THE PALL MALL PLATES.

EXTRA-RAPID.

RAPID PORTRAIT.

RAPID LANDSCAPE.

THE EXTRA-RAPID PLATES combine the minimum of exposure with the maximum of intensity, and are suitable for all kinds of work where extreme sensitiveness is required. The special advantage of these Plates is, that EVERY BATCH IS OF PRECISELY THE SAME RAPIDITY, and can always be strictly guaranteed as such.

THE RAPID PORTRAIT, it is hoped, supply a want common to Photographers, viz., that of RELIABLE plates, rapid enough for all ordinary studio work, at a moderate cost.

THE RAPID LANDSCAPE (somewhat slower plates) give results which, for richness of detail, roundness of image, and fineness of grain, are not surpassed by those obtained in the days of wet collodion.

FOR SIMPLICITY, CLEANLINESS, RAPIDITY, AND ARTISTIC QUALITIES,

USE THE PLATINOTYPE PROCESS

FOR PERMANENT PRINTING.

“THE AMATEUR PHOTOGRAPHER” states, November 14, 1884 :—“The process may be briefly put in a few words—rapidity, cleanliness, permanency, artistic results. Amateurs will find the working of this process an interesting and most satisfactory occupation. It is especially suited for ladies. A process especially worthy of the Amateur's attention.”
