ADDRESS.

In the present issue of the Bristol Directory considerable additions have been made in every Department of the Work. In the General List alone, the usual proportion of erasures have been outnumbered by the insertion of many hundred additional names. The Goods Conveyance Directory has undergone a thorough revision—a process demanding a large expenditure of care and time—and numerous changes and additions will be noted by those in the habit of consulting that part of the work. Upon those sections of the Directory which record the changes transpiring in connection with corporate and other bodies, obliging supervision has been bestowed by various gentlemen holding official connection with those organizations.

In stating that the Directory exceeds, by many pages, any previous issue of the work, and without any advance in the price, it may be proper to add that the pains-taking and scrutinizing revision which every part has undergone, has operated in delaying the publication to a somewhat later period than would otherwise have been the case.

BENEVOLENT INSTITUTIONS

OF

THE CITY OF BRISTOL.

Bristol has long stood at the head of all other cities for the number, magnitude, and diversity of its benevolent institutions. By their operations, almost every description of existing evils among the industrious classes is met and remedied:—the sick are visited, the destitute stranger, as well as the impoverished citizen, are relieved, and instruction is provided, both for the adult and juvenile population. Besides the incomes of the endowed institutions, it is estimated that £50,000 a-year is raised by voluntary contributions to various objects.

At a MEETING of the MAYOR, ALDERMEN, and BURGESSES of the CITY of BRISTOL, in Council assembled, at the COUNCIL HOUSE, in the said City, on MONDAY, the First day of Jan. 1849.

Whereas in and by a certain Act of Parliament, passed in the Sixth year of the reign of his late Majesty King George the Fourth, instituted "An Act to enable the Mayor, Burgesses, and Commonality of the City of Bristol, to reduce, alter, modify, and regulate certain Dues called 'Town Dues,' and 'Mayor's Dues,' and for the charging and collecting thereof," it was (amongst other things) enacted, that from and after the passing of the said Act, the Tolls, Duties, or sums of money therein mentioned, called the Town Dues, should cease and be no longer payable; but that in lieu thereof the several Tolls, Duties, and sums of money set fourth in the schedule A, thereunto annexed, as for and in lieu of the said Town Dues, except as therein mentioned should be, and the same were thereby declared to be henceforth payable to the said Mayor, Burgesses, and Commonality. And it was by the said Act further enacted, That it should be lawful for the said Mayor, etc., in Council assembled, from time to time, as and when they might see fit, to reduce, alter, modify, and regulate, and also to raise and increase the rate of the several Tolls, Duties, etc., set forth in the Schedule, or any or either of them, so that the Rate of the said Tolls, Duties, or sums of money, or any or either of them, should not be raised or increased beyond the Rate set forth in the said Schedule.

Now the said Mayor, Aldermen, etc. acting by the Council of the City of Bristol, in pursuance of the power vested in them by the said recited Act, do reduce, alter, modify, and regulate the Rate of the Tolls, Duties, or sums of money, according to the Schedule hereunder written; such reduction and regulation to take effect and commence on and from the Twenty-second day of July, 1849.

The Everlasting Clock,
ONE SHILLING.

The Improved Patents of Preece & Co., Class 15, International Exhibition, No. 3234.

"A considerable saving in time." "Shilling Clocks."—*See Punch, June* 21, 1862.

Protected by Royal Letters Patent in the Kingdoms of Great Britain, Prussia, France, Holland, Belgium, and the States of America.

PRICES.

1s., 1s. 6d., 2s., 3s., 4s., 5s., 6s., 6s. 6d., 8s. 6d., 10s., 12. 6d.

THE SILENT NIGHT LAMP CLOCK from 18s. 6d.

Every genuine Clock is labelled inside, "PREECE & Co., Patentees," at one end, and "380 Oxford Street, London, W.," at the other.

The Advantages of these Clocks are Numerous.

1st. They keep accurate time, and are noiseless.

2nd. They are not affected by temperature, steam, dust, or water, and are used in some of the largest Manufactories, Gas works, Mills, Steamers, Hospitals, etc., etc.

3rd. They can be hung up where no other kind of clock will hang, in or out of doors, engine rooms, hot-houses, etc., etc.

4th. Their surprising cheapness—"*One Shilling and upwards,*"—brings them within the reach of all, and every room of an ordinary dwelling-house can be furnished with one of these Noiseless and Everlasting Clocks at a less cost than that of a single common Dutch one.

DIRECTIONS FOR SETTING.

As this Clock tells the time by the descent of a column of Mercury, it is necessary—should this become separated—to shake it gently till all the particles are re-united at either end of the glass tube, which end must then be hung uppermost, setting the bottom of the Mercury even with the time at which you are starting it, which is done by simply sliding the tube up or down through the holders, when the Mercury will begin to ascend gradually, indicating the time according to the dial on the margin to the right hand.

PREECE & CO., 380 Oxford Street, London.

Agent for Clifton, J. CURRY, Boyce's Lodge.

Agent for Bristol, W. MATHEWS, 9, Narrow Wine Street.

ANOTHER STEP IN PHOTOGRAPHY.

PHOTOGRAPHS ON IVORY.

MR. VINES begs to announce that the difficulties which have so long perplexed the Photographic Chemist of printing permanent Photographs on Ivory are completely overcome, and that, *by a New Process*, (the EXCLUSIVE use of which he has purchased for Clifton, Bristol. and the Neighbourhood, Photographic *Miniatures on Ivory*, remarkable for purity of tone and delicacy of finish, may now be procured at the Institution. This new process is admirably adapted for portraits of Ladies and Children, the surface of ivory being unequalled for receiving that rich mellow tone of colouring, life-like complexion, delicacy, transparency, and beauty of finish which distinguish the very highest class of Miniature Painting.

Photographic Portraits, Views, Copies of Paintings, &c.,

are supplied of all sizes, finished in Oils, Crayons, Water Colours, or in Light and Shade, by English, French, and German Artists, of first class ability, some of whom may be seen, as usual, at the Institution.

Invalids may be taken at their own Residences ; and correct likenesses taken of Persons deceased. Instructions given in the various branches of Photography, aud apparatus supplied, tested, and approved, with special reference to the requirements of the Pupil.

RICHARD TANNER

Has the honour of announcing that he has brought to the acme of perfection his justly celebrated PLATINA ALLOY PEN—universally admired and appreciated for resisting all rust and corrosion—obviating the necessity of effacing the ink therefrom—combining flexibility, capacity, and durability in a pre-eminent degree; adapting itself to the various characters and degrees of pressure suitable to the desire of the writer; imparting confidence, firmness, and freedom in performance; directing the fluid to flow in an infallibly uninterrupted gradual stream to the point; possessing an exclusive character for delicate smoothness in writing, without harshness, or lacerating the paper; expediting the hand in gliding rapidly and pleasantly across the paper; and annihilating the fatigue and torment which accrue from Quill, Steel, Iron, Brass, Copper, and Tin Pens.

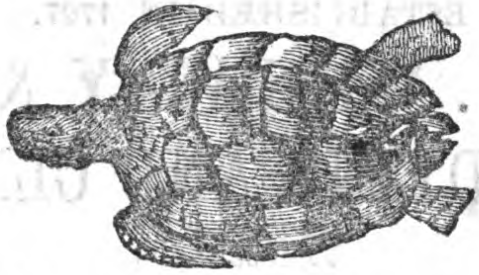

This extraordinary, unique, springy-even-anti-fricton-elastic instrument adorns the science with beauty, dignity, and grandeur; it mitigates the ennui which accrue from the quill and ferruginous kinds; its springs are re-acting; its delightfully pleasing inimitable flexibility and refined placidity in epistolography, enable our friends (with eclat) to lubricate expeditiously and delectably across the recipient—exhibiting to ocular demonstration a magnificent explication of the *fine style* tachygraphy, so as to obtain universal admiration.

N.B.—Four Gross are sent CARRIAGE FREE, and let this be remembered we do not make any charge whatever for the unique Mahogany Lock-Cabinet, in which the Four Gross are adaptably enclosed. Sufficient suitable Holders for the above are presented gratis also.

MESSRS. R. & S. respectfully invite the attention of Invalids and the Faculty to their valuable and reliable **IMPERIAL**

German Seltzer Water.

It is universally acknowledged that although the German natural Waters are productive of much good in Germany, they fail of their purpose when imported into England. The reason has been discovered by the researches of Hoffman, Dr. Bucklesbury and others, viz., that these Waters are more liable to be spoiled by keeping than any other waters, and that *they seldom or never reach England in anything like good condition.* Dr. Bucklesby found, as the result of many experiments that they did not depend for their efficacy so much upon their salts, as upon the combination of those salts with fixed air. This combination they lose when imported.

It appearing to Messrs. R. & S. that the experiments thus instituted with the water had solved the problem of their failure in England, they devoted themselves to the study of how a Mineral Water could be produced which should contain, in the exact quantity and proportion, the exact salts of the Royal Seltzer Spa *in combination with an equal or greater quantity of that elastic air* upon which its active virtues depend. They have the satisfaction of announcing that some years of experiment have resulted in complete success and that they now Manufacture a Water, which is to the full extent as MEDICINALLY EFFICACIOUS as, and much more pleasant than, Seltzer Water drunk from the natural Spring.

Copy of Certificates.

Bristol Laboratory, Jan. 28th, 1856.

Messrs. Roughsedge and Summers.

Gentlemen,—I have made comparative analyses of your Seltzer Water, and of that of the Royal Seltzer Spa, Germany, and find them to be as nearly as possible of the same composition, and consequently I have no doubt of their having equal and similar medicinal properties.

I am, Gentlemen, yours Respectfully,

WILLIAM HERAPATH, SEN., F.C.S., C.M.E.S.

Manchester, Dec. 20th, 1855.

I hereby certify that I have tested your Effervescent Seltzer Water, and I find it fully equal in quality to the best German Seltzer Water, while its effervescent properties render it much more agreeable to the palate.

IS NOW THE

LARGEST MUTUAL LIFE OFFICE IN THE WORLD

HEAD OFFICE, 9 ST. ANDREW SQUARE, EDINBURGH.

The Members of the Scottish Widows' Fund Life Assurance Society enjoy all the advantages of Life Assurance under the most favourable conditions. The Business is of great magnitude (see "Table of Statistics" below), **and of the most select character. The Funds, now amounting to THREE MILLIONS EIGHT HUNDRED THOUSAND POUNDS, are invested only in First Class Securities** (see "Resources of the Society," page 3); **and the Profits, not being subject to the payment of Dividends to Shareholders, as in Proprietary Companies, but being divisible among the Assured alone, have yielded Bonuses of unusually large amount** (see Table of "Bonus Additions Declared," page 3).

The Success of the Society.

THERE is no instance in the history of Life Assurance in which progress has been more rapid or success more solid. Established in 1815, without the aid of Shareholders' capital, when Life Assurance was all but unknown in Scotland, the operations of the Society have attained a magnitude and wide-spread usefulness which the original founders could scarcely have anticipated. The remarkable success which has attended the Society ever since it was founded is exhibited in the following Table.

Days of Grace.

THIRTY DAYS of Grace are allowed for payment of Premiums, but Policies may be revived within THIRTEEN MONTHS of the Premium becoming due. *If the Member does not wish to renew the Policy, a sum equal to the Surrender Value thereof, on the last day of Grace, will be paid to him.*

Surrender Values payable on Demand.

The practice of the Scottish Widows' Fund is to pay the Cash Value of a Policy when the Member shall choose to discontinue it. The following are

EXAMPLES OF SURRENDER VALUES OF POLICIES OF £1000, OF THE PARTICIPATING CLASS. *Age at entry being* 30.

Duration of Policy.	Premiums paid.	Surrender Value.	Per Centage of Surrender Value on Premiums paid.
One Year	£25 17 6	£8 0 10	31 per cent.
Ten Years	258 15 0	160 12 10	62 per cent.
Twenty Years	517 10 0	390 15 11	75 per cent.
Thirty Years.....	776 5 0	699 10 0	90 per cent.
Forty Years	1035 0 0	1071 19 0	104 per cent.
Forty-five years ..	1164 7 6	1435 9 0	123 per cent.

Thus a Scottish Widows' Fund Policy, besides securing an Assurance in the event of the Member's death, has the special advantage of being, during life, **AS CONVERTIBLE AS A BANK NOTE** *to the extent of its value.*

Security presented by the Society.

The only satisfactory evidence that a Life Office affords complete security for the fulfilment of its engagements is a correct Statement, containing its "Assets," shewing the manner of their investment on the one hand, and the "Liabilities," with the Table of Mortality and Rate of Interest by which they have been valued, on the other. With the view of affording exact information as to the nature and extent of the security presented by the Scottish Widows' Fund, the following statement of Assets and Liabilities as at 31st December 1859, when last valuation took place, is given :—

Assets.—Money invested in First Class Securities . . .	£3,518,230
Liabilities.—Value by the Carlisle 3 per cent Tables* . .	2,756,216
Profit, being Excess of Assets	£762,014
Which Surplus was disposed of thus :—	
1. Sum set aside to meet the Bonus then declared . .	574,355
2. Free Balance or "Guarantee Fund" retained . .	£187,659

* *The entire "Loading" or per centage on future premiums, applicable to future Expenses, Contingencies, and Profits (value £738,155), was, as usual, left untouched.*

It only remains to be explained that the following increase in the general Resources of the Society has taken place since December 1859 :—

The Realized Fund, which was then £3,518,230, **is now** .	**£3,800,000**
The Annual Revenue, which was then £412,767, **is now** .	**£440,000**

(See "Resources of the Society," page 3.)

Method of Ascertaining the Comparative Values of Policies in Different Life Offices.

The conditions under which a Policy in one office may be held to be of greater value than a Policy in another office are substantially these—(1.) That the *sum receivable in the event of death*, including additions from Profits, shall be larger in proportion to the premiums payable in the one office than in the other (see "Bonus Additions Declared," page 3). (2.) That the *sum which may be withdrawn during life* as "Surrender Value" in the event of the Assurance having to be discontinued, shall be larger for the premiums payable in the one office than in the other (see "Surrender Values payable on Demand," page 3). (3.) That the *Security afforded for the fulfilment of all engagements* is better in the one office than in the other (see "Security presented by the Society," above). Information on these points is essential where parties desire to acquaint themselves with the relative merits of Life Offices with the view of effecting Assurances. They are shortly explained in this Prospectus at the places referred to; and are more fully treated in the Society's book Prospectus.
