if either of the parents is over 60 years of age, the applicant must deposit £20. Documentary evidence of the age of any immigrant must be produced upon his or her arrival, if required by the Immigration Agent.

If any immigrant be found on arrival not to answer to the description stated in the application, the applicant will be liable to be called upon for payment of any money which may have been paid from the public funds on account of such immigrant.

The immigrant must sign an engagement (for self and family) agreeing not to leave the colony within four years after arrival without paying one of the Immigration Agents one-fourth of the passage money for every year short of the four years, and a proportionate sum for every part of the year.

Persons introducing immigrants under these regulations must provide for their reception on arrival ; or if received into a Government establishment a charge of two shillings a day or part of a day will be made against the introducer.

Payments Required from Applicants.—Family ticket, including man, wife, and the children under 12 years of age, £15 ; single man, £10 ; single woman, £5. Children of 12 years and upwards considered as adults.

Land Orders.—Under the Immigration Acts, 1867 and 1874, immigration agents may be appointed abroad, who shall issue to approved emigrants proceeding to Tasmania at their own expense land order warrants entitling the holders, on arrival in the colony, to a land order in respect of each person named therein. Such land orders to be of the nominal value of £18 for each immigrant of and over fifteen years of age, and £9 for each child under fifteen and over one year, and to be available to their full value in payment for land purchased under the Waste Lands Act.

Any cabin or intermediate passenger (excepting persons who have been resident for one year or upwards in any Australian Colony or New Zealand) arriving with the intention of settling in the colony, and who has not received a land order under the previous section may at any time within twelve months after his arrival obtain from the Board of Immigration a Certificate entitling him to select 30 acres of land ; if married he shall be entitled, within twelve months after the arrival of his family, to further Certificates authorising the selection of 20

acres in respect of his wife, and 10 acres in respect of each child. Selections to be made within a year after the date of the Certificates. These Certificates to be received by the Commissioner of Crown Lands in payment for lands selected for purchase under the Waste Lands Act. Persons purchasing or selecting land by virtue of these Land Orders or Certificates, or some of the members of their families, must reside for five years in Tasmania, counting from the date of such Land Order or Certificate, before becoming entitled to Grants from the Crown of such land; but in the event of death before the expiration of that term, their heirs at law or devisees shall, after five years from the date of the Land Orders or Certificates, be entitled to grants, if, in the opinion of the Commissioner of Crown Lands, permanent improvements to the value of £1 per acre have been made on the land.

Post Cards having a penny stamp printed or impressed by the Postmaster-General will be transmitted between places in Tasmania, and if bearing an additional penny stamp, to the other Australasian Colonies, under the following conditions:—There must be nothing written, printed, or otherwise impressed on the front side thereof, except the address; on the reverse side any communication, whether of the nature of a letter or otherwise, must be written or printed; the card must not be folded, cut, or altered. Should a post card bear upon it anything of an obscene, libellous, or obviously objectionable nature, it will be detained and forwarded to the Secretary. When owing to a great and unusual influx of letters, etc., the transmission or delivery of letters would be delayed if the whole mail were dealt with without distinction, post cards may be kept back until next despatch or delivery.

Soldiers' and Sailors' Letters.—Letters not exceeding half an ounce to and from non-commissioned officers, private soldiers, seamen, or marines in Her Majesty's service, one penny.

Registered Letters must bear stamps to the value of fourpence as the registration fee, in addition to the ordinary postage. Unregistered letters containing money or valuables are registered by the postmaster before transmission, the fee being charged upon delivery. The registering office is open from 10 a.m. till 4 p.m., except on English mail days at Hobart, when it is closed at 3 p.m.

Late Letters for inland and ship mails are charged a uniform fee of 2d. each. This regulation applies also to loose letters sent to and from Victoria or New South Wales in the ship's box or bag, the deficiency in

default being charged at the destination of such letters. *Late Newspapers* 1d. each. On English mail days at Hobart (when the ship reception boxes are closed at 5 p.m. sharp), letters for the United Kingdom and Victoria only may be posted until 6 p.m., at a fee of 6d. each.

Savings Bank or Building Society Packets.—Money or deposit books or documents referring thereto may be forwarded to or from Savings Banks and Building Societies in parcels not exceeding 4oz. in weight at a charge of one penny only for each packet, if bearing the endorsement "Savings Bank (or Building Society, as the case may be) Packet only" and the signature of the sender. Postmasters are bound to register these packets without fee.

Ship and Inland Packets must be in covers open at the ends or sides, and parcels of seed or samples of merchandise in bags or papers tied so as to be easily loosened and refastened. They must bear on the outside a statement of their contents and the name and address of the sender; and must not contain any letter or epistolary communication. Packets exceeding 16 ounces in weight or of inconvenient form or size may be refused; and the transmission of any exceeding eight ounces may be delayed for any time not longer than a week, unless for England. Packets are allowed to contain any of the following articles:—Affidavits, almanacs, accounts current connected with fire, life, and marine assurance, books printed or plain, catalogues, conveyances, deeds, engravings, friendly societies' reports, judgments, *bonâ fide* intended for registration according to law, letters of attorney, magazines, maps, music, music paper, notes, cheques, orders, or pass books sent by or to any bank or banker, paintings, pamphlets, patterns, or samples of merchandise, periodical publications, photographs, placards, plans, policies of assurance, proposals for assurance, prices current, printed circulars, printed papers of every description, proceedings of any court of justice, printers' proofs, reviews, seeds, share scrip, specifications, Tasmanian Government debentures, Tasmanian treasury bills, wills, writing paper, writs. NOTE.—Sample or pattern packets must not contain any article having a value apart from its use as such. Any article of dress is not deemed a sample.

Insufficiently stamped letters and packets for New South Wales and Victoria can only be forwarded when bearing postage of at least, one single rate. Stamps must be affixed above the address or the letter may be treated as unstamped.

TASMANIAN COUNCIL OF EDUCATION.

Board Room, Public Buildings, Macquarie-street, Hobart. Meets on the third Wednesday in every month, at 3 p.m.

Members—Hon. H. Butler, M.H.A. (President); The Lord Bishop of Tasmania; Hon. T. D. Chapman, M.L.C.; Rev. George Clarke; the Venerable Archdeacon Davenport, B.A.; His Honor Mr. Justice Dobson; Very Rev. W. J. Dunne; Hon. W. R. Giblin, M.H.A.; James Grant; Rev. R. D. Poulett-Harris, M.A.; Hon. F. M. Innes, M.L.C.; William Tarleton; Thomas Stephens, M.A.; Hon. James Whyte, M.E.C.; Russell Young.

Secretary—George Richardson.

The Council of Education is authorised by 22 Vict. No. 21 and 35 Vict. No. 16 to hold examinations in imitation of the Oxford and Cambridge annual local examinations, and to confer annually two Tasmanian scholarships and the degree of Associate of Arts.

Tasmanian Scholarships.—Eight scholarships, each of the value of £200 per annum, and tenable for four years at a British university, are founded; of which two are annually competed for by male Associates of Arts of above sixteen and under twenty years of age and who have resided in the colony for at least the preceding five years.

A. A. Degree.—This degree is open to persons of any age and of either sex. Candidates above nineteen years of age who take honours are placed in separate class lists, and are not eligible for prizes. Tasmanian law students, who have the degree of A.A., are exempted from a literary examination prior to admission to the bar; and in England the General Council of Education, and the Royal College of Surgeons accept the degree in lieu of the literary examination required from medical students, provided the Associate has passed in both Latin and Mathematics. Candidates passing in certain subjects, but not qualifying for the degree, are entitled to certificates.

Minor Scholarships for A.A.—Two scholarships of the annual value of £40 each tenable for two years, are awarded to the Senior Associates of the year, who express their intention of studying and competing for the Tasmanian Scholarship.

Dry Scholarship.—A scholarship bearing this name is granted each year to the Senior Associate of the year, provided he declares his intention to proceed with his studies for the Tasmanian Scholarship. In the event of his declining to do so, the scholarship is awarded to the second student on the list of Associates of the year, and so on.

Exhibitions.—Five exhibitions of £20 each, tenable for four years at such schools as shall be named by the parents or guardians, and approved by the Council, are annually bestowed on boys or girls under fourteen years of age, who have not during the previous six months been pupils of a Government school, and who have been resident in the colony for two years immediately preceding the 1st June.

Gilchrist Scholarship.—A scholarship of £100 per annum, tenable for three years either at the University of Edinburgh, or at University College, London, is biennally awarded to the candidate who passes highest at the matriculation examination of the University of London carried on at Hobart. Candidates must either be natives of Tasmania, or have been resident in the colony for five years or over, and be above 16 and below 22 years of age. The next examination will take place in or about August, 1883, under the supervision of the Council of Education ; the papers being sent home for decision.

London University.—The sanction of the authorities of the London University has been obtained to the holding of Local Examinations in Hobart, under the supervision of the Council of Education, for Matriculation and for Degrees in the Faculty of Arts in connection with that University.

Matriculation at the Melbourne University.—Local examinations for matriculation at the Melbourne University are held in the July and October terms, under the superintendence of the Council, the papers being sent to Melbourne for decision. Candidates may also be examined at the February term, upon *payment* of additional *expense.*

Local Examinations in connection with the Sydney University are also held.

BOARD OF EDUCATION.

Board Room, Public Buildings. Meets at 3 p.m. on the 4th Wednesday in each month.

Members—Hon. Henry Butler, M.H.A. (Chairman), James Grant, H. Hunter, Hon. F. M. Innes, M.L.C., W. Tarleton, Hon. James Whyte and S. P. H. Wright.

Chief Inspector of Schools, Thomas Stephens, M.A., Oxon. Inspector of Schools, James Rule. Third Inspector of Schools, ————.

Secretary, George Richardson. Clerks, Edward Rowland Roe, Henry Wedge Calder, Frank W. Butler, and Ronald D. Burgess. Architect, Henry Hunter.

The Board of Education is empowered to frame regulations for the distribution of all moneys granted by the Legislature for the purposes of education; to determine the *locale* of public schools; to regulate the course of instruction in the schools, the examination and classification of teachers, the issue of certificates of competency to teachers, the inspection of schools, and the functions and duties of local school boards, and to fix the maximum fees to be charged by teachers. All regulations must be approved of by the Governor-in-Council, and be published in the *Gazette* before they are of any force. The Public Schools Acts 32 Vict. No. 14, and 37 Vict. No. 11, provide for the appointment yearly of local school boards of not more than nine members, and direct that every child between seven and fourteen years of age, resident within two miles from any public school, must be sent to school, unless the parent or guardian holds a certificate of exemption from the local school board. In the absence of such certificate, any parent or guardian refusing or neglecting to send such child to school may be summoned before two justices, who may order the child to be sent, and may determine what charge, if any, shall be made for it. Any person refusing to obey such order, or ceasing after a time to obey it, is liable to a fine of £2.

Number of schools in operation during 1880, 171; number of distinct children on the rolls during the year, 12,286; average number on rolls, 8,352; average daily attendance, 6,002. Total expenditure, £16,518 12s. 2d.; average cost per head of scholars in daily attendance, £2 15s. 0½d.; average receipts from school fees per head, ditto, £1 0s. 10d. The average number of free scholars under instruction was 1232·75; amount paid by the Board for their instruction, £459 14s. 7d.

Exhibitions.—The Board awards annually twelve exhibitions to

superior schools, of the value of £16 13s. 4d. each—six to boys and six to girls—tenable for four years from 1st July. Candidates must be between ten and twelve years of age, and have attended one of the public schools for at least twelve months prior to 1st June.

Night Schools.—A free grant of books and school requisites is made to night schools, if held in buildings under the control of the Board, and established with its sanction. An average attendance of ten scholars above the age of twelve years is required, and provision is made for the remuneration of the teacher at a weekly rate founded upon the average attendance.

RULES FOR DISTINGUISHING THE SALMON.

The following summary drawn up by the late Mr. Morton Allport from a work by Dr. Günther, of the British Museum, will be of service to many fishermen in enabling them to test the species of any fish that may be captured by them during the salmon season:—To distinguish the salmon (*salmo salar*) from its congeners, trout (*salmo fario*) and salmon trout (*salmo trutta*):—1. Colour alone is no test. 2. The presence of teeth on the vomer (that is, along a line in the middle of the roof of the mouth from the mouth backwards), after the fish had once been to sea, proves that it is no salmon. 3. The absence of such teeth does not always prove that it is a salmon, as undoubted trout from brackish water (especially the females) lose the vomerine teeth with age. 4. The number of scales between the back of the adipose fin (the small fleshy fin on the back nearest to the tail) and the lateral line, counting obliquely forwards, is in the salmon always less than 14; in salmon trout or trout 14, or more than 14. 5. The number of pyloric appendages (long fatty cœca attached to the alimentary canal) in trout ranges from 30 to 45, in salmon trout from 40 to 55; in salmon from 50 to 70.

NEW METHOD OF PRESERVING FRUIT.

For which the Medal of the Royal Horticul. Socy. (Eng.), was awarded.

The Banksian Medal was awarded by the Council to Mr. Lovejoy, butler to J. Thorne, Esq., of Mowbray House, South Lambert, for the following bottled fruits, preserved without sugar or vinegar, namely damsons, greengages, plums, gooseberries, rhubarb, cherries, black and red currants, raspberries, and mulberries, which cannot fail of interesting the fair and thrifty wives of our readers. The means by which these important desiderata may be accomplished are as follows, in Mr. Lovejoy's own words:—"Pick the fruit from the stalks; put them into the bottles. Put one drachm of alum into four gallons of boiling water; let it stand till it is cold. Then fill the bottles and bung them. tight; put them into a copper of cold water, and heat it to 176 degrees, Then tie them over with bladder, and seal them." The raspberries and mulberries preserved in this manner were as plump and transparent as when first gather. The other fruit was equally fine.

The calculations in this table give the average time when high water may be

expected at Launceston, but the tides are so influenced by winds and other causes that the actual times of high-water will sometimes differ from the calculated ones by an hour or two.

High-water at the various sub-ports on the North Coast may be averaged as an hour and a half earlier than at Launceston.

It is high-water new and full moon at Launceston at 1h. 30m. p.m., and at George Town 11h. 45m. a.m The tide in the Tamar flows nearly six hours and ebbs nearly seven hours, and rises from ten to twelve feet in settled weather.

COUNTRY DISTRICTS

The colony of Tasmania is divided into nineteen rural municipalities and eleven police districts. Seven councillors were, in the first instance, elected by the ratepayers of the respective municipalities. Two councillors retire annually on the second Friday in December for two successive years, and every third year three retire; in each case they are

eligible for re-election. The councillors elect one of their number as Warden, whose term of office extends over one year. All powers by law vested in Police Magistrates are by Act of Parliament vested in the Warden while holding office, who is an *ex officio* Justice of the Peace for the Territory, while he holds the office of Warden ; and the Governor has the power of appointing the councillors to be justices of the peace within their respective municipalities during the term of office. Provision is thus made for the discharge of all legal business which formerly devolved on paid officers of the central Government.

Every male of the age of 21 years, assessed as owning property of the annual value of £5, or occupying property of the annual value of £10, is entitled to a vote in the election of Councillors.

Scale of Votes.—£5 and under £40, in case of owner, 1 vote ; £10 and under £40, in case of occupier, 1 vote ; £40 to £80, 2 votes ; £80 to £120, 3 votes ; £120 to £160, 4 votes ; £160 to £200 ; 5 votes ; £200 to £240, 6 votes ; £240 to £280, 7 votes ; £280 to £320, 8 votes ; £320 to £360, 9 votes ; £360 and upwards, 10 votes.

Remarks.—This municipality is almost entirely an agricultural district, and comprises a large area of the best land in the colony. The system of farming has of late years vastly improved, and the sheep and cattle kept are of superior quality. The district is celebrated for its long-woolled sheep. Game, in the shape of hare, quail, snipe, with deer and kangaroo, is tolerably plentiful. The Meander River which flows through the district, affords good trout fishing; and the sportsman will find comfortable quarters at any of the hotels in the district.

TO FIND THE TONNAGE OF SHIPS.

Multiply the length of the keel, taken within the vessel, or as much as the ship treads upon the ground, by the length of the midship beam, taken also within, from plank to plank; and that product by half the breadth, taken as the depth. Then divide the product by 94, and the quotient will give the tonnage.

THE SOLID CONTENTS OF SQUARE TIMBER

Are found by measuring the mean breadth by the mean thickness, and the product again by the length; or multiply the square of what is called the quarter girth in inches by the length in feet, and divide by 144, and you have the contents in feet.

Boughs, the quarter girth of which is less than 6 inches, and parts of the trunk less than 2 feet in circumference are not reckoned as timber.

1½ inch in every foot of quarter girth, or one eighth of the girth is allowed for bark, except of elm. One inch in circumference of the tree, or whole girth, or one-twelfth of the quarter girth is the general fair average allowance.

The quarter girth is half the sum of the breadth and depth in middle.

The nearest approach to truth in the measuring of timber is to multiply the square of one-fifth of the girth, or circumference, by double the length, and the product will be the contents.

RULE—For any other distance, multiply the distances into each other (as 9 by 9), and with the product divide 43,560 (the number of square feet in an acre), and the quotient is the number of plants; thus:—35 times 35 are 1,225; and 43,560 divided by 1,225, shows 35, exclusive of fractions not sufficient for another.

INDICATIONS OF WEATHER.

The most reliable symptoms of *fine weather* are a gradually rising barometer, a grey morning sky, a red sunset, a light blue mid-day sky, and dew at any time.

A steadily falling barometer, a red sunrise, a pale yellow sky, low soft-looking dingy clouds, unusual distinctness of the landscape, much twinkling of the stars, and low flight of birds, indicate *rain.*

Sudden changes of the barometer, a bright yellow sunset, with rosy tints in the East, rapidly driving scud, and a deep blue sky, foretell *wind* and *stormy* weather.

SECRETARY'S OFFICE—CHARLES-STREET, LAUNCESTON.

LAUNCESTON EQUITABLE BUILDING SOCIETY.

[ESTABLISHED JANUARY, 1870.]

INCORPORATED UNDER "THE BUILDING SOCIETIES' ACT, 1876."

Shares, £50 each. Entrance Fee, 2s. 6d. per share. Monthly subscriptions, 3s., 5s. 6d., 9s., and 13s. 8d., on shares to realise in 15, 10, 7, and 5 years respectively, payable during office hours, or between the hours of 7·30 and 8·30 p.m. on the second Wednesday in each month.

THIS Society was formed to combine the advantages of the Terminating and Permanent Societies.

Borrowers' liability limited to amount, and for the term they have contracted to pay. Borrowers for the term of five years and upwards participate in Surplus Profits.

Surplus Profits are the profits in excess of the amount necessary to realise £50 per share in the periods specified; they are applied in bonuses to members and formation of Reserve Fund. On 1st January last, aggregate bonuses declared amounted to £4,345, and Reserve Fund £1,324.

Loans advanced from 1 to 15 years. Monthly repayments per £100 —if for 3 years, £3 4s.; 5 years, £2 1s. 4d.; 7 years, £1 12s.; 10 years, £1 4s. 6d.; 12 years, £1 2s. 4d.; 14 years, £1 0s. 6d.: 15 years, 19s. 6d. Quarterly repayments are three times the above. Special arrangements made with Country Members for *half-yearly or yearly repayments.*

Paid-up Shares are issued from 5 to 21 years. By a present payment, a Share is issued whioh secures to the member or his legal representatives £50, with bonus additions, at expiration of time for which taken. Thus a five-years' Share can be obtained for £36 8s. 6d.; an eleven-years' one for £25; and a twenty-one years' one for £13 6s. 6d.: and for the intermediate years in proportion. Endowments for Children can, by means of those Shares, be provided at less cost than through any Insurance office, and in case the shares are withdrawn before the expiration of the period for which taken, the purchase money is returned with compound Interest for the time expired, at the rate of 5 per cent. per annum to the end of third year, and 6 per cent. for each subsequent year.

Deposits received, and interest paid thereon half-yearly. If repayable at three months' notice, 5 per cent. per annum; one month's notice, 4 per cent. per annum.

The number of members, 924; number of shares held by them, 3,413; and the annual share income £23,142.

Persons who borrow from this Society for any period from five years and upwards will, by reason of the bonus addition, pay a lower rate of interest than the money could elsewhere be procured for, besides having the advantage of repaying loan by periodical instalments.

The Society's Office adjoins the Savings Bank in Patterson-street, and is open daily from 9·30 to 4. There all further information required can be obtained on personal, or by written application to

WADDELL'S ANODYNE

FOR

TOOTHACHE

WADDELL'S ANODYNE FOR TOOTHACHE.

It gives almost instant relief in every case of common Toothache. When applied to the aching tooth two or three times, it completely repels the nerve, so that the tooth may be preserved and used with freedom from pain. It is also a valuable preventive where the teeth are much decayed or disposed to ache from exposure to cold, by constantly wearing a portion of wool or lint saturated with the preparation in the hollow of the affected tooth. Should the pain arise from Neuralgia, Waddell's Neuralgic Lotion will be found an effectual remedy. If the pain arises from an Abscess, nothing but abstraction will relieve.

The above preparations were used and largely prescribed by the late Mr. WADDELL in his hospital and private practice, both in England and on the Continent, with great success, and are entirely free from all those injurious qualities which are often contained in all other alleged remedies

When all the shares are taken up the distribution will be under the supervision of a Committee, and the result will be published in the principal Journals of Tasmania and the adjoining colonies.
