LONDON:

J. HOWITT, NOTTINGHAM.

1840.

PRINTED BY J. HOWITT, CLUMBER STREET, NOTTINGHAM.

P R E F A C E.

IN presenting the first volume of the "Annual Register of Nottingham," it may be justly demanded, what are the principles it contains, and the objects it seeks to promote; to the former we reply, Commercial and Historical, but not Sectarian or Political; to the latter, a book of reference, particularly adapted to the requirements of professional or trading gentlemen, who may reside in, or are in the habit of visiting the town.

The following is the plan: it will be divided into two parts, first *general*, second *local*.

1st. *General*. This will contain an enlarged Almanack, with Sunday lessons, length of days, and other matter, not found in any but the best London Almanacks. Besides this, there will be a review of the markets, and the entire trade and commerce of the Empire. A Chronicle of the Sessions of Parliament, and remarkable events of the year in the kingdom and the world.

2nd. *Local*. This department will embrace a comprehensive but succinct history of the town and county for the past year, under the following particulars. 1st. A Record of benevolent, charitable, and religious contributions, specifying the name, place, and object of each; 2nd. Statistics of education, specifying the number of scholars under tuition so far as the same can be ascertained

in the town, and through the county at large. 3rd. Statistics of Crime. 4th. Average price of Food. 5th. Mechanical inventions and list of patents sealed on behalf of persons resident in the town and county. 6th. State of Trade. 7th. Remarkable events of the year, and 8th, an enlarged and corrected Directory.

The favours of advertising friends are particularly requested to this medium, that the object proposed may be effected, as the present price will not be advanced, though it is so inadequate to the expense of publication. For the matter presented this year, the reader is respectfully referred to the contents of the volume, which we hope will prove both useful and interesting. Faults have been found with the errors of other Directories, and may, no doubt, justly be found with this; but when it is recollected, that six years have elapsed since the last Directory of Nottingham was published, so great have been the changes, that scarcely one house of trade in twenty is in every respect the same as it was at that time. The whole, therefore, has necessarily been re-constructed, and it was almost impossible to secure perfect accuracy the first time.

The premises must be occupied for twelve calendar months, and the voter have resided for six months before the last day of July, in the borough, or within seven miles. He must have been rated for the poor during such twelve months, and must have paid the rates due to the 6th of April preceding on or before 20th of July. If persons otherwise qualified are not rated, a claim may be made upon the overseers to put their names on the rate; and thereupon, and on payment or tender of the rates, they are to be deemed rated from the date of the then existing rate. Should they be again omitted in the next rate, the claim must be repeated.

REGISTRATION.

COUNTIES.

By sec. 37 the overseers are required, on the 20th of June, to give notice to persons entitled to vote to send in their claims, according to a form in schedule H—see it, in the *Companion to the British Almanac* for 1833, p. 144—but after the formation of the register, no person shall be required thereafter to make any claim while he retains the same qualification and remains in the same abode.

By sec. 39, every person registered, or who has so claimed, may object to any other person as not entitled on the last day of July preceding; but he must give notice on or before the 25th August, according to schedule H, or to the like effect (see *Companion* for 1833, *supra*, p. 145), to the overseers, and also give to the person objected to, or leave at his abode, a notice, according to schedule H, or to the like effect.

Notice.—Each person, upon sending in his claim, is to pay 1s. (sec 56). The form in the notice is the preferable one to be adopted; but any notice in writing, sufficiently descriptive of the property and abode of the party claiming, to enable the overseers to make out their list, will satisfy the statute.

CITIES AND BOROUGHES.

Persons omitted are to give notice on or before 25th of August to the overseers, according to the form No. 4, schedule I. (see *Companion* for 1833, p. 145), or to the like effect; and persons registered may object to others, as not entitled on the last day of July, preceding, giving notice as before.—[See sec. 47.]

CHRONICLE OF THE SESSION OF PARLIAMENT.

[2 and 3 Victoria, 1839.]

Feb. 5. PARLIAMENT was opened by the Queen in person.

(LORDS.) The address was moved by the Earl of Lovelace and seconded by Lord Vernon. After a speech from Lord Brougham, the address was agreed to.

(COMMONS.) The address was moved by Mr. Edward Buller, and seconded by Mr. G. W. Wood.

Feb. 11. (LORDS.) Viscount Melbourne presented to the House various papers on the subject of Canada, including Lord Durham's Report.

(COMMONS.) A discussion took place on the subject of the Corn Laws, particularly with respect to Mr. Villier's notice, that evidence should be heard at the bar of the House. The same evening Lord Palmerston explained the chief provisions of the treaty concluded with Austria and Turkey.

Feb. 12. (LORDS.) Lord Brougham called the attention of their Lordships to what he conceived to be the impropriety of Dr.

Lushington, a judge of the Admiralty Court, sitting in the House of Commons.

(Commons.) The chief business of the day was Lord John Russell's statement of the intention of government with respect to education. It had resolved, he said, to constitute a Board of Education, to consist of five privy counsellors, over whom the President of the Council would preside. No salary was to be given; the members of the Board would be such individuals only as held other offices to which salaries were attached. This Board would have the distribution of the money annually voted by Parliament (30,000*l.* was to be asked for this year), and its first efforts were to be directed to the establishment of Normal schools. Infant schools were also to be established.

15. Lord Mahon moved "that in the trial of controverted elections, the objects of justice, uniformity, and dispatch would be best attained by a tribunal not consisting of members of Parliament." The motion was rejected by 177 to 63.

18. (Lords.) After the presentation of a great number of petitions in favour of and against the repeal of the Corn Laws. Lord Brougham earnestly entreated their lordships to allow evidence as to the injurious effects of those laws to be heard at the bar of the House. The motion was opposed by Viscount Melbourne and other lords, and ultimately negatived without a division.

22. (Lords.) The State of the Navy was discussed at considerable length.

25. (Commons.) The Factories Bill was read a second time, its object being to give greater security and protection to the children employed in factories, and to prevent various frauds which had been used to defeat the operation of the existing law.

28. (Commons.) Mr. O'Connell moved for leave to bring in a bill "to assimilate the franchise of Parliamentary electors in England, Wales, and Ireland, and to render the same more extensive." Negatived by 155 to 92.

March 7. (Commons.) Mr. Villiers moved "that the House resolve itself into a Committee of the whole House, to take into consideration the Act regulating the importation of Foreign Corn." The motion was defeated by 342 to 195.

14. (Lords.) Earl Fitzwilliam moved "that the Corn Act had failed to secure that steadiness in the price of grain which is essential to the best interests of the country." Negatived by 224 to 20.

19. (Commons.) Mr. Hume moved for leave to bring in a bill to extend the elective suffrage to all householders and rate-payers. Negatived by 85 to 50.

April 9. (Commons.) Mr. Labouchere obtained leave to bring in a bill "to make temporary provision for the government of Jamaica," during a proposed suspension of its constitution for five years.

15. (Commons.) Lord John Russell moved "that it is the

opinion of this House that it is expedient to persevere in those principles which have guided the Executive Government of Ireland of late years, and which tended to the effectual administration of the law, and the general improvement of that part of the United Kingdom." The object of this resolution was of course to counteract the effect of that passed by the Lords on the 19th of March. The debate continued five days, when Lord John Russell's resolution was carried by 318 to 296.

23. (Commons.) On the motion of Mr. Harvey, a standing order of the House was adopted, to the effect that in all bills for the enclosure of waste or common lands, space should be set apart for the exercise and recreation of the people.

26. (Commons.) Sir Robert Peel's Bill for the trial of election petitions was considered in committee.

29. (Commons.) In Committee on the Prisons Regulation Bill, Lord John Russell said he should propose a grant of money for the erection of a model prison.

May 1. (Commons.) Mr. Serjeant Talfourd having proposed that the House should go into committee on the Copyright Bill, Mr. Warburton and other members, on the ground that it ought to be considered in a full House, proposed its adjournment. Neither party would yield, and no less than twenty divisions took place on the motion; ultimately the clauses objected to were postponed, and the others passed.

3. (Commons.) The Speaker, Mr. Abercromby, announced his intention of retiring from the chair of the House after the Whitsuntide recess.

6. (Commons.) Discussion on Jamaica Bill resumed on the motion for going into committee, which Sir Robert Peel, Mr. Goulburn, Lord Stanley, Messrs. Hume and Grote opposed, considering the bill to interfere unnecessarily with the constitution of Jamaica, and that further time should be granted to the House of Assembly. Lord John Russell, Mr. O'Connell, and Sir S. Lushington, looked upon the measure as indispensable to the safety and the well-being of the enfranchised black population. The motion was carried by 294 to 289, leaving only a majority of 5. In consequence of this vote—

7. (Lords.) Viscount Melbourne said he not only considered the success of the measure was out of the question, but that Government itself did not appear to possess the confidence of a great proportion of the members of the House of Commons; the Ministry had, therefore, resigned.

(Commons.) A similar announcement was made by Lord John Russell.

13. (Commons.) Sir Robert Peel addressed the House on the subject of the events of the preceding week. He said that he had been sent for to the Queen, when her Majesty stated, that "in all respects her late Ministers had entirely given her satisfaction; but that it became necessary, in consequence of their resignation, that her Majesty should take steps for the formation of

a new Administration;" and therefore inquired whether he was willing to undertake the duty. He had answered in the affirmative, and immediately addressed himself to the necessary arrangements. On proposing to consult with her Majesty on the subject of the principal appointments held by ladies in the household, her Majesty had informed him that it was her pleasure to reserve those appointments in her own hands, conceiving the course proposed "to be contrary to usage," whilst it was certainly "repugnant to her feelings." The right hon. baronet, on his part, considering he had a strict right over those appointments, and that its exercise was indispensable, in order that her "Majesty's confidential servants might have the advantage of a public demonstration" of her Majesty's "full support and confidence," had in consequence resigned the trust committed to his charge. Lord John Russell defended her Majesty's objection to Sir Robert Peel's proposition, as being "contrary to usage," and stated that, on the right hon. baronet's resignation, her Majesty had sent for him, and inquired whether, in his opinion, she was justified in what she had done; he had replied that he thought her Majesty was justified: upon this her Majesty had requested the support of him and his colleagues. A cabinet council had been accordingly held, at which it was agreed, "That for the purpose of giving to the Administration that character of efficiency and stability, and those marks of the constitutional support of the Crown, which are required to enable it to act usefully to the public service, it is reasonable that the great officers of the Court, and situations in the household, held by Members of Parliament, should be included in the political arrangements made in a change of the Administration; but they (the Ministers) are not of opinion that a similar principle should be applied or extended to the offices held by ladies in her Majesty's household."

14. (LORDS.) Communications of a precisely similar character were made by Viscount Melbourne and the Duke of Wellington. House adjourned to the 27th instant.

15. (COMMONS.) Mr. Abercromby resigned the Speakership, and took his leave of the House in a short address. House adjourned to the 27th instant.

27. (COMMONS.) Mr. Hindley proposed Mr. Shaw Lefevre as Speaker; Mr. Wynn proposed Mr. Goulburn. The former was chosen by 317 to 299.

May 30. (COMMONS.) Mr. Labouchere obtained leave to bring in a bill to "provide for the enactment of certain laws in the island of Jamaica," as a substitute for the measure on which Ministers had resigned.

June 3. (LORDS.) Lord Brougham moved, and the Duke of Wellington seconded, the second reading of a bill to amend the beer-law, its chief object being to repeal the clause enabling beer-sellers to sell beer to be drunk on the premises. Motion affirmed and bill referred to a committee.

June 11. (LORDS.) A conversation took place on the subject

of the circulars issued to the lords lieutenants of counties, for the encouragement of armed associations to repress the disturbances than prevailing in many parts-

14. (COMMONS.) Lord John Russell moved that the House resolve itself into a committee of supply, in order that he might propose a vote of £30,000, for educational purposes. Lord Stanley moved, as an amendment, that her Majesty be pleased to revoke the order in council appointing a committee of education. After a long debate the question was adjourned until the 19th.—Mr. T. Attwood, the same day, presented a petition signed by 1,280,000 persons, who, he said, demanded universal suffrage, annual parliaments, vote by ballot, the abolition of property qualifications, and the payment of members. [The petition, it is said, was a cylinder of parchment, about the diameter of a coach-wheel, and was literally rolled into the House.]

18. (COMMONS.) Mr. Grote brought forward his annual motion in favour of the ballot. The motion was negatived by 333 to 216.

27. (COMMONS.) Mr. Gibson's bill to prevent electors from being deprived of their votes by mere removal, passed the third reading.

6. (COMMONS.) Mr. Spring Rice, in making his financial statement, moved "to reduce the postage charged on letters to one uniform rate of one penny, charged upon every letter of a weight to be hereafter fixed by law; Parliamentary privileges of franking to be abolished, and official franking strictly regulated: the House pledging itself at the same time to make good any deficiency of revenue which may be occasioned by such alteration of the rates of the existing duties." Resolution agreed to; Sir Robert Peel, however, reserving the right of future opposition, as he did not approve of the concluding pledge.

10. The Metropolitan Police Bill passed through the Committee.

12. (LORDS.) The House, on the motion of Lord Brougham, by 41 to 34, passed the following resolution; "With a view to the improvement and happiness of the people, and the good order of the community, it is expedient, as speedily as possible, to place all the beer-houses on the same footing as the houses of licensed victuallers, in all respects whatever."

(COMMONS.) Mr. T. Attwood moved for a Committee to consider the "National Petition," presented on the 14th June. Negatived by 235 to 46.

15. (Commons.) The City of London Police Bill passed the House with a clause, that excited some discussion, to prevent the Commissioners sitting in Parliament.

16. (Lords.) The Birmingham riots formed the subject of conversation. The Duke of Wellington said he had been in many towns taken by storm, but never had such outrages occurred in them, as were committed in Birmingham in one night.

17. (Commons.) Lord John Russell detailed the circumstances connected with the riots at Birmingham.

20. (Commons) Mr. Darby moved an instruction to the committee on the Poor Law Continuance Bill, to authorize Boards of Guardians to allow out-door relief to labourers married before the passing of the law, In spite of Lord John Russell's opposition, this was carried by 69 to 46. This resolution was, however, rescinded a few days after.

22. (Commons.) Lord John Russell announced the intention of Government to increase the army by 5,000 men.

24. (Commons.) Lord John Russell brought in a bill "for the establishment of County and District Constables by authority of Justices of the Peace for England and Wales." It was not intended to make the measure universal or imperative, but to authorize magistrates to establish them where necessary.

26. (Lords.) The Lower Canada Government Bill passed the committee, after some discussion.

29. (Commons.) The Penny Postage Bill passed this day.

**R. J. FITZPATRICK,**

**SURGEON, ACCOUCHEUR, &c.**

---

*Through the very urgent request of a number of Patients, who have been cured by R. J. FITZPATRICK, of the above diseases, (in the most lamentable state) without the use of the Knife, Caustic application, or hinderance from business; thus accedes to their most pressing request, and though perfectly aware of the prejudice existing in the minds of strangers against persons thus advertising, R. J. F. takes this opportunity to state, that, such is the distressing nature of the complaints which he attends, that, were it not for his method, afflicted persons would hardly know where to have effected a sound and perfect cure; as delicacy (he has found from experience) has led many to endure the greatest sufferings, rather than expose themselves even to their relatives and friends.*

*R. J. F. begs leave to add, as a doubt is sometimes entertained of the authenticity of cases, when extraordinary cures have been performed, he has therefore subjoined a few out of the many he has had the happiness to effect, and which would afford him the highest gratification to have strictly investigated by others of the Faculty as well as by other afflicted individuals; therefore, through the urgent request of patients, prompted by gratitude, and feelings of commiseration for their fellow sufferers, he has come forward Publicly to announce the following cures:—*

Mr. Hickling, Fancy Frame-work Knitter, bottom of Barker gate, Nottingham, had laboured for several years, under that loathsome disease called Fistula, had four, with as many enormous Piles, and having tried every nostrum recommended by the Faculty, at last submitted to be Cut by an eminent Surgeon, who gave him no relief, but extra punishment: he therefore considered himself a lost man, when by accident hearing of Mr. F's. superior mode of cure, without knife or caustic, immediately placed himself under his care, and to his unspeakable joy, is as sound as ever he was in his life.

Nottingham, Sept. 10, 1838.

Mr. Fitzpatrick,

Sir—As the wonderful cure performed upon me for Fistula draws forth my unbounded gratitude, I hope you will take every method possible to make my case known to the Public.—I was

cut by a Surgeon at an enormous expense, which only increased my misery: when, receiving intelligence of your skill, I placed myself under your mode of treatment, and in the short space of one month was made a perfect cure of, and

Sir, I beg to be your humble Servant, **DAVID FOX**,  
Waggoner for John Smith, Mansfield Road, Nottingham.

Dear Sir—It is now two years since I placed myself under your care, for the cure of Fistula; having been several years in the Royal Artillery, on the Island of Bermuda; and when on duty I received a severe misfortune from a hurricane which ultimately terminated in Six Fistula. I was sent home to the Depot, and cut twice by some of our best Surgeons, but that only prolonged my sufferings; being at length discharged, unfit for service, and returning home, called at Nottingham to see some relations, and hearing of your cures, I applied, and you attended me, I now state with gratitude that I am as sound as ever in my life.—Mr. Hague, Painter, St. James' Street, can certify the same.

**J. HICKLING**, Loughborough.

Mr. Husband, Lace Maker, Hickman's row, New Basford cured of Ticdolereux.

**I. Wittle**, cured of five large piles and two Fistula in Five weeks. A very bad case. Inquire at No. 22, Pleasant Row, Hyson Green.

Fistula. Having been afflicted with this dreadful disease for many years, during which period, I placed myself at different times under various Surgeons, and was cut, receiving no relief, my case became daily worse, I had nearly given up all hopes of a cure, when fortunately hearing of your skill, I determined to place myself under your care, to obtain some mitigation of my sufferings; when to my great satisfaction after only five weeks attendance without confinement, I have the happiness to acknowledge myself perfectly cured.

**R. DAWKINS**, Holland's Close, Hyson Green.

Sept. 1838.

Sir—Your valuable mode of curing Fistula, ought to be made known to the public, and I request you to publish the wonderful cure you have made upon me in the short space of one month, and with gratitude I remain your obedient servant,

**J. TIPPIN**, Victualler, Stapleford.

**J. Arnold**, Lace Maker, Holland's Close, Hyson Green, cured of two Strictures of eight years standing.

**J. Burton**, Arnold, cured of six Fistulæ: bad case. Apply at the Horse and Jockey, Arnold, where Mr. Burton may be seen.

**Mr. Waring**, Cabinet Maker, at Messrs. Stoney and Clark's, Nottingham, cured of two Fistula in one month,

Brooksbanks, Frame-work Knitter, Sussex Street, Leen Side, Nottingham, cured of Fistulæ in three dressings

Mr. Horatio Spencer, Gotham, cured of Fistula, 14 years standing.

May, 1839.

Mr. John Waithman, Fishmonger, Nottingham, cured of Fistula, a very bad case, he had been a dreadful sufferer, having tried many of the Faculty without receiving any benefit; he is now perfectly cured.

June, 1838.

Mr. Joseph Smyth, Nottingham, cured of Fistula, under which he laboured many years; inquire of Mr. Stephenson, Fishmonger, Nottingham.

May, 1839.

Mr. Farrow, Bricklayer, Haywood street, New Snenton, has been cured of Fistula, in the short space of six weeks, he had the best advice from others of the Faculty without avail, and is now perfectly sound.

December, 1839.

John Hardy, Framework knitter, Hucknall Torkard, requests his case to be made known to the public, for the good of his fellow sufferers; for many years he had been afflicted with Fistula and Piles, had been an out patient of Nottingham General Hospital for months, without receiving any benefit, was reduced to a mere skeleton, when some of his kind neighbours subscribed means to place him under R. J. Fitzpatrick, and was perfectly cured in four weeks.

September, 1839.

Mr. Hawksley, Hair Dresser, Mansfield Road, Nottingham, cured of three Fistulæ, most earnestly desires his case to be made public.

December, 1839.

Mr. Reade, Junr. Lenton, Lace Maker, was nearly reduced to consumption from a deplorable case of Fistula: he now returns his sincere thanks for the happy cure performed upon him by R. J. Fitzpatrick. Personal application made to his Father, the Lenton Postman will be attended to.

October, 1839.

R. J. Fitzpatrick, from his extensive practise pertaining to the Eye, professes to cure all diseases (except Cataract) without the use of the Knife. The most unexceptionable references can be given.

Hundreds of wonderful cures might be annexed; such as Rheumatism, Gout, Cancer, Eyes, &c. &c. &c., too numerous to mention, on application their address may be had.

To be brief, R. J. F. will not on any account, or for any fee, undertake cases he cannot mitigate or cure. He may be found at home every morning from eight until twelve.

FOR

**Boots, Shoes, and Goloshes,**

A CHEAP and very easy method is here pointed out not only to preserve, but to improve personal health, that most precious of temporal blessings. "Keep your feet warm," was one of the wise maxims of old Parr, the sage of former years. A maxim, too, based upon the principles of genuine philosophy, and supported by the experience of an unusually protracted life. The feet, to be kept warm, must be DRY. But seeing every one, either from duty or for recreation, is necessitated to expose himself to the mischievous effects of a cold humid atmosphere, by which is injured the health, not only of the tender and delicate Lady, who is perhaps exercising herself in works of mercy, and whose predominating, unconquerable and ever active principle of unbidden and unsupplicated charity towards the objects of a wretched poverty, has drawn her feet to their door; but the strong, the hale, the vigorous man, in discharging the necessary duties of his calling, from the same cause, has been subjected to suspension from the activities of life, visited with a train of obstinate diseases, stretching through a long and painful affliction, not unfrequently issuing in a lamented premature death; thus bereaving families, removing from the world some of its brightest ornaments, and most useful members of society; the origin of which catastrophe was the too often unheeded evil of **GETTING WET ON THE FEET.**

To escape the sad consequences of *wet feet*, Cork and Leather Socks, Double-soled Boots, and various other ingenious devices have been had recourse to, without complete success, and every lady acknowledges the *inconvenience of Clogs*, but the object of *dryness* is completely obtained, and every inconvenience obviated (as thousands can testify) by the use of

# POOLE'S

### WATERPROOF VARNISH,

which requires no labour of application, but is laid on with a soft paint brush, three coats of which will render any leather impervious to wet, give it an appearance equal to the richest *Japan*, and maybe afterwards cleaned with the common blacking. It will also polish India-rubber Shoes and Goloshes, Cab Heads, Gig Aprons, Portmanteaus, Whips, and Enamelled or other Leathers exposed to wet; will not wash off with rain, turn clammy in wet weather, or be affected by heat; the finest linen will not receive a soil from it, while its extreme softness prevents its cracking or peeling off

Ladies and Gentlemen who study their health will do well to make a trial of its beneficial effects, on the soles of their Boots and Shoes, as it will render the leather more durable by making it waterproof, and preserve the feet perfectly dry during the longest exposure to wet; through which no dampness can be felt, after being applied to the strongest boot or the lightest lipper.

N.B. The above Composition is formed on the most approved chemical principles. Sold Wholesale and retail by the *Inventor*, W. Poole, Bootmaker, Carlton Street, Nottingham, in Bottles of 1s. 6d., 3s., and 5s. 6d. each.

MISS GERRARD SMITH'S

ESTABLISHMENT,

CASTLE GATE, NOTTINGHAM.

MISS SMITH is a native of London, where she became a proficient in the various branches of female education, under the instruction of Masters acknowledged as the heads of their professions in that metropolis, and now after many years of experience, acquired in perfecting the education of some of the Families of our first Nobility, has removed to Nottingham, at the suggestion of friends there, and backed by the recommendation of some of the most influential residents in the neighbourhood, who feel persuaded that her talents will be usefully exerted with credit to herself and advantage to those Pupils who may be entrusted to her care.

MISS SMITH wishes it to be understood, that she has no merely the means in her power, which she will energetically employ, to perfect her Pupils in all useful and refined accomplishments, but that she considers Religion of Paramount importance; and that as it is her duty, so it will be her pleasure to make her Scholars thoroughly acquainted with, and practisers of those pure principles that are our surest guides and best safeguards through life.

In addition to the above, Miss Smith will devote her patient attention to the formation of the manners of all those who are inmates of her Establishment, so that they may become not merely useful, but polished members of society.

It will form no part of this system of education, to inculcate knowledge, at the expense of the feelings and comforts of the Pupils, it being well considered that great firmness and much kindness are perfectly compatible, and if, in pursuing this plan duly appreciating the capabilities, and not weakly overlooking their defects, Miss Smith shall, at the same time, acquire the confidence and esteem of her Pupils, she will candidly acknowledge that she has then secured her best and most gratifying reward.

## OBSERVATIONS.

COMPANIES formed for the Assurance of Life and against Loss by Fire, are divided into three Classes, viz. :

**FIRST CLASS.**—Companies having Capitals, wherein the Assurers do not participate in the Profits; such as the SUN, ROYAL EXCHANGE, LONDON ASSURANCE CORPORATION, GLOBE, ALBION, and EAGLE; the PHOENIX FIRE and PELICAN LIFE, BRITISH FIRE and WESTMINSTER LIFE, IMPERIAL, HOPE, and WEST-OF-ENGLAND FIRE, STAR LIFE, and YORK and LONDON OFFICES.

**SECOND CLASS.**—Companies wherein there is no Proprietary, and where the Contributors are consequently mutual Assurers and Participators in a division of Profits; such as the HAND-IN-HAND and WESTMINSTER FIRE OFFICES, the AMICABLE, EQUITABLE, and LONDON LIFE ASSOCIATION, and the NORWICH and NATIONAL UNION FIRE and LIFE OFFICES.

**THIRD CLASS.**—Companies wherein the Assured and the Proprietary participate in Profits, under certain regulations; such as the NOTTINGHAMSHIRE and DERBYSHIRE, the GUARDIAN, the UNION, the ATLAS, the COUNTY FIRE and PROVIDENT LIFE, the IMPERIAL, ROCK, HOPE, ECONOMIC, ATLAS, ALLIANCE, PALLADIUM, LAW, CROWN, CLERICAL, EUROPEAN LIFE, and the MANCHESTER for FIRE and LIFE.

Although some of the offices in the First Class are the most antiquated, and perhaps the most wealthy, yet assurers object to them, because the premiums charged (particularly on Life Assurance) are generally more than the risk justifies, and yet they are excluded from any participation in the profits.

The serious legal responsibility incurred by all the Assurers within the Second Class, from being Co-partners in such institutions, and, consequently, individually liable for all losses in proportion to their interests therein, is much increased from the want of capital to satisfy claimants.

Where considerable losses accrue, a delay may thus arise in indemnifying the sufferer, and may probably lead to litigation. Hence, great objections have been experienced to a connexion with offices so constituted. If profits, however, shall have accumulated, and been reserved in order to create a fund to meet contingencies, and it should not have been consented to by the Assurers at large; the fund so created belongs to them, and it is competent for any Assurer to insist on his proportion being paid him. If it be not complied with, and he resorts to law, the affairs of the society, like other partnership differences, must come under the cognizance, and await the fiat of the Court of Chancery,

The Third Class combines the security of the First with the beneficial character of the Second; under this denomination the NOTTINGHAMSHIRE and DERBYSHIRE is placed, where it tenders all the benefits of the EQUITABLE, the AMICABLE, the LONDON LIFE, the NORWICH, &c., without their perils and yields a security equivalent to the SUN, the ROYAL EXCHANGE, PHOENIX, &c.

These advantages are mainly derivable from a numerous located Co-partnership, with the Establishment of Committees arising thereout at the principal towns of the two Counties, distinguishing the NOTTINGHAMSHIRE and DERBYSHIRE from all other institutions; and by an influence thus exerted and a powerful interest necessarily involved, its progress in public estimation must lead to prosperous results.

The Capital of this Company being fully adequate to meet losses, and the right of the Assured to have his demand (if he think proper) determined by arbitration, are a sufficient guarantee that his claim will be immediately and liberally satisfied.

With a due regard to the specific property assured, the premiums charged on fire risks are as low, and in some cases, lower than any other establishment, arising from the nature of materials employed in the construction of buildings, as well as on stock-in-trade peculiar to some businesses in this district.

And in respect of Life Assurances, the tables being calculated purposely for these latitudes, the rates will be found lower than any contemporary office, *where profits shall on like principles be diffused throughout the Assurers.* At the same time, let it not be forgotten, that as certain and prompt indemnity is paramount to every other consideration, so it has been the primary ingredient in determining the above rates.

Thus, whilst the NOTTINGHAMSHIRE and DERBYSHIRE Office invites the patronage of the public, it no less tenders to that public every advantage consistent with security and a fair remuneration to the Proprietary.

After the payment of five per cent. on the advanced capital, together with the reservation of one-third of the profit, as a guaranty fund, a bonus of half the remaining profits will be added to the policies, or go in reduction of the premiums, whether annual or otherwise. By such an arrangement the actual expense of assuring will be materially reduced; because, although the individual will pay the full annual premium, still he will be entitled to receive part of it back, in the shape of profits, or the same may be added to the original sum assured, or go towards liquidating the future annual payments.

It is observable, that bonuses on Life Assurances are granted in other offices, only in respect of policies that are to continue for the whole period of life; but in this office the interest of persons effecting policies for a shorter period than life is particularly consulted, in the very moderate scale of charge, and the recognition of the Assured's right to a participation in the profits.

## LIFE DEPARTMENT.

The establishment of Life Assurance offices may be considered amongst the most valuable institutions of modern times. Their

growing popularity, and increase in number, demonstrate that the principle is becoming more generally known, and their benefits more generally appreciated. When Companies constituted to afford these benefits, are based on a capital advanced by a numerous and wealthy constituency, experience has proved by the success of earlier societies, that they afford security for investment, and ample interest for the advance ; whilst, on the other hand, Assurers have the power of securing to their representatives, by a comparatively small annual payment, a sum of money payable on their decease, be that event immediate or remote, which shall effectually protect, perhaps, a wife or orphan family from the bitterness of poverty. A man of moderate fortune may feel, that with common prudence, he may be enabled to lay by through a series of years, which his present age and state of health induce him to anticipate, a competence for his family ; but he feels, nevertheless, on the reflection, that " He who gives can take away," and he may be snatched from the possession of his sublunary enjoyments in one moment, and the prosperity of his family be annihilated. He, therefore, after a moment's reflection, has recourse to the institutions of man, and by an assurance on his life, renders " that certain which nature has made uncertain." If, then, for instance, at the age of 25, he could save from his income £48. per annum, it would be twenty-six years before his savings, laid out at three and a half per cent. interest, would amount to £2,000. But if he employed this annual saving in assuring his life at the office of the NOTTINGHAMSHIRE and DERBYSHIRE LIFE ASSURANCE COMPANY, the sum of £2,375. is *already his to leave in reversion*, exclusive of the bonus to be added thereto out of the profits of the Company, dependent on the length of time the Insurer shall survive his first payment. The best period of his life, then, subsequent to the age of twenty-five, would not be spent on this account in labour and inquietude. The apprehension of future penury to his descendants no longer harasses his mind, or robs him of present enjoyment and ease ; but, by the foregoing periodical fine, he is sure of securing £2,375. at his death to those whom he has nurtured in infancy, and trained to adolescence.

Life Assurance, then, is particularly deserving the attention of gentlemen in the army, the navy, and of the learned professions, whose incomes may terminate with their existence.

Life Assurance also affords the means of raising money on loan, where personal security only can be offered ; of providing for the fines on renewal of leases held upon lives ; of making or perfecting settlements upon marriage ; of securing the eventual payment of doubtful debts ; of enabling persons whose property may be chargeable with mortgage or other incumbrances, payable on events connected with the termination of their own or others lives, to answer the charges when they shall become due ; and of rendering contingent property nearly equal in point of security with absolute property.

There are many other subjects which might be cited in evidence of the vast utility of the Assurance on Lives. It may not be necessary further to give illustrations ; but it is quite clear no intelligent mind will contemplate this subject without the conviction, that if to make certain eventual sums on the unimportant privation of an annual sum be not a moral duty it is an act of paramount prudence.
