A SUMMARY OF THE PRINCIPAL ASTRONOMICAL AND METEOROLOGICAL OCCURRENCES FOR THE YEAR 1886.

Explanation.—*Sun's Rising and Setting.*—These numbers show the mean time when the Sun's centre, elevated by refraction, appears on the horizon, the eye being on a level with it.

Phases of the Moon.—The times are here given to the nearest second when the Moon is respectively 0deg., 90deg., 180deg., and 270deg. of longitude from the Sun. *Apogee* is the time of her greatest distance from the earth; *Perigee* the time of her nearest approach to it.

Geographical Positions.—The position arrived at for the Magnetic Observatory in 1852 by Commander Kay gave to Fort Mulgrave, east longitude 9h. 49m. 29·6s. Captain Denham, of H.M.S. *Herald*, with 32 chronometers 1856 to 1858, gave 9h. 49m. 28·8s., giving a mean longitude of 9h. 49m. 29·2s. The private Observatory (Mr. Abbott's) lies on a direct line North and South with Fort Mulgrave, and taken in connection with observations made on the transit of Mercury over the Sun's disc November 5th, 1868, gives a very close result to 9h. 49m. 29·2s., which has been here adopted.

ECLIPSES IN THE YEAR 1886.

In the year 1886, there will be two Eclipses, both of the Sun.

First.—An Annular Eclipse of the Sun on March 6th, visible in Tasmania.

This eclipse will be Annular on a line passing through the Pacific Ocean from Cape Corrientes to the South-Eastern extremity of New Guinea. It will be visible in Tasmania as a very small eclipse near the time of sunrise. At Hobart, the first contact takes place at 5h. 46m. a.m., and the eclipse ends at 6·37 a.m. At the time of greatest eclipse, about half way between these times, little more than one sixteenth of the sun's diameter will be observed, so that it will require careful watching to notice the slight indentation on the sun's right edge.

Second.—A total Eclipse of the sun on August 29, invisible in Tasmania.

	2. ♏ Scorpio.		8. ♉ Taurus.
	3. ♐ Sagittarius.		9. ♊ Gemini.
Summer Signs	4. ♑ Capricornus.	Winter Signs	10. ♋ Cancer.
	5. ♒ Aquarius.		11. ♌ Leo.
	6. ♓ Pisces.		12. ♍ Virgo.

AUSTRALIAN SEASONS.

Autumn begins March 20d. 11h. 46min. p.m., when the Sun enters Aries.

Winter begins June 21d. 8h. 25m. p.m. (the shortest day), when the Sun enters Cancer.

Spring begins September 23d. 10h. 40m. a.m., when the Sun enters Libra.

Summer begins December 22d. 4h. 29m. a.m. (the longest day), when the Sun enters Capricornus.

From an average of observations over many years the *hottest* period is from January, 21st to 25th, and the *coldest* from July, 20th to 24th; which periods form respectively *Mid-Summer* and *Mid-Winter*.

In connection with the above Table, it should be remembered that the new moon passes the meridian and rises and sets nearly at the same time as the sun; and as she advances in her orbit eastward about 12½ degrees daily, so she rises and sets about 49 minutes daily later than the sun. At new moon, therefore, she rises and sets with the sun; 7½ days after, when she is 90 degrees in advance of the sun, her time of rising will be about noon; at full moon, when she has advanced 180 degrees, she will rise at about six; and at waning, she will rise in her last quarter at about 12.

This table exhibits half the time that a celestial object continues above the horizon when the declination and latitude are of the same name, or below when they are of contrary names; whence, by adding or subtracting from its meridian-passage, the apparent time of its rising and setting for this latitude may be computed.

None of the Planets are visible till the Sun is a certain number of degrees below the horizon, viz.:

Mercury	10°	Jupiter	8° 00′
Venus	5°	Saturn	10° 00′
Mars	11° 30′	Herschell	17° 30′

WEATHER TABLE.

The following table, constructed by the ingenious Dr. Kirwan, upon philosophical considerations of the attraction of the sun and moon in their several positions respecting the earth, is submitted to notice, under the recommendation of actual observation in this colony, further confirmed by several years' experience in the Northern Hemisphere. It is not pretended to be infallible ; but it comes so near the truth that in very few instances indeed will it be found to fail of furnishing the observer with the knowledge of what kind of weather there is the greatest probability of succeeding in any given quarter of the moon.

Quarter of the Moon.	*Summer.*	*Winter.*
If the Moon enters either of her quarters at 12 noon ...	The weather will be Very rainy	The weather will be Snow and rain
If between the hours of		
12 and 2 p.m.	Changeable	Changeable
2 ,, 4 ,, ...	Ditto	Fair and mild
4 ,, 6 ,, ...	Fair	Fair
6 ,, 8 ,, ...	Fair if wind N.N.W. or N.E., rainy if wind W., S.W., or S.	Fair if wind N.N.W. or N.E. rainy if wind W., S.W., or S.
8 ,, 10 ,, ...	Ditto	Ditto
10 ,, 12 night	Fair	Fair
12 ,, 2 a.m.	Ditto	Fair and frosty
2 ,, 4 ,, ...	Cold and showery	Rain
4 ,, 6 ,, ...	Rain	Ditto
6 ,, 8 ,, ...	Squally	Stormy weather
8 ,, 10 ,, ...	Changeable	Changeable
10 ,, 12 noon	Showery and windy	Cold and rain.

Plain Rules for Foretelling the Weather.

The result of a long series of Observations made by R. L. J. ELLERY, ESQ., *at the Melbourne Observatory and elsewhere.*

GARDENERS' CALENDAR.—*Fruit Garden.*—Where budding is required it may still be performed, choosing, if possible, showery weather. Cut off all surplus shoots from young trees, if they are not required for scions in the Spring. Continue to pinch off all lateral shoots from vines. *Flower Garden.*—Choice carnations may be increased by cuttings and layers with shade and moisture. Choice flowers should be marked for seed. Annuals that have done flowering should be removed, or some will become troublesome weeds. *Kitchen Garden.*—Plant celery in trenches, and a succession of French beans; sow turnips when the weather is moist; take up early potatoes that are ripe; gather all kinds of seeds as they ripen; cut from strawberries all runners that are not wanted for plants, to give strength to the roots. *Greenhouse.*—Calceolarias, cinerarias, etc., may still be sown. Geraniums that have done flowering should be cut down; re-pot as soon as they begin to make fresh shoots. Cuttings struck now will make good plants next year, with care. Continue to shade and water as directed last month.

JANUARY 6.—Called *Twelfth Day*, as being that number after Christmas, and *Epiphany* from a Greek word signifying "appearance." It is a festival of the church in commemoration of the manifestation of Christ to the Gentiles,—more expressly to the three magi or wise men of the East who came, led by a star, to worship him immediately after his birth. The Queen, through the Lord Chamberlain, annually on this day presents gold, frankincense, and myrrh at the Chapel Royal.

GARDENERS' CALENDAR.—*Fruit Garden.*—Little is required this month besides attending to the buds. Strawberry runners should be kept moist to form robust plants in time for transplanting in the first Autumn rains. *Flower Garden.*—Cut off all flower stalks as soon as done flowering, except those required for seed. The flowering season is prolonged by cutting off surplus seed as soon as formed. Verbenas, pentstemons, petunias, and other herbaceous perennial plants may now be propagated by cuttings. Encourage asters, chrysanthemums, dahlias, etc., by frequent watering. Use the rake to preserve a neat appearance. *Kitchen Garden.*—In showery weather vegetables may be sown to come in during the Winter. Mark out plants of the cabbage tribe to run to seed. Earth up peas and potatoes; hoe and stir the surface among all descriptions of crops. *Greenhouse.*—As the principal displays of this season are over, turn your attention to preparation for the next by propagating by seed and cuttings, and preserving such old plants as are desirable for another year. This is the time for forming plants of the early flowers, too frequently neglected by amateurs until the flowering season. Sow mignonette for Winter flowering.

GARDENERS' CALENDAR.—*Fruit Garden.*—Prepare borders for forming new beds of strawberries on the first approach of rain. The ground intended to be planted with fruit trees should now be well worked. Collect the leaves as they fall and convert them into manure. *Flower Garden.*—Continue the general directions given for last month, and sow seed of perennial and annual flowers for Spring flowering as they ripen. *Kitchen Garden.*—Sow cabbage, cauliflowers, lettuce, spinach, and onions for early use. Sow turnips, thin out those sown last month. Earth up celery, take up potatoes, and house onions when well dried. *Greenhouse.*—Continue the general directions given for last month.

ST. PATRICK (Mar. 17).—The shamrock is said to be worn by the Irish upon the anniversary of this their tutelar saint for the following reason :—When he preached the Gospel to the pagan Irish, he illustrated the doctrine of the Trinity by showing them a trefoil, or three-leaved grass, with one stalk ; which operating to their conviction, the shamrock, which is a bundle of this grass, was ever afterwards worn upon this saint's anniversary, to commemorate the event.

SHROVETIDE (March 9) derives its title from the practice of being *shriven* or *shrove*—that is, confessing and receiving absolution—before the Lenten fast.

ASH WEDNESDAY (March 10). — So called on account of penitents wearing sackcloth next their skin and sprinkling ashes on their heads.

GARDENERS' CALENDAR.—*Fruit Garden.*— Planting of vines and fruit trees may be commenced towards the end of the month; in the meantime keep the ground well worked in dry weather, and dig between the old trees as soon as the leaves have fallen. Keep the surface of the ground loose between the rows of newly planted strawberries, and dig between the rows of the old ones. *Flower Garden.*— Plant bulbs of nearly all the hardy species in dry weather; dig and manure borders between shrubs and herbaceous plants, and form new ones where required, leaving the ground rough. Carnations, etc., that have been propagated during the Summer may now be formed into beds; and shrubs, roses, etc., may be planted towards the end of the month. Examine the haunts of slugs, as every one destroyed now will save considerable trouble and annoyance in the Spring. *Kitchen Garden.*—Continue to sow and plant a succession of vegetables, salading, etc.; dig and manure all spare ground in dry weather. Dress asparagus beds for the Winter. *Greenhouse.*— Cuttings of geraniums that have struck root should be potted into small pots, to be shifted into larger as they advance in growth. The same rule applies to cinerarias, calceolarias, etc.; give air freely during fine weather, and water moderately during damp or wet weather. Gloxinias, achimenes, and other bulbous plants that have done flowering, should be allowed to dry off; primulas and cyclamens that are coming into bloom should be kept near the glass and watered freely.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be proceeded with in dry weather, taking care to leave the surface of the ground loose after the operation. The general pruning of fruit trees, vines, etc., may be commenced towards the end of the month, especially of such as are in a weak state of growth. Root-prune where necessary. All the ground should now be dug up roughly, burying the leaves and what manure can be afforded. *Flower Garden.*—Now is the time for putting in order all flower borders, shrubberies, etc., by pruning the shrubs and roses, trimming the edges, dividing and regulating the herbaceous plants, digging the borders and thereby creating a neat appearance during the Winter months, and obviating the necessity for digging amongst the roots of plants in the Spring; it likewise breaks into the favourite haunts of the slugs, whereby they are more easily found and destroyed; where new borders are to be formed and planted, it should now be done. *Kitchen Garden.*—Plant out cabbage, cauliflower, and lettuce. Sow peas, broad beans, and carrots for early use. Sow spinach and onions. Make plantations of rhubarb and asparagus. *Greenhouse.*—Little can be done in the greenhouse beyond giving plenty of air on all favourable occasions, guarding against night frost, watering when the earth becomes dry, and keeping the plants free from vermin and dead leaves. Keep all growing plants as near the glass as possible.

GARDENERS' CALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be completed this month; should it not be convenient to do so, the trees intended to be planted next month, or later, should now be lifted and laid in by the heels, which will keep them back, always choosing dry weather for the operation; stir the ground around those planted previous to heavy rains as soon as it is dry enough for the purpose. All pruning should be finished this month. *Flower Garden.*—Continue the general directions for last month, and complete the planting of deciduous trees and shrubs. Keep the ground between bulbs free from weeds. *Kitchen Garden.*—Plant early potatoes, etc., in a warm dry border. Early peas and beans may be sown once a fortnight or three weeks from this time. Sow the main crops of onions and carrots, also some radishes, lettuces, spinach, and early cabbage. Sow parsnips in a rich deep soil. Propagate plants which are increased by rooted off-sets. Transplant for seed, if not done in Autumn, carrots, turnips, beet, celery, parsnips, etc. *Greenhouse.*—Continue the general directions for last month. Fuchsias that have shed their leaves should now be prepared for the following season by cutting back and re-potting them. Geraniums that are growing tall and thin should have the ends of the shoots pinched off, which will make them more bushy and compact. Re-pot cinerarias and calceolarias as soon as the present pots are filled with roots. This rule applies to growing plants generally.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vine cuttings may be planted. Prepare for grafting: the proper time is as soon as the stocks are well started. Raspberry and strawberry borders may still be prepared, and new ones formed. Look carefully over apple trees, and dress the parts affected by *aphis* or American blight. Manure freely vines and fruit trees that are weakly. *Flower Garden.*—Flower beds should be manured and dug; edgings formed, trimmed, and repaired; herbaceous plants divided; biennials planted. Roses may be pruned, and most sorts increased by cuttings. Seeds of hardy annuals may be sown in the borders; tender ones on a moderate heat for transplanting. Choice dahlias should be placed in a gentle heat, for the purpose of propagating by cuttings. Verbenas, shrubby calceolarias, pentstemons, etc., may be increased by the same means. *Kitchen Garden.*—Earth up, plant, and sow asparagus; transplant, hoe, and sow cabbage; sow and plant as directed last month, and at end of month sow French beans in a warm border and vegetable marrows in sheltered places; plant out and sow lettuces for succession; sow and earth up peas. *Greenhouse.*—Admit air freely in fine weather; re-pot geraniums, cinerarias, calceolarias, etc., as the roots advance to the sides of the pot. Fuchsias that have been dormant should have their roots reduced and be re-potted in fresh soil. Cacti and other plants may be watered more freely than in the depth of Winter. Sow seeds of balsams, cockscombs, egg plants, etc., on a gentle heat; keep all plants clear of *aphis*, scale, etc.

GARDENERS' CALENDAR.—*Fruit Garden.*—The principal work this month is grafting, the chief aim being to bring the bark of the stock and the scion to fit closely; loosen the ground with a hoe after the operation; the same between vines and fruit trees in general; in dry weather mulch raspberries. *Flower Garden.*—Seeds of annuals, biennials, perennials, and shrubs should now be sown; tender ones raised in heat may be transplanted towards the end of the month. Dahlia roots may be planted: propagate choice varieties as recommended last month; take the cuttings out of heat as soon as they have struck root, and protect them from the frost till it is safe to plant them. Lay shrubs that are difficult of propagation by other means. Keep the hoe at work in dry weather, but do not use the rake, except for covering small seeds. *Kitchen Garden.*—Asparagus beds, keep free from weeds. Transplant cabbage, onions, and lettuce. Sow carrots, red beet, celery, turnips, French beans, spinach, radishes, vegetable marrow, scarlet runners. Plant potatoes, sow peas, and earth up those that are ready. Cucumbers may be sown in ridges. Keep the hoe among the crops, it will assist them in their growth. *Greenhouse.*—Follow the directions for last month. The plants in flower will require watering copiously and shading from the mid-day sun.

GARDENERS' CALENDAR.—*Fruit Garden.*—Look over the vines and rub off all superfluous buds. Disbud wall trees. Destroy caterpillars on fruit trees. Keep the surface of the ground loose with the hoe at all convenient seasons, whether there are weeds or not. Place a layer of fresh stable manure between the rows of strawberries: it will increase the size of the fruit and render it free from grit or sand. *Flower Garden.*—Seeds of annuals may still be sown. Tender species raised under shelter may be transplanted into the borders, choosing showery weather for the operation. Dahlias from seed and cuttings, and other tender plants, may be planted about the middle of the month. Mark the flowers of choice bulbs, etc., with the view of collecting their seed. Stake and tie the shoots of herbaceous and other plants as they advance. Where quality rather than quantity is the object, the number of flowering shoots should be reduced. Destroy slugs, *aphis*, scale, bugs, etc. *Kitchen Garden.*—Continue to sow and plant successional crops. Earth up potatoes and peas, sow all kinds of brocoli, Scotch kale, savoys, cauliflowers, tomatoes, and capsicums. Thin early sown carrots, turnips, and spinach, and keep them free from weeds. *Greenhouse.*—Azaleas, camellias, ericas, etc., that have done flowering should be taken out of the house and placed in a shady situation towards the end of the month. Water sparingly the bulbs of achimenes, gloxinia, gesnera, etc., until they appear above the ground. Re-pot all fast-growing plants as often as the pots fill with roots. Use the syringe in evening during sunny weather.

GARDENERS' CALENDAR.—*Fruit Garden.*—Stop all shoots of vines, except the leaders, at one joint beyond the fruit, and lay them to their trellis or supports; pinch off all unnecessary shoots in young fruit trees. Vines, newly planted fruit trees, etc., will be much benefited by a mulching of half-decomposed stable manure. Rub off the shoots from stocks that have been grafted, and remove the clay and binding as soon as they have joined, which may be known by their shooting vigorously; lay as many strawberry runners as may be required for new plantations, and remove all others. *Flower Garden.*—The planting of dahlias and trimming of all annuals, if not done, should be immediately; support all tall growing flowers as they advance; keep the surface of the ground loose with the hoe; clip and trim all edgings except roses; mark choice flowers for seed. *Kitchen Garden.*—Thin and hoe red beet, carrots, and all other Spring crops. Plant out capsicums and tomatoes. Prick out celery in small beds from the seed beds. Earth up peas, French beans, and potatoes. A succession of peas and French beans may be sown. *Greenhouse.*—Sow seeds of primula, cineraria, calceolaria, camellia, geranium, etc. Give plenty of air and water and shade during sunny weather.

GARDENERS' CALENDAR.—*Fruit Garden.*—Vines not yet attended to should be done immediately, and as the lateral shoots appear they should be taken off to within one joint of the main shoots. Young apple or plum trees infested with red spider should be frequently syringed with tobacco water or soft soap well diluted. Brush off American blight as it appears on the young shoots of apple trees. Peaches, etc., on walls will now require frequent attention. Budding may be performed towards the end of the month. *Flower Garden.*—Dahlias, hollyhocks, etc., require frequent attention. Where fine show dahlias are required, one stem alone should be allowed to grow, and the lower lateral shoots removed from that, and the number of flower buds reduced; a liberal mulching will greatly promote their growth during the approaching hot weather. Bulbs of choice hyacinths, tulips, ranunculuses, anemones, etc., should be taken up and stored as they become dormant. Neatness is now the order. *Kitchen Garden.*—Earth up French beans, peas, and scarlet runners; a succession may be planted; prepare trenches and plant celery; transplant all kinds of brocoli, cauliflowers, savoys, and cabbage for winter use; tomatoes and capsicums, if not put out, should now be done; vegetable marrows may yet be sown: sow turnips this month, and earth up late potatoes. *Greenhouse.*—Cinerarias, calceolarias, etc., that are intended to be kept for another season, should be removed into a shady situation as soon as they have done flowering. Fuchsias, geraniums, etc., that are flowering may be watered occasionally with liquid manure. Shade and water freely during hot weather

Aunt of the Queen.—*Augusta*, *b.* at Cassel, July 25, 1797, daughter of Landgrave Frederick of Hesse-Cassel; *m.* May 7, 1818, Duke Adolphus of Cambridge, youngest son of King George III.; widow, July 8, 1850.

Cousins of the Queen.—1. *George William*, Duke of Cambridge, *b.* at Hanover, March 26, 1819. 2. *Augusta*, sister of the preceding, *b.* at Hanover, July 19, 1822; *m.* June 28, 1843, Grand Duke Frederick of Mecklenburg-Strelitz. 3. *Mary*, sister of the preceding, *b.* at Hanover, November 27, 1833; *m.* Prince Teck of Wurtemburg, June 12, 1866. 4. *Ernest Augustus*, Duke of Cumberland, *b.* 21 Sept., 1845.

The Queen reigns in her own right, holding the crown both by inheritance and election. Her legal title rests on the statute of 12 and 13 Will. III. c. 3, by which the succession to the crown of Great Britain and Ireland was settled, on the death of King William and Queen Anne without issue, on the Princess Sophia of Hanover and the "heirs of her body, being Protestants." The inheritance thus limited descended to George I., son and heir of Princess Sophia, she having died before Queen Anne; and it has ever since continued in a regular course of descent.

Coroners are appointed by the Governor, and hold office during pleasure. For every inquest the sitting Coroner is paid a fee of £1, and £1 for every day after the first, and also travelling expenses at the rate of sixpence for each mile travelled from and to his residence. In rural municipalities these sums are paid by the Municipal Council, under section 21, of 37 Vict. No. 13 ; in all other districts they are paid out of the Public Treasury, under regulations published in the *Hobart Gazette*, for 1875, page 100.

BANKRUPTCY.

HOBART.—All proceedings under the Bankruptcy Act relating to the Estate and Effects of any person who resides or carries on business in one of the Southern Electoral Districts are to be instituted in the Supreme Court in Bankruptcy. *Registrar*, George Browne. Supreme Court Office.

LAUNCESTON.—The like proceedings where any such person resides or carries on business in one of the Northern Electoral Districts are to be instituted in the Court of Bankruptcy at Launceston. *Commissioner of Bankruptcy*, John Whitefoord. *Registrar*, , Public Offices, Launceston.

Sittings are held in each Court as occasion requires, on such days as the Court appoints.

RECOVERY OF SMALL DEBTS,

Under Acts 31 Vict. No. 15, 33 Vict. No. 9, 38 Vict. No. 15, 44 Vict. No. 7, 48 Vict. No. 22, and 49 Vict. No.

Sittings of the Supreme Court are held at such times as the Court may appoint before a Judge of the Court for hearing and determining cases in accordance with the provisions of the Acts above mentioned at Hobart, for the recovery of debts and demands to an amount exceeding £10 and not exceeding £100, and at Launceston for the recovery of debts and demands to an amount exceeding £50, and not exceeding £100.

Courts of Requests are held at Launceston, and in several of the Country Districts before Commissioners, and in other Districts the Courts of General Sessions have been appointed Courts for the recovery of debts and demands under these Acts, the jurisdiction being limited in some cases to £30 and in others to £50.

A Court is held by the Police Magistrate at Hobart for the recovery of debts and demands to an amount not exceeding £10.

Jurisdiction.

1. All personal actions where the debt or damage claimed is not more than the amount to which the jurisdiction of the Court in which the action is brought is limited, excepting actions of ejectment or replevin, or in which the title to any corporeal or incorporeal hereditament, or to any toll, fair, market, or franchise is in question; or in which the validity of any devise or bequest or limitation under any will or settlement may be disputed, or for the infringement of letters patent or copyright, or for the recovery of any money or thing won or alleged to have been won at or by means of a race, match, wager, or any kind of play, or for any arrest or false imprisonment or malicious prosecution, or for any libel or slander, or for criminal conversation, or for seduction, or breach of promise of marriage, or upon any charter-party of affreightment or policy of assurance. (None of these exceptions apply to the jurisdiction of the Supreme Court under the said Acts.)

2. Plaints for the recovery of the possession of small tenements.

3. Every Court has jurisdiction throughout the Colony, but the plaintiff must file his plaint in the Court having jurisdiction to the

amount claimed nearest to the place where the defendant or one of the defendants dwelt or carried on business at any time within six calendar months next before the day on which the plaint shall be filed, or in the Court having jurisdiction to the amount claimed nearest to the place where the cause of action, either wholly or in part, arose. Where the plaintiff sues for the value of any work or labour performed or services rendered, he may file his plaint either in the Court having jurisdiction to the amount claimed nearest to the place where the work or labour was performed or the services rendered, or in the Court having jurisdiction to the amount claimed nearest to the place where the agreement for the performance of such work or labour or services as aforesaid was made.

Where amount claimed exceeds £10 the action is to be tried by a jury of three, unless the Commissioner by consent of parties tries the action.

In actions brought under the said Acts before a Judge of the Supreme Court the Judge alone determines all questions as well of fact as of law, and his decision shall be the judgment of the Court, unless a Jury be required as hereinafter mentioned.

In any such action it shall be lawful for the plaintiff or defendant to require a Jury to try the action, and when the plaintiff requires a Jury to try the action he shall insert in the summons the words "For Trial by a Jury," and no further notice shall be necessary; and when the defendant requires a Jury to try the action he shall insert in the notice of defence the words "For trial by a Jury," and no further notice shall be necessary.

In any such action where no demand of a Jury has been made, a Judge may, at any time before the return day of the summons, by an order in writing direct the cause to be placed in the list of Jury cases, and it shall be tried by a Jury accordingly.

If in any such action both legal and equitable rights are involved, the Court may adjudicate upon and determine both classes of rights, and in every such case the equitable rights shall prevail.

In Courts of General Sessions the justices are judges of law and fact.

In cases of warrants of execution the actual expenses necessarily incurred by the Bailiff in respect of such warrant shall be allowed by the Registrar as costs in the cause.

In cases of interpleader the summons to the Bailiff shall be issued gratis in the first instance; and necessary expenses incurred by the Bailiff in keeping possession of the goods to be included in the general costs of the case.

No increase of fees shall be made by reason of there being more than one plaintiff or defendant.

JURORS AND JURIES.

The following persons are exempt from serving upon juries:—Judges and Ministerial Officers of the Supreme Court; Commissioners and Ministerial Officers of the Courts of Requests or Bankruptcy; Recorders of the colony of Tasmania; Chairman and Ministerial Officers of Courts of General Sessions of the Peace; Members and Ministerial Officers of the Executive Council, and of the Parliament of Tasmania; Postmasters and persons employed under the Post Office department; Clergymen in Holy Orders, Roman Catholic Priests, and Ministers of Religion; Barristers, Attorneys, Solicitors and Proctors duly admitted to practise and actually practising; Police and Stipendiary Magistrates;

Physicians and Surgeons in actual practice, and all Chemists and Druggists; Managers of Banks; Schoolmasters; Licensed Pilots and Masters of Vessels actually employed in trading; Sheriff's Officers, Gaolers, and Constables; Mayors, Aldermen, Auditors, and Corporate Officers of Hobart and Launceston; all persons specially exempted by any law now or hereafter to be passed, and such public officers as the Governor may see fit to exempt; all persons above 60 years of age.

CORONER'S JURY to be summoned upon Coroner's precept, and to consist of seven persons, under 37 Vict., No 13.

JURY LISTS to be affixed to Court House and Police Office in each district within 30 miles of Hobart and Launceston, the first week in September; and the justices to meet in such districts on the first Tuesday in October to correct and allow the same.

COMMON AND SPECIAL JURORS AND JURIES.—*Regulated by Acts 18 Vict. No. 11, 20 Vict. No. 28, 21 Vict. No. 45, 28 Vict. No. 11, and 31 Vict. No. 13.* Every man between 21 and 60 (unless exempt) is liable to serve as a common juror in criminal cases and as a special juror in civil cases, under the following qualifications:—Having an annual income from real or personal (or real and personal) estate £50; or clear real or personal (or real and personal) estate, £500; or house in Hobart or Launceston £50, in any other part of the colony, £30; or municipal rate, £50; or road assessment, £30; or occupier of land, £80; or salary, £150. Penalty for non-attendance, a fine not exceeding £20.

RECOVERY OF SMALL DEBTS.—At Hobart and Launceston jurors to be those in special jury lists and resident within three miles. In Courts held before Commissioners, except as aforesaid, jurors resident within 15 miles of Court to be selected by Commissioners, from valuation and assessment rolls. Jury to consist of three persons. No jury required unless demand exceeds £10.

COMPENSATION to special jurors in Supreme Court, if residing within three miles of the Court, per diem, 5s.; if residing more than three miles, per diem, 10s.; and for every mile of distance between residence and Court, if exceeding three miles, 1s., *i.e.*, 6d. each way.

COMPENSATION to common jurors in criminal cases, if residing above five miles from the place of trial, for each day's attendance on the Court, 5s.; if above ten miles, 6d. per mile each way in addition.

WITNESSES' EXPENSES.

The Judges of the Supreme Court have approved of the following scale of expenses and compensation to be allowed to witnesses in criminal cases:—*

	£	s.	d.
Legal and medical practitioners and land surveyors, for loss of time, per diem	1	1	0
Not to apply to any person in the receipt of a salary from public moneys and who is not allowed to practise for his own benefit.			
Magistrates, professional men, and other persons not hereinafter specially mentioned, travelling, for personal expenses, per diem, not exceeding	0	18	0
In determining the allowance to be made to the witness regard will be had to his station in life.			

*Similar allowances are made to Witnesses before Select Committees of Parliament.

Ditto, travelling, for personal expenses, per diem, not exceeding	0	5	0
No allowance will be made to any person for loss of time except to professional men, and labourers, etc., in the receipt of daily wages, whose attendance at Court will cause the loss of wages.			
Coach hire in addition to the above in each case when incurred. Outside or inside fare will be allowed, according to the station in life of the witness.			
Horse hire, per diem, not exceeding...	0	10	0
Forage, per diem, not exceeding	0	6	0
Horse hire is only to be allowed when a public conveyance is not available.			
When any witness is in the receipt of forage allowance, or allowance in lieu of forage from public moneys, a proportionate deduction is to be made from each day's allowance for forage as above.			

The above rates are not to be considered as fixed allowances, but as merely indicating the maximum charges to be admitted ; and no more will in any case be allowed than has been actually and necessarily expended.

No expenses will be allowed unless applied for to the Judge immediately after the trial, or before the rising of the Court on the day of trial.

No expenses will be allowed for attending before the examining Magistrate unless the magistrate's certificate allowing such expenses is produced to the court at the time the witness applies for his expenses. No expenses will be allowed unless the witness appears in the court immediately upon his name being called.

No expenses will be allowed if any excessive or improper charge is attempted to be made.

MEETINGS OF LICENSING BENCHES.

Quarterly meetings of Licensing Benches for granting public-house and packet licenses and transfers of same are held in all police districts and municipalities on the first Monday in the months of February, May, August, and November in every year. The annual licensing meeting is always held on the first day of December. Applications for each must be sent to the local Clerk of Petty Sessions fourteen clear days previously.

Any person desiring to appeal from a decision of any Licensing Bench must make such appeal to the Court of General Sessions of the district in which the meeting took place, and must also give to the Clerk or Deputy Clerk of the Peace for the district notice in writing of his intention and the grounds of appeal at least *seven clear days* before the time of holding the Court. If no Court of General Sessions is held in such district, he may appeal to the Court held in the nearest district thereto.

PRIVATE PURCHASE OF CROWN LANDS.—The Waste Lands Act (34 Vict., No. 10) provides that any person may select and purchase one lot of land of not more than 320 acres at £1 per acre. No one to hold more than one lot, unless obtained by descent, devise, or marriage. Selectors on credit under section 24 to pay cash at purchase amounting to one-thirtieth of the upset price, in addition to the survey fee; and a credit premium of one-third of the whole to be added to the purchase money. Payment of balance to extend over fourteen years; but it may be paid off at any time during that period, a discount at the rate of five per cent. per annum being in that case allowed off. Selector must occupy either personally or by tenant or representative, within a year after selection, and continue in occupation until the purchase money is paid off. Example of mode of payment where credit is taken for 100 acres, the sale price being £100; credit premium of one-third, £33 6s. 8d.; total price, £133 6s. 8d. exclusive of survey and grant deed fees :—

SUBMARINE TELEGRAPH.

The Tasmania and Victoria submarine telegraph is worked by the Eastern Extension Australasia and China Telegraph Company, Limited, upon a guarantee by the Tasmanian Government. The duplicate cable

between Tasmania and Victoria was completed on 23rd November, 1885. A cable was also laid on 24th November to connect Swan Island with the main. Communication will probably be opened with Swan Island about March or April, 1886, when the land lines are completed. *Low Head Station.*—William Warren, manager; R. Darby, clerk in charge; J. K. James, F. J. A. Huxtable, W. A. Huxtable, A. Croucher, H. F. Clarke, E. G. Brooke, M. Morton, operators; F. Reisz, cable hand; E. A. Mullay, messenger. *Flinders Station.*—W. Segrave, clerk in charge; G. Day, C. H. M. Planck, G. W. Planck, G. R. McCartney, C. Richardson, E. Riley, J. Collins, operators; R. B. Cotton, cable hand.

MESSAGES.

Messages will be transmitted in the order of their reception; no precedence allowed, except for special despatches on Government service, the arrest of criminals, and cases of pressing emergency.

Messages must be written with ink clearly and legibly, bearing the proper date and address, and the genuine signature of the sender. The full and correct address to be given. Figures not to be used.

Messages will be delivered free of charge within one mile of the office; over that distance porterage will be charged at the lowest possible local rates. When messages are delivered to ships away from the wharf, boat hire will be charged extra.

Prepaid telegrams, on being franked "On Public Service Only" by authorised officers of the Telegraph Department, and having the words "Telegram Only" printed in red ink on the face of the envelope, are allowed to pass through the Post Office free of postage.

Urgent telegrams, upon which double rates are paid, are received for transmission within the Colony only, and take precedence of all other business both in transmission and delivery. Delayed telegrams are charged half rate with postage added, and are posted from the nearest Telegraph Office within the Colony to their destination the evening of the day on which they are handed in, for delivery the following morning.

Newspapers		*Free*

Post Cards having a penny stamp printed or impressed by the Postmaster-General will be transmitted between places in Tasmania, and if bearing an additional penny stamp, to the other Australasian Colonies, under the following conditions:—There must be nothing written, printed, or otherwise impressed on the front side thereof, except the address; on the reverse side any communication, whether of the nature of a letter or otherwise, must be written or printed; the card must not be folded, cut, or altered. Should a post card bear upon it anything of

an obscene, libellous, or obviously objectional nature, it will be detained and forwarded to the Secretary. When owing to a great and unusual influx of letters, etc., the transmission or delivery of letters would be delayed if the whole mail were dealt with without distinction, post cards may be kept back until next despatch or delivery.

Stamped Envelopes.—Size, 5½ by 3 in., with twopenny stamp embossed, are sold in packets of 1 doz. for 2s. 3d., or 4 envelopes for 9d. Special envelopes (2 sizes), for registration purposes, with embossed registration stamp, 4d. each.

Soldiers' and Sailors' Letters.—Letters not exceeding half an ounce to and from non-commissioned officers, private soldiers, seamen, or marines in Her Majesty's service, one penny.

Registered Letters must bear stamps to the value of fourpence as the registration fee, in addition to the ordinary postage. Unregistered letters containing money or valuables are registered by the postmaster before transmission, the fee being charged upon delivery. The registering office is open from 10 a.m. till 4 p m., except on English Mail days at Hobart, when it is closed at 3 p.m.

Late Letters for inland and ship mails are charged at a uniform fee of 2d. each. This regulation applies also to loose letters sent to and from Victoria or New South Wales in the ship's box or bag, the deficiency in default being charged at the destination of such letters. *Late Newspapers*, 1d. each. On English mail days at Hobart (when the ship reception boxes are closed at 6 p.m. sharp), letters for the United Kingdom and Victoria only may be posted until 7 p.m., at an extra fee of 6d. each.

Private Savings Bank or Building Society Packets.—Money or deposit books or documents referring thereto may be forwarded to or from Savings Banks and Building Societies in parcels not exceeding 4oz. in weight at a charge of one penny only for each packet, if bearing the endorsement "Savings Bank (or Building Society, as the case may be) Packet only" and the signature of the sender. Postmasters are bound to register these packets without fee.

Ship and Inland Packets must be in covers open at the ends or sides, and parcels of seed or samples of merchandise in bags or papers tied so as to be easily loosened and refastened. They must bear on the outside a statement of their contents and the name and address of the sender; and must not contain any letter or epistolary communication. Packets exceeding 16 ounces in weight or of inconvenient form or size may be refused; and the transmission of any exceeding eight ounces may be delayed for any time not longer than a week, unless for England. Packets are allowed to contain any of the following articles:—Affidavits, almanacs, accounts current connected with fire, life, and marine assurance, books printed or plain, catalogues, conveyances, deeds, engravings, friendly societies' reports, judgments, *bonâ fide* intended for registration according to law, letters of attorney, magazines, maps, music, music paper, notes, cheques, orders, or pass books sent by or to any bank or banker, paintings, pamphlets, patterns, or samples of merchandise, periodical publications, photographs, placards, plans, policies of assurance, proposals for assurance, prices current, printed circulars, printed papers of every description, proceedings of any court of justice, printers' proofs, reviews, seeds, share scrip, specifications, Tasmanian Government debentures, Tasmanian treasury bills, wills, writing paper, writs. NOTE.—Sample or pattern packets must not contain any article having a value apart from its use as such. Any article of dress is not deemed a sample.

Packets containing Gold.—The postage on all packets containing gold

only, received at any post office for delivery within this colony, exclusive of the Registration Fee of 4d., is as under :—

For any weight not exceeding one ounce . . . 2d.
For every additional ounce or portion thereof . . 2d.

All Postages must be prepaid in Tasmanian stamps. Revenue stamps may be used for postal purposes, and *vice versa*. Inland unstamped letters and packets are sent on, and charged on delivery with double the amount due. Unstamped letters and packages for the United Kingdom, New South Wales, New Zealand, Queensland, South Australia, Victoria, and Western Australia are sent on and charged on delivery with deficient postages and a fine. Stamps must be affixed above the address or the letter may be treated as unstamped.

Exemptions from Postage.—Letters and packets to or from members of Parliament during the session. Petitions and addresses to the Governor; demands, remittances (which also are registered free of charge), and receipts on account of rural police rates and road rates, and rates under Real Estates Duty Act; statistical information to the Government Statistician; maps or plans to or from the Surveyor-General; official letters to or from Inspectors under Scab Act; official returns of births, marriages, and deaths; depositions to or from the Crown Prosecutor; printed forms to or from the Government Printer; in each case the cover being duly endorsed and signed by the sender. Letters on public service only franked by the Governor or by a member of Parliament or Mayor or Warden of a municipality or by an officer of the Government authorised to frank official letters. Prepaid telegrams franked by an officer of the Telegraph Department. Letters enclosing Municipal and Road Trust Accounts addressed to Colonial Auditors. Depositors' Post Office Savings Bank Books.

Newspapers must not bear any mark or contain any writing beyond the address, under a penalty not exceeding £10.

Mails for Europe.—Mails are forwarded every two weeks by the P. and O. Co.'s Steamers *via* Colombo, Suez and Brindisi, and every two weeks by the Orient line of steamers *via* Suez, Naples, and Plymouth. Mails are also made up and sent every four weeks to Sydney in time to catch the Californian mail steamer. Also every four weeks by the Torres' Straits route. Mails are also made up every four weeks, and sent to Melbourne for the French Line of steamers *via* Marseilles.

Intercolonial Mails.—Mails for the neighbouring colonies are made up and forwarded by every steam vessel leaving for Melbourne, Sydney, or New Zealand. Ship mails *via* Launceston and Melbourne (except on English mail days as above) close at Hobart at 6 p.m., and for Victoria only, at 7 p.m.

Private Boxes may be secured at an annual charge of £2 2s., £1 11s. 6d., and £1 1s, according to size; ship mail notices supplied for a yearly sum of 20s. Private mail bags, for country residents, 21s. each.

Telegraph Money Orders may be obtained and made payable at all money order offices which are also telegraph offices in Tasmania, New South Wales, Queensland, South Australia, Victoria, Western Australia, and New Zealand, on payment of the usual charge for a message of ten words, in addition to the money order commission.

REGULATIONS FOR POST OFFICE SAVINGS BANKS.

1. Every Money Order Office is also a Post Office Savings Bank and open daily for the receipt and payment of money during the hours appointed for the transaction of Money Order business. The Banks at Hobart and Launceston are closed at noon on Saturdays, but open again from 7 to 9 p.m. for receipt of deposits only.

2. Deposits of one shilling, or of any number of shillings, or of pounds and shillings, will be received from any depositor at the Post Office Savings Banks; but no interest will be allowed on any sum in excess of one hundred and fifty pounds.

All deposits must be made in cash, or in notes issued by Tasmanian Banks, or in coupons on Tasmanian Government Debentures.

3. Interest will be given on the money deposited in them at the rate of £3 10s. per cent. on sums not exceeding £150.

4. Depositors in these Banks have *Direct Government Security* for the prompt repayment of their deposits.

5. A depositor in any one of the Post Office Banks can continue his deposits at any other of such Banks, or he can withdraw his money at the Post Office Bank most convenient to him.

6. The strictest secrecy is observed with regard to the names of the depositors in the Post Office Savings Bank and the amount of their deposits.

7. Married women may deposit money in the Post Office Savings Bank, and money so deposited will be deemed to be her separate property, and repayments will be made to the receipt of such married woman alone without the concurrence of her husband. Any woman who marries while she is a depositor should forward a certificate of her marriage, and the deposits will be entered in her married name and will remain her separate property. If any deposit is made by a married woman of moneys of her husband without his consent, the husband may apply to a Judge of the Supreme Court, who may order such deposit to be paid to the husband. Moneys deposited by a husband in the name of his wife, in fraud of his creditors may be followed for the benefit of the creditors. Deposits belonging to a married woman may be bequeathed by her by will.

8. Money may be deposited by or on behalf of *Minors*.

9. Friendly Societies, duly certified, may deposit their funds in the Post Office Savings Bank; but a copy of their rules must previously be sent to the Postmaster-General.

10. Charitable and Provident Societies may also deposit their funds, but a copy of their rules must be sent to the Postmaster-General.

11. Depositors' Bank Books are transmitted free of postage.

Withdrawals can be made by notice sent through the telegraph, and payment obtained on same day.

INDICATIONS OF WEATHER.

The most reliable symptoms of *fine weather* are a gradually rising barometer, a grey morning sky, a red sunset, a light blue mid-day sky, and dew at any time.

A steadily falling barometer, a red sunrise, a pale yellow sky, low soft-looking dingy clouds, unusual distinctness of the landscape, much twinkling of the stars, and low flight of birds, indicate *rain.*

Sudden changes of the barometer, a bright yellow sunset, with rosy tints in the East, rapidly driving scud, and a deep blue sky, foretell *wind* and *stormy* weather.

Mails from and to London by the Orient S.N.Co.'s steamers alternate weekly with the above dates, closing at Hobart every alternate Wed.

MAIL SIGNALS.

At Hobart a red flag with white cross is hoisted at the Town Hall and at the mast-head, Albert Battery, when the English mail, by P. & O. steamers, is at King George's Sound; a blue and white chequered flag, Cape Borda or at Adelaide; a red and yellow flag, off Cape Otway or at Melbourne; a white flag with blue cross, off Low Head or at Launceston; and a red flag when it arrives at Hobart. The same flags, with the addition of a red pennant, signify that the mail is by the Orient Co.'s steamer. A blue pennant indicates that English and Intercolonial letters, by steamer arrived at Launceston, will be delivered the same evening at the window of the Hobart Post Office after the arrival of Express Train at 8·45 p.m. A red pennant with white ball indicates a delivery after arrival of Ordinary Train at 6·30 p.m.

At Launceston the arrival of the English mail, *vid* Suez, at King George's Sound is signalled by a white pennant with a red ball (C); off Cape Borda or at Adelaide by C over W; off Cape Otway or at Melbourne, C over V; off Low Head, C over B; and on arrival at Post Office a white flag with blue cross. See Signal Flags.

MARINE BOARD, HOBART.

Established by Act of Parliament, December 22, 1857.

The Jurisdiction of the Board extends to all ports, harbours, and islands from Cape Portland round the eastern, southern, and western coasts to 42° south latitude, and one nautical league to the seaward from low water along the whole of that coast line.

Temporary Office, Elizabeth-street. Wardens* — A. G. Webster (Master Warden), James Bayley, Commander Stanley, R.N., P. Facy, J. McC. Browne. The Board meets every Friday at 3 p.m. Secretary, Henry Smith. Harbour Master and Boarding Officer, James Riddle. Wharfinger, J. E. Howard. Pilots, G. W. Harrison and N. B. Cleary.

Signal Stations.—Battery Point, Richard Shea; Mount Nelson, John Duffy, and W. O. Duffy.

*The constitution of the Marine Board has been altered by Act of Parliament, 49 Vict. No. 11. Particulars will be found on the page of "additions and corrections."

LIGHTHOUSES.—*Kent's Group, revolving; Head Keeper, R. Jackson. *Swan Island, revolving flash; Head Keeper, Charles Baudinet. *Goose Island, fixed; Head Keeper, Alex. Gorrie. South Brune revolving; Head Keeper, W. Hawkins. Derwent, fixed; Head Keeper, J. C. Parkinson. Low Head, revolving; Head Keeper, A. Rockwell. *King's Island (Cape Wickham), fixed; Head Keeper, R. W. Garraway. *Currie Harbour, west coast of King's Island, revolving—5 bright flashes every minute; Head Keeper, E. W. Buckpitt. Leading Lights, Tamar Heads; Head Keeper, R. F. Allen.

QUARANTINE GROUND.—Between Sandy Bay Point and the eastern side of the river Derwent; Sandy Bay Point bearing north of west. The usual quarantine signals to be exhibited at the main-topmast head.

HEALTH OFFICER.—C. E. Barnard.

WHARFAGE RATES.—See page 147. Porter's license, 5s. Boat license, 6s. Waterman's license, 5s.

HARBOUR DUES.—One half-penny per ton inwards and outwards, and for each removal. N.B.—No vessel is charged for more than three removes during her stay in port, and not more than £7 10s. Vessels not liable to pay Wharfage Rates, but which shall use any Wharf without loading or landing any goods shall pay as under,—Steam-ferry Boat, River or Coasting Steamer under 25 tons, £5 per annum. Steam-ferry Boat, River or Coasting Steamer above 25 tons, £10 do.; Barge, Boat, or Sailing vessel trading to and from Hobart, and any place within Cape Pillar and Recherche Bay, 2d per ton per month; Barge, Boat, or Sailing vessel trading to and from Hobart beyond limit above defined, 2d per ton for each trip; Intercolonial Steamers or Sailing vessels from which passengers, but no goods are landed, 3d per ton.

PORT CHARGES.—*Lighthouse Rates.*—For steamers and coasting vessels, 4d. per ton. For other vessels, 6d. per ton.

PILOTAGE.—On sailing vessels, 6d. per ton; on steam vessels, 4d. per ton. No charge for pilotage may exceed £15, or be less than £4; vessels under 80 tons are exempt, unless the master employs a pilot.

The remuneration to pilots detained on board vessels in quarantine or otherwise delayed is 15s. per day in addition to the usual pilotage.

The exemption flag is a full-sized red pennant over the allotted distinguishing flag of the vessel.

STEAM-BOAT LICENSE.—Every Steam Ferry Boat or Steamship, plying for hire or conveying passengers must obtain a license, setting forth the number of passengers which such vessel can safely and conveniently carry—the fee for such license being five shillings—a penalty not exceeding £10 will be imposed on masters of steamboats who carry passengers in excess of the number authorised by his license.

EXEMPTIONS FROM PORT CHARGES.—In order to encourage the resort to the ports of this island of vessels of all nations engaged in the whale fishery and vessels arriving under the circumstances hereinafter mentioned, all vessels of all nations outfitting for or refitting from the whale fisheries and all vessels arriving and sailing in ballast or which do not break bulk or only to such an extent as may be necessary to provide funds for the repairs, refitting, or refreshment of such vessels, and all vessels belonging to any foreign power with which a treaty of com-

LAUNCESTON MARINE BOARD.

Established by Act of Parliament, December 22, 1857, and amended by 48 Vict., No. 19, November 24, 1884.

The Amended Act re-constitutes the Board, increases the members from five to nine, to be elected as follows:—Two by the Chamber of Commerce, two by the Municipal Council, two nominated by the Government, and the Mayor, the Collector of Customs, and the Chairman of the Chamber of Commerce to be members *ex officio*. One member each, appointed by the Government, and elected by the Town Council and Chamber of Commerce, shall retire every year, but shall be eligible for re-election. The Master Warden may receive a salary not to exceed £200 per annum; the Wardens shall be entitled to receive one half guinea each sitting, but not more in the aggregate than 26 guineas in any one year. The Marine Board may sell the steam tug "Tamar" absolutely, and appropriate the proceeds for such purposes as the Governor-in-Council approves. The Consolidated Board, formed by the Hobart Marine Board and the Launceston Marine Board, for the purpose of erecting any new lighthouse, shall be formed of the Hobart Marine Board and five Wardens of the Launceston Marine Board, to be approved by the last mentioned Board for the purpose.

Office, Queen's Wharf.

Wardens, T. H. Urquhart (Master Warden), E. L. Ditcham, A. Harrap, R. J. M'Kenzie, R. J. Sadler, S. Tulloch, the Mayor, the Collector of Customs, and the Chairman of the Chamber of Commerce, *ex officio*.

Secretary, G. M. Eddie. Harbour Master, W. R. Barwood.

Pilots residing at Low Head.—W. Croucher (in charge), C. Begent, J. J. Bradley, Jas. Taylor.

Lighthouse, Low Head, A. Rockwell, Head Keeper.

Leading-Light Towers, R. F. Allen, Head Keeper.

Assistant Harbour Master, George Town, W. Hopkins.

Paddle steam-tug, Tamar. Master (and Pilot), C. Begent, Engineer, Joseph Lowes.

Shipping Master, G. Smart; Marine Surveyor, W. R. Barwood.

Inspecting Engineer, Joseph Lowes.

No other steamer than the Tamar tug allowed to tow in the river except licensed (fee £25), under penalty. Cases of emergency exceptional. Steamers may tow coasting vessels under 60 tons, or river boats, on paying a license fee of £2.

The rules and regulations of the port as published by the Board, and sailing directions for entering Tamar Heads by night, are supplied to all vessels visiting the port.

Quarantine Ground.—Western side, Middle Island, in the River Tamar. Day signal, yellow flag, of six breadths of bunting, at maintopmast head; at night, a signal lantern shown from the same position.

Health Officer, George Town, James Richardson.

Boat license, 5s. Porter's licence, 5s. Watermen's license, 5s.

PILOTAGE RATES.—Sailing vessels, 1s. per ton; steam vessel, 8d. per ton. Vessels that do not have a pilot until they pass Whirlpool Reach either way are charged only half pilotage. Other regulations as at Hobart.

HARBOUR DUES.—1d. per ton inwards, and 1d. per ton outwards.

LIGHT DUES, same as at Hobart.

TOWAGE RATES.—To or from the Heads, for the first 100 tons, 2s. per ton; for every additional ton up to 300, 1s. 6d.; for ever additional ton up to 500, 1s.; for every ton above 500, 6d. Steam will not be got up to tow a vessel down alone for less than £10; or two or more vessels together for less than £12 10s. The pilotage of vessels towed by the tug will be charged at two-thirds of the rate for sailing vessels. When two vessels are towed together a reduction of one-fifth of the usual charge to the smaller one will be made to each, subject to the above minimum.

SIGNAL FOR STEAM TUG.—The rendezvous or chequered flag, hoisted where best seen. When this signal is made by a vessel entering port, the tug, if in Launceston, will be telegraphed for on that vessel's account.

FREE PORT.—Vessels seeking freight or putting in from stress of weather, and not breaking bulk, are exempt from all port charges whatever, unless they employ a pilot; in which case, if they anchor below George Town, one-third pilotage only will be charged.

DIRECTIONS FOR ENTERING TAMAR HEADS BY NIGHT.

FROM THE EASTWARD AND NORTHWARD.—When within 3 miles of the Low Head, the same bearing about south, steer south-westerly, and when the leading-lights become visible, which will be on a S.E. ¼ E. bearing, a southerly course may be shaped, care being taken not to bring the Low Head Light to bear to the eastward of E. by S. until the leading-lights are in line S.E. by E. ½ E., when steer boldly in, passing the buoy on the Shear Rock close to.

FROM THE WESTWARD.—After sighting the Low Head Light, do not bring it to bear east of E. by S. until the leading-lights have been sighted and brought to bear S.E. by E. ½ E., when they will be in line, and may be run for as directed above.

PROCEEDING UP THE RIVER.—If proceeding up the river, after passing the Shear Buoy bring the leading-lights 1½ points on the port bow and look out for the white buoys and Simmons' Mistake beacon. The course from Simmons' Mistake to the Bombay Rock is S. by E., and so long as the low leading-light is in sight the vessel is outside of the buoy on this shoal. Having passed the Bombay Rock, haul to the S.E., when the low leading-light will be lost sight of, and round Garden Island close to. Do not lose sight of the high leading-light, its loss being a sign that you are nearing the Garrow Rock off George Town.

PROCEEDING OUTWARDS.—Round Garden Island close to, and without losing sight of the high leading-light haul to the north-westward. When the low leading-light becomes visible on a N. ½ W. bearing steer for it, keeping a good look-out for the Bombay Rock buoy and Simmons, Mistake beacon ; having passed the latter, steer for the Low Head Light, and when the leading-lights are in line S.E. by E. ½ E. keep them so until the entrance is passed, and shape course as required. If neither the black buoy on the Middle Bank nor the white buoy on the Yellow Rock is visible, the entrance may be known to be passed when the Low Head Light bears E. by N. ½ N. or is 4 points abaft the beam.

Vessels bringing up in Port Dalrymple must have both leading-lights in sight ; the loss of the low leading-light on a S.E. ¼ E. bearing will indicate proximity to the bank off Cordell Point. The anchorage ground is about one cable inside the line of the leading-lights in about 8 fathoms of water, the high light being open to eastward of the low one.

The best guide to the anchorage is the lead.

The leading line leads vessels close to the buoy off the Shear Reef in 24 feet at low water, and in the same depth at the tail of the reef off the Barrel Rock.

The old towers in Lagoon Bay have been blackened : the leading-light towers now answer the purpose of day marks.

METEOROLOGICAL OBSERVATORY,

BARRACK SQUARE, HOBART.

In 1886 Meteorological Observations will be recorded at (8) eight stations fitted up with first-class instruments, as follows:—Hobart, Southport, Oatlands, Falmouth, Launceston, Low Head, Circular Head, and Corinna. Second class—Mount Bischoff and Fingal with Maximum and Minimum Thermometers, and Rain Gauge. Including the lighthouses forty stations will record the Rainfall. Weather telegrams are sent daily to the Melbourne Observatory, whence is also received a daily record of the mean of the observations over the Australian Coast, and a forecast of the weather which may be expected for the next twenty-four hours in Bass Straits and the Northern Coast of Tasmania. This information is exhibited at the Hobart, Launceston, and North-west Coast telegraph offices, and is published in the newspapers.

EXPLANATION OF HOBART SIGNALS.

When a sail is sighted from the South, No. 26 is hoisted at mast-head at Albert Battery; when from East, No. 27; when in mid-channel, No. 28. When it is ascertained what the vessel is, the flag is hauled down from the mast-head, and a ball is hoisted at the yard.

No. 1 on the right, viewed from town, denotes a ship or barque
2 ,, ,, ,, ,, ,, a brig
3 on the left ,, ,, ,, a brigantine or schooner
4 ,, ,, ,, ,, a steamer

When it is discovered whence the vessel sailed, one of the following flags is hoisted in lieu of the ball:—

Union Jack—Ship of war
1 Government schooner
2 London
3 United States
4 South America
5 California
6 Mauritius
7 India
8 China
9 Western Australia
10 South Australia
11 Victoria
12 Sydney
13 Newcastle, N.S.W.
14 Queensland
15 N. Zealand (North I.)
16 N. Zealand (South I.)
17 Launceston
18 N. Coast of Tasmania
19 E. Coast of Tasmania
20 T.S.N.Co.'s s.fr.Mel.
21 T.S.N.Co.'s s. from Sydney.
22 Whaler (colonial)
23 Whaler (foreign)
24 Ves. returned to port
25 Ves. with Emigrants
26 W. Coast Tasmania
27 Foreign Man-of-War

When two or more ships, brigs, or schooners are coming in from the same place, a white pennant pierced with red is hoisted under the flag.

When the mail steamer arrives at King George's Sound No. 9 will be hoisted at the mast-head; when off Cape Borda or at South Australia, No. 10 will be hoisted at the mast-head; when off Cape Otway, or at Melbourne, No. 11 will be hoisted at mast-head; when off Low Head, or at Launceston, No. 17 will be hoisted at mast-head; and when the mail arrives at Hobart, No. 15 will be hoisted at mast-head. The same flags with the addition of a red pennant signify that the mail is by one of the Orient Co.'s steamers.

A blue pennant at mast-head signifies that the English and intercolonial mails, arrived at Launceston, will be delivered at the window of the Post Office, Hobart the same evening, after arrival of Express Train at 8·40 p.m. A red pennant with white ball indicates a delivery after arrival of Ordinary Train at 6·30 p.m.

When steamer from Melbourne is signalled off Low Head, a red pennant will be hoisted at the yard-arm on the left (as viewed from town) for two hours, a blue pennant if the steamer is from Sydney, and a pennant with red and white vertical stripes if from Adelaide.

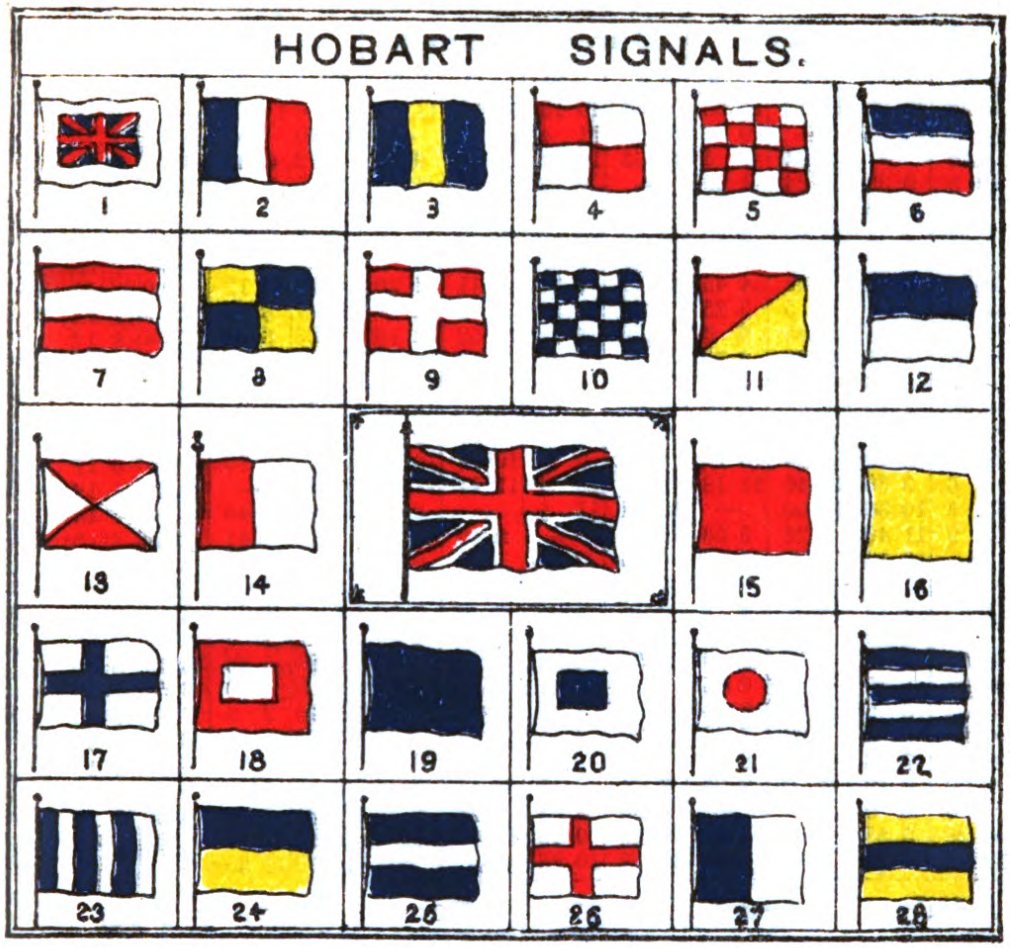

Time Signal.—Black ball drops daily at one o'clock p.m. on the Albert Battery staff, a time gun being simultaneously fired from the Queen's Battery.

When a vessel is in sight at the Heads, a flag denoting the rig will be hoisted. When the vessel has entered the Heads and it is known what port she comes from, the flag denoting that port will be hoisted above the other. A blue pennant with white ball signals arrival of a steamer from N.W. Coast; and a yellow and blue pennant steamer from East Coast.

English Mail *via* Suez.—The arrival of English Mail at King George's Sound, signalled by white pennant with red ball, C; on arrival off Cape Borda or at Adelaide, C above W; on arrival off Cape Otway or at Melbourne, C above V; when signalled off Low Head, C above B; on arrival at Post Office, a white flag with blue cross, as No. 17 Hobart.

The calculations give the average time when high-water may be expected at Laun., but the tides are so influenced by winds, etc., that the actual times of high-water will sometimes differ from the calculated ones by an hour or two. High-water at sub-ports on North Coast may be averaged as 1½hr. earlier than at Laun. It is high-water new and full moon at Laun. at 1h. 30m. p.m., and George Town 11h. 45m. a.m. The tide in the Tamar flows nearly 6 and ebbs nearly 7 hours, rising from 10 to 12ft. in settled weather.

MEDICAL.

The practice of medicine in the colony is under the supervision of a Court of Medical Examiners, appointed by an Act of Parliament. Their chief duties are to register the diplomas of persons practising medicine, and to issue licenses to dispense medicines. No one is entitled to practise for fee or reward in Tasmania unless his name is on the register of the court, or to dispense medicines unless he has the license of the court. The bye-laws of the court provide that a holder of any British diploma may be registered, or of any foreign or colonial diploma on proving that he has received a medical education equal to that prescribed by the Royal College of Surgeons of England.

The court may also grant "Letters Testimonial," after examination, to persons who have no diploma, and register them as legally qualified, but before being admitted to examination such persons must prove the same fact of medical education received as is required in the case of those registering foreign diplomas. Registration fee, five shillings. The license to dispense medicines is granted after examination, (fee two guineas), or to holders of the certificates of recognised Pharmaceutical Societies, (fee five shillings). The meetings of the court are held as occasion requires.

Medical practitioners who register their diplomas in Tasmania may be called upon to give their services to the government at the rate of fees given below, which is fixed by law :—

For giving evidence at an inquest—One Guinea.

For making a post-mortem examination—Two Guineas.

For travelling to the inquest—One Shilling a mile one way, for each mile after the first ten. Ten miles or under, no fee allowed.

For giving evidence in court of law—One Guinea a day.

For travelling to the court—Eighteen Shillings a day, and coach or railway fare.

Destitute patients may be recommended for in-door treatment by the Chairman of the Board of Management, the Chairman of the Visiting Committee, the Honorary Medical Officers, his Worship the Mayor, the Police Magistrate of the district, and the Chairman of the Benevolent Society ; they are subject to inspection by the House Surgeons, who determine their eligibility for admission as in-patients.

All applicants for out-door treatment have to apply to the Registrar of the Hobart Benevolent Society.

Town patients are not admitted before 10 o'clock a.m. or after 4 o'clock p.m., except in cases of accident or emergency.

Accidents and urgent cases are received at all hours of the day or night.

Dispensary patients must attend between 11 a.m. and 1 p.m.

Ministers of Religion and Religious Instructors have free access to patients of their respective denominations at such times as are appointed by the Board of Management. Any minister may attend any patient when requested by such patient.

The rules for visitors, which are exhibited at the Hospital gate, are as follows :—Visitors are admitted to see patients on Sundays, Tuesdays, and Thursdays, between the hours of 2·30 and 4·30 p.m., or at other times by special permission of a member of the Medical Staff of the Hospital.

Not more than two persons are allowed to visit a patient at the same time.

Babies are not admitted.

All parcels, baskets, &c., must be left with the gatekeeper during the time that a visitor remains inside the gate.

The only articles of food allowed to be supplied to patients by visitors are as follows :—New-laid eggs, fresh butter, plain biscuits, sponge cakes, ripe fruit, jelly, custard, and blanc-mange ; such articles being marked with the name and ward of the patient for whom they are intended, and given in charge to the gatekeeper. Articles so left will be given to the patient to whom they are addressed, if the Medical Officer is of opinion that they are suitable to the condition of such patient.

Visitors are requested to avoid loud talking or unnecessary noises whilst in the wards.

During the summer months the well conducted are occasionally permitted a day's leave of absence, and during winter leave is granted in special cases only.

REFORMATORIES.

THE BOYS' TRAINING SCHOOL, CASCADES, Upper Macquarie-street, was established in July, 1884, (under the "Training Schools Act") for the reformation of criminal youths under magisterial sentences. Besides ordinary school teaching for about three hours a day, the boys are instructed in agriculture, gardening, and carpentering, with a view to apprenticing them at the proper time, under Licence, to suitable employers. A mark system is adopted which has a very encouraging influence, stimulating the lads to good behaviour and industry. The Institution is governed by a Board of Managers—the Revs. R. Maclaren Webster (Chairman), G. F. Archer, J. W. Simmons, Messrs. John Macfarlane, Theophilus Cane, and J. B. Mather, Secretary. The Mayor of Hobart is a member *ex officio*. There are 26 boys in the Institution.

GIRLS' TRAINING SCHOOL REFORMATORY, Barrack Square, Davey-street, Instituted 1881 by the Ladies' Christian Association. President, Mrs.Macfarlane. Treasurer, Mrs. Wilson; Secretary, Miss Wright. The inmates are girls committed for their first offence by the Police Magistrate, when under 18 years at committal. They are instructed in domestic work. Matron—Mrs. Johnstone. Sub-Matron, Miss Main.

TASMANIAN COUNCIL OF EDUCATION.

Board Room, Public Buildings, Murray-street, Hobart. Meets on the third Wednesday in every month, at 3 p.m.

Members—His Honor Mr. Justice Giblin (President); Hon. J. W. Agnew, M.L.C. ; Rev. G. F. Archer, B.A.; Rev. George Clarke ; Ven. Archdeacon Davenport, B.A.; Hon. A. Dobson, M.H.A.; Hon. P. O. Fysh, M.L.C ; James Grant ; Rev. R. D. Poulett-Harris, M.A. ; Henry Hunter ; H. A. Perkins, M.D.; Thomas Stephens, M.A. ; William Tarleton ; S. P. H. Wright ; Russell Young.

Secretary—George Richardson.

The Council of Education is authorised by 22 Vict., No. 21, and 35 Vict., No. 16, to hold examinations in imitation of the Oxford and Cambridge annual local examinations, and to confer annually two Tasmanian scholarships and the degree of Associate of Arts.

Tasmanian Scholarships.—Eight scholarships, each of the value of

£200 per annum, and tenable for four years at a British university, are founded ; of which two are annually competed for by male Associates of Arts of above sixteen and under twenty years of age, and who have resided in the colony for at least the preceding five years.

A. A. Degree.—This degree is open to persons of any age and of either sex. Candidates above nineteen years of age who take honours are placed in separate class lists, and are not eligible for prizes. Tasmanian law students, who have the degree of A.A., are exempted from a literary examination prior to admission to the bar ; and in England the General Council of Education, and the Royal College of Surgeons, accept the degree in lieu of the literary examination required from medical students, provided the Associate has passed in both Latin and Mathematics. Candidates passing in certain subjects, but not qualifying for the degree, are entitled to certificates.

Minor Scholarships for A.A.—Two scholarships of the annual value of £40 each, tenable for two years, are awarded to the Senior Associates of the year, who express their intention of studying and competing for the Tasmanian Scholarship.

Dry Scholarship.—A scholarship bearing this name is granted each year to the Senior Associate of the year, provided he declares his intention to proceed with his studies for the Tasmanian Scholarship. In the event of his declining to do so, the scholarship is awarded to the second student on the list of Associates of the year, and so on.

Exhibitions.—Five exhibitions of £20 each, tenable for four years at such schools as shall be named by the parents or guardians, and approved by the Council, are annually bestowed on boys or girls under fourteen years of age, who have not during the previous six months been pupils of a Government school, and who have been resident in the colony for two years immediately preceding the 1st June.

Gilchrist Scholarship.—A scholarship of £100 per annum, tenable for three years either at the University of Edinburgh, or at University College, London, is annually awarded to the candidate from any of the Australian colonies, or from Tasmania, who passes highest at the matriculation examination of the University of London carried on at Hobart. Candidates from Tasmania must either be natives of Tasmania, or have been resident in the colony for five years or over, and be above 16 and below 22 years of age. The next examination will take place in or about February, 1886, under the supervision of the Council of Education ; the papers being sent home for decision.

London University.—The sanction of the authorities of the London University has been obtained to the holding of Local Examinations in Hobart, under the supervision of the Council of Education, for Matriculation and for Degrees in the Faculty of Arts in connection with that University.

Matriculation at the Melbourne University.—Local examinations for matriculation at the Melbourne University are held in the July and October terms, under the superintendence of the Council, the papers being sent to Melbourne for decision. Candidates may also be examined at the February term, upon *payment* of additional *expense.*

Local Examinations in connection with the Sydney University are also held.

EDUCATION DEPARTMENT.

Minister Controlling the Department.—The Hon. the Chief Secretary.

Director of Education.—Thos. Stephens, M.A.

Inspectors of Schools.— James Rule *(Senior Inspector)*, Gerard Bourdillon, M.A.

Chief Clerk.—George Richardson. *Clerk and Accountant.*—Ed. Rowland Roe. *Clerks.*—Ronald D. Burgess, George Rule, John K. Reid. *Messenger.*—J. Tinker.

Number of schools in operation during 1884, 191 ; number of distinct children on the rolls during the year, 14,846 ; average number on rolls, 10,144 ; average daily attendance, 7,897. Total expenditure, £21,279 1s. 10d., average cost per head of scholars in daily attendance, £2 15s. 10d.; average receipts from school fees per head, ditto, £1 1s. 7½d. The average number of free scholars under instruction was 1,067 ; amount paid by the Department for their instruction, £388 15s. 0d.

Exhibitions.—Twelve exhibitions are annually awarded of the value of £16 13s. 4d. each—six to boys and six to girls—tenable for four years from

1st July. Candidates must be between ten and twelve years of age and must have attended one of the State schools for at least twelve months prior to 1st June.

By the Education Act, 49, Vict. No. 15 all property formerly vested in the Board of Education is transferred to the Minister controlling the department, and his successors. Provision is made for the establishment and maintenance of State schools, including ordinary schools, provisional, half-time, and night schools, and the Minister may also establish model schools, in which provision shall be made for the training of teachers. The system of instruction is to be, as hitherto, non-sectarian, but clergymen, or other religious teachers, are to be allowed to give religious instruction at the State schools, to children of their own persuasion. Education to be compulsory from 7 to 13 years of age, but exemption from attendance is allowed in the case of children of 11 years of age, who have been educated up to the compulsory standard. Children of school age, not coming under the exemption clauses, are required to attend school at least three days in each week. The rate of school fees, their remission in certain cases, and their apportionment among the teachers, are to be determined by regulation, and provision is made for the issue of free passes on the Government railways to school-children. The Governor-in-Council may authorise the erection and repair of school-houses. He may make rules for regulating the terms on which schools may be used for other than school purposes ; the system of instruction, including the determination of the compulsory standard, the inspection of schools, the examination and classification of teachers, and their salaries, and generally for carrying the Act into effect.

The Governor is empowered to constitute school districts, and to appoint a Board of Advice, consisting of not more than seven members for each. The Board of Advice is to exercise general supervision over the schools in its district, and to report half-yearly to the Minister on their condition. The Board is empowered to spend upon their care or improvement of schools such a sum as may be allotted for the purpose by the Minister, to appoint special visitors, to suspend teachers or close schools in cases of emergency, and to extend the compulsory distance beyond the radius of two miles. It is also to enforce the compulsory clauses.

The head teacher of every school, not being a State or Sunday-school, is required under a penalty of five pounds, to furnish to the Minister, in the month of January in each year, a nominal return, giving the sex, age, residence, and school attendance of every child attending the school during the preceding year.

REGULATIONS.

Intermediate fares are charged 3d. per mile first class, 2d. per mile second class, but no fare is charged higher than the through rates. Return tickets are calculated as a fare and half.

Passengers by freight trains dine at Parattah.

The through trains do not run on Sundays, except to complete their journey, or when desired by the Postmaster-General. The mail train does not run on Sunday evenings and Monday mornings.

Return tickets for distances of 10 miles and under will be available for the return journey on the day following that of issue; for distances between 10 and 25 miles two clear days are allowed; from 26 to 120 miles return tickets are available for 5 clear days (or one week), and from 121 to 133 miles, 11 clear days (or two weeks). Tickets from or to Hobart and New Norfolk, *via* the Norfolk Road Station, are allowed 5 clear days (or one week), as also Brighton tickets for passengers by the coach service, and all tickets to Corners. The time allowance is exclusive of Sundays.

Return tickets are not transferable, and if not used within the prescribed time, or attempted to be transferred, will be absolutely forfeited, and no allowance made on account thereof.

Parcels and goods are not booked for places marked * in time table.

Adult passengers allowed 84lbs. of luggage each, 1st class, and 56lbs. second class, of wearing apparel only. Excess luggage, or luggage not for personal use, will be charged 1s. 9d. per 28lbs. weight for the through journey, and proportionally for lesser distances.

Children under three years of age free, and under 12 half-price.

Dogs will be carried in the luggage vans only, at a charge of one halfpenny per mile and not less than sixpence for any distance.

Pleasure or excursion parties, of not less than ten passengers can on application to the General Manager, not less than three days previously to the time of the intended journey, be provided with return tickets, available to return the same day, at single fare, but no ticket will be issued at a less charge than 9d., and for children 5d.

For season ticket rates see advertisement.

FISHERIES DEPARTMENT.

This Department, under the immediate control of the Chief Secretary, has been recently created for the supervision, protection, and further development of the Fisheries of Tasmania. The resuscitation of the once famous Oyster Fisheries of this Colony, the restoration and protection of other indigenous fisheries,and the introduction of exotic species of economic value suitable for culture in this colony, are among the more important subjects that will fall within its scope, or have been already initiated by Mr. W. Saville-Kent, F.L.S., F.Z.S., the chief officer nominated to this Department, and who holds the appointment of Superintendent and Inspector of Fisheries. In connection with the Fisheries Department, a marine and fresh water hatchery, fitted with tanks, circulating machinery, and all the apparatus necessary for the hatching of marine and fresh water fish, other than salmon and trout, has been designed by the Inspector of Fisheries, and is now erected close to his residence at Battery Point. Among the operations associated with this hatchery, arrangements have been made for the experimental importation and acclimatization of the European lobster,

crab, sole, turbot, and other valuable food fishes, that there is every reason to believe would thrive in Tasmanian waters and greatly increase the value of the existing fishing industries. It is also contemplated through the medium of this hatchery to undertake on an extensive scale the artificial propagation and distribution of such important native marine fish as the real trumpeter, sand mullet, and flounder, and among the fluviatile varieties, the cucumber mullet, blackfish, and the large fresh water lobster, or crayfish of the Northern Tasmanian rivers, Practical measures with the object of restoring the formerly productive osyter fisheries of Tasmania have already been commenced through the formation, under the direction of the Superintendent and Inspector of Fisheries, on the most suitable points of the coast of Government oyster reserves, wherein breeding stocks of oysters of the best quality will be permanently maintained, and suitable provision made for insuring a productive fall of brood or spat.

RULES FOR DISTINGUISHING THE SALMON.

The following summary drawn up by the late Mr. Morton Allport from a work by Dr. Günther, of the British Museum, and revised by Mr. W. Saville-Kent, F.L.S., F.Z.S., the Superintendent and Inspector of Fisheries, will be of service to many fishermen in enabling them to test the species of any fish that may be captured by them during the salmon season:—To distinguish the salmon (*salmo salar*) from its congeners, trout (*salmo fario*) and salmon trout (*salmo trutta*):—1. Colour alone is no test. 2. The presence of teeth on the vomer (that is, along a line in the middle of the roof of the mouth from the mouth backwards), after the fish had once been to sea, proves that it is no salmon. 3. The absence of such teeth does not always prove that it is a salmon, as undoubted trout from brackish water (especially the females) lose the vomerine teeth with age. 4. The number of scales between the back of the adipose fin (the small fleshy fin on the back nearest to the tail) and the lateral line, counting obliquely forwards, is in the salmon always less than 14. usually 11 or 12 only; in salmon trout or trout 14, or more than 14, The scales of the salmon, as compared with those of the salmon trout, or trout, are also relatively much larger, and they adhere more tenaciously to the skin. 5. The number of pyloric appendages (long fatty cœca attached to the alimentary canal) in trout ranges from 30 to 45, in salmon trout from 40 to 55; in salmon from 50 to 70. The relatively small sharply-pointed head, and finer lines of the body generally, may be cited as additional points by which the true salmon may be distinguished from the large coarse-headed varieties of the brown trout frequently exposed for sale under the name of salmon, and which have been captured in Tasmanian waters, weighing as much as 28lb. The salmon trout, which more nearly resembles the salmon in its outward aspect, rarely exceeds a weight of from 10 to 14lb. It may be most readily distinguished from a half-grown salmon, or "grilse," with which it nearly corresponds in shape and weight, by the number and relative size of the scales as given in the foregoing formula.

MINING COMPANIES (REGISTERED).

(Corrected by Martin Sholl, editor "Tasmanian Mines and Mining.")

The Act in force regulating Gold Mining Companies is the "Mining Companies Act, 1884."

It provides that all Calls shall fall due on the Second Wednesday in a month.

Companies registered prior to the 30th November 1884, are not affected by the Act as regards liability of Shareholders under their Rules and Regulations.

The Secretary of Mines, Hobart, is the officer to whom application to register Mining Companies is to be forwarded.

In No Liability Companies, Shareholders "shall not be liable to be sued for any calls or contributions;" and the 119th Clause of the Act provides, that the "Manager or Agent of any such Company ordering goods for the purposes of the Company shall do so on paper, bearing the Company's name with the words 'NO LIABILITY' inscribed in colored ink across such order; and if such goods, plant, or necessaries be ordered otherwise, the person ordering the same shall be personally liable for the value thereof to the person supplying the same."

BANGOR SLATE QUARRY.

The Bangor Slate Quarry is situate at Piper's River, in the county of Dorset, beyond Turner's Marsh. It is about 26 miles by road from Launceston. The quarry is being opened up in a systematic manner, and on a large scale, the machinery and appliances being of the best description. About £40,000 have already been expended on the works. The slate is of a superior description, and commands a ready sale in the Melbourne market, but it is expected that the output will soon assume much greater proportions as the mine is opened out. A large number of workmen are employed, many of them being immigrants, imported direct from Wales, and consequently there is quite a township on the claim. An assembly room has been provided by the proprietors, and religious services are held regularly by a clergyman, who conducts them in the Welsh language. The slate is conveyed from the quarry to a shipping place at Egg Island Creek on the River Tamar, by means of a tramway, about 13 miles in length. A substantial jetty has been constructed, alongside which vessels of any size can lie at all times. It is intended to use the electric light in the workings, plenty of water power being close at hand.

THE COAL DEPOSITS OF TASMANIA.

[By G. Thureau, F.G.S., Inspector of Mines for the Government of Tasmania.]

Tasmania, which, in proportion to its area, is unusually rich in the variety and extent of its mineral wealth, possesses extensive coal measures, varied in quantity sufficient to meet every requirement, but as yet, comparatively speaking, little developed or proved. Coal has been shown to exist at numerous points throughout several of the northern districts, the midland and eastern districts, and in the southern and south-eastern districts of the island, but, except where natural facilities existed for conveyance to a market close at hand, little has been done towards working or developing any of the seams, and in many localities their real value can only be surmised. To those who desire to study this subject from a scientific point of view I can recommend a perusal of the valuable papers contributed by Mr. R. M. Johnstone, F.L.S. (the Government Statistician), and Mr. T. Stephens, F.G.S. (Director of Schools), to the proceedings of the Royal Society of Tasmania, embodying the results of many years of investigation. The object of this paper is, however, merely to give a general idea of the nature and extent of our principal known coal deposits, which I have examined and reported upon under the instructions of the Government.

As already stated, the quality of our coal measures varies greatly from an article fitted merely for domestic use to coal suitable for steam and smelting purposes. The question has often been asked whether any Tasmanian coal is equal to Newcastle (N.S.W.) coal, but it does not appear to be generally known that all Newcastle coal is not of one quality, and that, in any comparison hitherto made, Tasmanian coal from the *outcropping* of various seams has been pitted against picked Newcastle coal, taken from the heart of a seam or seams which is certainly

not a fair test. The more valuable portions of our bituminous coal measures, have never yet been uncovered, but it is certain that Tasmania does possess coal that will compare favourably with much that is raised at Newcastle, and that the facilities for mining by merely tunnelling into the sides of mountain ranges, should enable it to be exported both economically and profitably.

The absence of railways has hitherto been the sole reason why the extensive and valuable coal seams of the Fingal district have not been long since developed, but they are now likely to be fully tested in a very short time, the construction of the railway line from the Corners *via* Avoca, having supplied the desideratum and capitalists have already taken the matter in hand.

THE NORTHERN DISTRICTS.—These comprise the Mersey and Don coal deposits, and they have been worked for a considerable number of years past, furnishing an excellent domestic combustible, which gives out a good heat, but is not suitable for steam purposes as, amongst other things, it contains a considerable amount of sulphur, which quickly injures the fire bars and boxes of boilers and locomotives. So far only one seam, averaging 21 inches in thickness, has been found, but there is a probability of other seams existing at greater depths than that which has been reached by the Diamond Drill, viz., 320 feet beneath the one seam referred to.

THE MIDLAND DISTRICTS.—Of these, certain strong indications and outcrops, were quite recently examined, and, of course, they do not at present include those existing at Richmond, Jerusalem, and York Plains, or others less well known. In front of "Stonehenge House," belonging to Mr. Sydney Page, a bituminous seam was discovered in a well, which, in its perished state as occurring immediately beneath the alluvial, burnt well, and deserves further attention. In the immediate vicinity of Mr. Burbury's "Inglewood House," both a bituminous shale and the outcrop of a well-formed bituminous seam of coal occur ; the latter crops to the surface, and is partly submerged in a reservoir, and no means have been taken to open or utilise the seam, which is of a promising nature, in any way whatsoever.

Near Longford, a series of coal seams have been discovered recently, of which the lower one measures from 3 feet 6 inches, to 4 feet in thickness. As the coal occurs but a score of feet from beneath the surface, it "makes" a deal of ash, but is very useful for domestic purposes, provided it can be sold at a low price to consumers.

In close vicinity to Hamilton, a seam of good coal, suitable for domestic and blacksmithing purposes, was found in a well sunk for water in Langloh Park ; it is reported as being from 4 feet in thickness, and it has not been worked.

THE EASTERN DISTRICTS.—These comprise the extensive and very valuable coal measures in the Fingal and Mount Nicholas districts. The existence of quite a number of seams has been proved, and it is quite possible that the system extends much further to the south-east of Fingal, than what has already been discovered. The Mount Malcolm seam is located but 2½ miles north-east of Fingal, and measures 12 feet in thickness, and other seams occur both above and below it of a lesser size. The main seam (which, I believe, extends right across the valley

of the Break o'Day River, in which it has been removed by denudation, to the main seam "Killymoon" at Mount Nicholas) has been but moderately prospected in two or three places, and the coal has improved gradually with the greater distance, such was followed in under the solid roof of sandstone. The quantity of a fair description of coal appears almost unlimited.

The Mount Nicholas coal deposits occur about eight miles north-east in a direct line from those at Fingal, and they comprise quite a number of seams, of which the main or "Killymoon" seam is the one that is receiving of late most attention. It is not less than 14 feet thick, and it has been followed by a tunnel for a good distance in its dip to the north west, and so satisfactory has been the improvement of the coal to a Melbourne syndicate, that they have offered to the Government a sufficient guarantee if the latter would provide locomotives and rolling stock to deliver 1,000 tons per week at Launceston for shipment, or home consumption, besides which other parties (the Durham C.M. Co.) are energetically engaged in opening their mines in the vicinity for furnishing coal of a superior description to the consumers in or outside the colony. It appears now that these deposits extend as far north-east as German Town, and south-west to the Deep Creek. In 1883 I recommended these very valuable deposits to the attention of the public, as "a highly valuable coal deposit," and strongly urged the "inauguration of cheap and rapid means of transit, to where it is so much required," which is about being realised to the benefit of all concerned.

THE SOUTHERN DISTRICTS.—Of these, the Sandfly coal seams occur near the summit of the dividing range of the Huon and North-West Bay River, at an elevation of nearly 800 feet above sea level. The main seam is about 4 feet thick, it is of shaly character, interspersed with bituminous patches and seams, which become more and more frequent as it is being followed into the hill. Tests have been made, and the results are satisfactory of its being a superior bituminous description of coal, now waiting development.

The Port Cygnet coal seams (2) occur as an outcrop on a north-eastern spur from Mount Cygnet, and the two seams opened are now, I believe, in full operation by a Melbourne syndicate. Near the surface at the upper level is of an anthracitic character, becoming more bituminous as to its being developed by proper and systematic workings. The lower seam affords about 2 feet 4 inches good marketable coal, and the upper seam, 64 feet vertically above the former, gives over 3 feet of similar coal.

The New Town (anthracitic) deposits also comprise several seams, of which, however, two have had, and are having, most attention. In consequence of the occurrence of "vents" of volcanic rock, this coal has been altered in its mineral character, and thus transmuted into anthracites, which do not ignite readily, and require a good deal of wood to make them burn ; when burning they evolve a great heat, very little smoke or smell, but they leave nearly as much ashes in bulk, as before burning. They are principally a domestic coal, and can be used for burning limestones, and probably a'so for smelting purposes. In my opinion, as expressed in my report to the Government, no other deeper

seams were likely to exist, owing to the close vicinity of the intrusive basalts, or older greenstones, which views have been fully borne out by the bore, made in that locality, by means of a diamond drill, which after passing through the underlying mud and fossiliferous limestones, bottomed on greenstone at nearly 600 feet from the surface, thus solving a problem so easily deducible from observation, of the actual mode of occurrence at New Town.

WATER SUPPLY, HOBART.

The sources of water supply are derived from Mount Wellington, the most distant being known as the Plains' Rivulet, one of the tributaries of the North West Bay River, situate about eleven miles from the city, A pipe head well is constructed on this stream commonly called, "St. Crispin's Well," at an altitude of about 2,000 ft. above the sea. The water is conveyed thence towards the city by means of an iron main for a distance of 5¼ miles, laid down on a track cut on the sideling of the mountain, and having a pretty regular grade of from 80 to 100 ft. per mile, and which discharges itself into a basin known as the "Bower" at an elevation of 1,521 ft. above the sea. This main collects several additional supplies on its way by means of branch pipes attached to small masonry dams constructed in the gullies, the principal ones being called "Long" Creek and "Fork" Creek. At the latter place an extensive masonry receiving well is constructed. This main is estimated to carry between 4,000,000 and 5,000,000 gallons per diem. From the "Bower" basin the water is conveyed for over two miles by means of a very substantial freestone aqueduct crossing the gullies by means of handsome masonry bridges consisting of flying arches upon which is placed the conduit cut out of the solid stone. This aqueduct again discharges itself over a point of rocks known as "Murray" Hills or "Gentle Annie" Falls, the trough being cut out of the solid rock in places, and through and over which the water descends with great velocity into the "receiving house," or what is the principal pipe head well, for the mains directly connected with the City. This Receiving House is situated at an altitude of 540ft. above the sea, and stands near the Storage Reservoirs on the Sandy Bay Rivulet, and from it two ten inch mains are laid for a distance of three miles to supply the Distributing Reservoir in the city, situated at Hill-street, at an elevation of 320 feet, above sea level, and from whence the water is reticulated throughout the city and suburbs. The surplus water in the Receiving House, not conveyed by the mains into the city, overflows into the storage reservoir which is thus kept pretty constantly supplied with a fresh stream of water. The Distributing, or Service Reservoirs, situated in Hill-street at an altitude of about 300 feet above sea level, are capable of containing together about 771,000 gallons. The present consumption of water by the

citizens and others, amounts to about 60 gallons per head, per diem, which may be considered a most liberal supply. The reticulation of the mains has been considerably extended during the past year. An additional Storage Reservoir will now be constructed to supplement the present one, capable of containing over sixty million gallons, and it is estimated to cost, including the necessary adjuncts, about £30,000. The plans for this new reservoir have been prepared by the Director of Waterworks, and preliminary works have been commenced. Its site will be immediately above the existing reservoir, and when the latter is put in proper repair, they will together contain over 100,000,000 gallons, or between two and three months' supply. The Storage Reservoirs are seldom called into use, but are a provision in case of drought. The daily supply from the mountain, as a rule, generally exceeds the consumption which is about one and a half million gallons per diem. The present Storage Reservoir is still stocked with a fair supply of English perch, placed in it by the liberality of the late Morton Allport, Esq. Permission to fish under certain regulations, from the first of January to 31st August, both inclusive, may be obtained from the Town Clerk, who has authority to issue tickets, price 5s., entitling the holder to use one rod and line on four occasions.

An additional source of water supply—the original one for the city—is obtained from the creeks at the Cascades, the water from which is collected in a Service Reservoir, situated on the Cascade Road. This reservoir is connected with the city reticulation, and is a valuable adjunct to the newer, and more extensive works. About £25,000 has lately been expended in improving the water supply by constructing aqueducts, new Receiving Wells, Service Reservoirs, and laying new iron water-mains, the work being designed and supervised by the Director of Waterworks, Mr. C. W. James, C. E. Extension of mains, and sundry improvements are continually being conducted.

LAUNCESTON IN 1884,

BY HENRY BUTTON, ESQ., MAYOR OF LAUNCESTON, 1885.

LAUNCESTON MUNICIPAL LOANS.

The Launceston Municipal Council has authority to borrow money under 10 distinct Acts of Parliament, as under:—

	MAY BORROW.	HAS BORROWED.	BALANCE.
Water	£65,000	£64,440*	£560
Town Hall	6,000	6,000	—
Streets...	10,000	10,000	—
Public Works	30,000	5,380	24,620
Sewerage	52,526	36,766	15,760
Victoria Square ... ... Improvement ...	500	—	500
	£164,026	£122,586*	£41,440

*Of this £3,950 has been repaid.

The rate of interest ranges from 4 per cent. on a small amount (£1,300) to 6 per cent., giving a mean of 5¼ per cent.

THE GROWTH OF THE TOWN.

Commencing with 1874, and taking the two subsequent quinquennial periods, we get the following results :—

Years.	Annual value.	Rates.
1874	£62,559	£8,356
1879	74,300	12,131
1884	109,038	16,576

It should be stated that during the last two years, 1883-4, the Council reduced the annual assessment of the town 10 per cent. each year, to bring it more into unison with the general assessment of the colony. But for these reductions the annual value of property within the town would now exceed £120,000, being an increase of 100 per cent. within 10 years. Such an advance is probably unprecedented even in Australian towns, many of which have grown with marvellous rapidity by the sudden development of mineral wealth. The unexampled progress of Launceston is doubtless mainly owing to the extensive prosecution of gold and tin mining, an industry which is becoming increasingly productive. The present population is about 15,000.

	Imports.	Exports.	Duties.
1874	£553,663	£444,550	£80,968
1884	753,972	822,884	132,883

It will thus be seen that while the imports have increased nearly 50 per cent. during the 10 years, the exports have almost doubled in value. As has already been stated, this augmentation is in great measure owing to the development of mining, especially of gold and tin, the values of which for the same periods were :—

	Gold.	Tin.
1874	£10,512	£7,478
1884	131,683	301,423

The Waterworks have cost £64,440, less £3,950 repaid. With this a substantial dam has been constructed across St. Patrick's River, 13 miles from town, at an elevation of 1,150ft., with an aqueduct of stone and cement nearly three-quarters of a mile long, and passing through a tunnel 12 chains, leading into the head of Distillery Creek. A second dam has been formed across this creek five miles from town, 314ft. above high water. From this point there are two 15in. mains (nine miles) running into Launceston, one of them having a short temporary section of 12in., by which three large reservoirs are supplied, the water being distributed by mains of various dimensions, aggregating a length of about 23 miles. There are five suburban water districts—St. Leonards (which has an independent supply by a third main from the creek), Mowbray, Invermay, Trevallyn, and South Launceston, having a total annual value of upwards of £7,000, all of which are liable to water rate.

Sewerage works have entailed an expenditure of £36,766, for which there are 17½ miles of main sewers of stone, brick, or earthenware pipes of various dimensions. The principal sewer—that running along Margaret-street to the river—is seven-eighths of a mile long; it is 4ft.

6in. in diameter at its present commencement at Howick-street, increasing to 10ft. wide by 8ft. high at its outlet. This sewer alone has cost £12,000.

The area of the town is 3,340 acres. There are 45 miles of streets, of which five miles have been completed, 16 miles partially made, and 24 miles in a state of nature. There are two miles of cement foot-paths; 11½ miles of full width and nearly two miles of half width asphalt paths, 18 miles gravelled paths, and 60 miles in a state of nature.

The slaughtering establishment embraces an area of over two acres, on the buildings and appliances of which about £3,000 has been expended.

Public parks, squares, and reserves embrace more than 100 acres, on which the outlay has been £3,000.

The stone quarry, at which metal is obtained for the streets, involved an expenditure for plant, etc. (including steam-engine, turbine, rock-drill, and two stone-crushers, of £2,000. The materials and machinery on hand in connection with this department (including a new steam-roller) have cost £2,000 beside.

In addition to which the Town Hall and Cameron-street properties are worth at least £14,000, and Public Swimming Baths have been provided at a cost of about £1,500.

There are 256 public gas lamps provided by the Launceston Gas Company for lighting the streets.

RECENTLY ERECTED PLACES OF WORSHIP IN LAUNCESTON.

The increase in the number of churches and places of worship, is a distinctive feature in the recent progress of Launceston. The sitting accommodation is, in fact, now beyond the requirements of the population ; but the extension has been the result of a desire to replace the structures which met the needs of the early inhabitants by churches more in keeping with the improved architecture of ordinary dwellings and other buildings, which have been erected for secular purposes during half-a-century of progress. This desire has been greatly aided by private religious zeal and liberality, undertaking the total cost of erecting handsome structures for religious services ; and, in other cases, congregations have liberally promised the means of building a new church, with a view of providing more for future than for present requirements. The ever varying development of new forms of bringing religious influence to bear upon the masses has led to one of the most recent additions which provides a large accommodation in the poorest part of the town. Within the last two years four places of worship have been erected, short descriptions of which, with particulars of cost, and date of opening, may prove of interest.

THE LAUNCESTON TABERNACLE.—A Baptist Church in Cimitiere-street, erected at the charge of Messrs. William Gibson and Son, of Perth, is a rectangular building of brick, with a bluestone basement. The front, which is Corinthian in style, is composed of buff-colored bricks and freestone pillars, with very artistic capitals supporting a projecting entablature of freestone. The entrance leads to a lobby, with staircases on each side, giving access to a gallery across the front, and facing the platform. The church is 90ft. by 57ft., and, with the gallery, will hold 800 people. There is an absence of any ornamentation within, the walls being plain, the ceiling flat, and the platform unadorned. It has a sloping floor, which gives a good view of the platform. At the rear of the church are two vestries, and a large schoolroom. Mr. H. Conway, of Launceston, furnished the design, and the builder was Mr. James Hills. On the 7th of June, 1883, the foundation stone was laid by Mrs. Gibson, of Native Point, and the church was opened on the 26th of May, 1884. The cost of the building, exclusive of the internal fittings, was £5,719. The first pastor is the Rev. A. Bird, B.A.

THE TEMPLE.—A Christian Mission Church in Wellington-street, erected by Mrs. Henry Reed, of Mount Pleasant, is a Gothic design though having more than the usual modern variations of detail. It is built of brick, with freestone foundations, and a base course of Footscray bluestone, the openings and projections of the designs, being picked out in freestone. The front, which is 59ft. wide, and 80ft. from the ground to the finial of the belfry, is divided into three bays by semi-octagonal piers, the masonry of which is banded, and terminates in pinnacles. At each side of the front is another pair of piers, terminating in small spires. Above the main entrance, which has a pair of Gothic doors, is a Gothic window, divided into three lights by two columns, and having a piece of blank tracery at the top of the arch. Fifty feet from the ground, a clock is set in the front with an illuminated dial, 5ft. in diameter. The front is surrounded with an open belfry, terminating in a pinnacle. All the detailed ornamentation of the front is composed of white stone, from the Ti-Tree quarry, which harmonises very well with the pale colored bricks, selected for the body of the work. There is a spacious vestibule in front, with staircases leading to a gallery running round the church, and supported upon very pretty pillars, with ornamental blackwood beams. The church is 80ft. by 48ft., and the corners are rounded off inside, to form quadrants. All the fittings are of blackwood and cedar polished, very artistically cut, and the whole of the internal decorations are tastefully executed. Both ground floor and gallery slope to the platform. There is accommodation for 1,200 people, with capacity for extension, and the total cost was £8,909 10s. The foundation stone was laid in July 19th, 1883, by Mr. J. L. Smith, of Cambock, and the church was opened on July 3rd, 1884. Mr. F. Tyson, of Launceston, was the architect, and J. T. Farmilo, the builder. Mr. D. W. Hiddlestone is the first pastor.

CHRIST CHURCH. — A Congregational Church in Frederick-street, opposite Prince's Square, is a Gothic structure with a striking spire, built of red brick, with white freestone facings. The architecture is mixed, though the Gothic prevails, but the design is exceedingly pretty when viewed from the open square opposite. The colors of the material

used in building harmonise well, and the spire, which is 125ft. high, is a very graceful piece of work, admirably accommodated to the general design. Few churches in Tasmania have a more pleasing effect, from the design and decoration of the interior, than Christ Church. It is 100ft. long, by 46ft. wide, the floor sloping gradually towards the platform, and the roof being carried over in a single span with two semi-springs at the sides. There is only one gallery, which is immediately over the entrance, and faces the platform; and the organ is placed in a handsome alcove at the rear of the platform, the choir sitting behind the pastor's desk. Rows of Gothic windows at the rear admit a "dim religious light" through the cathedral glass, with which they are glazed, and the color of the timber fittings and ceiling are very restive and harmonious. At each side of the platform there is a vestry and a central opening above admits more light through illuminated glass. One of the Gothic windows on the eastern side has been fitted with illuminated glass, by Mr. C. S. Button, now of Scottsdale, Mrs. Calvert, of Hobart, and Miss Helen Button, the present organist, in memory of their deceased father and mother. Mr. W. S. Button was one of the first deacons of the old church, and the first Mayor of this town. The foundation stone was laid by the pastor, the Rev. W. Law, on March 8th, 1883, and the church was opened on October 20th, 1885, the Rev. George Clarke, of Hobart, preaching the opening sermon, the collections at the opening services being £1,100. The architects were Messrs. Grainger and D'Ebro, of Melbourne, and the builder, Mr. James Hills, the total cost being about £7,000. The Rev. W. Law commenced the thirty-third year of his ministry at the opening of Christ Church.

THE SALVATION ARMY BARRACKS.—The meeting-hall of the Salvation Army, in Elizabeth-street, West, is a large wooden building erected in a populous neighbourhood. A plain rectangular structure, the only relief being two towers, 50ft. high, on each side of the front, with ball-cemented tops, from which the "army" banners wave at the end of tall flagstaffs. The building is 103ft. long, 45ft. wide, and 30ft. from floor to ceiling, providing plenty of air space and accommodation for nearly 1,500 people. It is well lighted and ventilated, and offers sufficient facilities for rapid egress in a large front entrance and two side entrances at the rear. The building was erected by George Selby, from his own designs, and cost £1,500. The memorial stones were laid by "Marshal" Booth, and the Mayor of Launceston, H. Button, Esq., on June 29th, 1885, and the barrack was opened by "Marshal" Booth on 17th October, 1885.

TO FIND THE TONNAGE OF SHIPS.

Multiply the length of the keel, taken within the vessel, or as much as the ship treads upon the ground, by the length of the midship beam, taken also within, from plank to plank ; and that product by half the breadth, taken as the depth. Then divide the product by 94, and the quotient will give the tonnage.

SUPERFICIAL FEET IN A BOARD OR PLANK

Is known by multiplying the length by the breadth. If the board be tapering, add the breadth of the two ends together, and take half their sum for the mean breadth and multiply the length by this mean breadth.

METHOD OF PRESERVING FRUIT,

For which the Medal of the Royal Horticul. Socy. (Eng.), was awarded: Pick the fruit from the stalks; put them into the bottles. Put one drachm of alum into four gallons of boiling water; let it stand till it is cold. Then fill the bottles and bung them tight; put them into a copper of cold water, and heat it to 176 degrees. Then tie them over with bladder, and seal them.

COUNTRY DISTRICTS.

The colony of Tasmania is divided into nineteen rural municipalities and thirteen police districts. Seven councillors are, in the first instance, elected by the ratepayers of the respective municipalities. Two councillors retire annually on the second Friday in December for two successive years, and every third year three retire; in each case they are eligible for re-election. Elections are held on the Thursday preceding the second Friday in December. The councillors elect one of their number as Warden, whose term of office extends over one year. All powers by law vested in Police Magistrates are by Act of Parliament vested in the Warden while holding office, who is an *ex officio* Justice of the Peace for Tasmania while he holds the office of Warden; and the Governor has the power of appointing the councillors to be justices of the peace within their respective municipalities during the term of office.

Every male or female of the age of 21 years, whose name is on the Assessment Roll, as the owner or occupier of any property within the Municipality, is entitled to vote in the election of Councillors, in accordance with the following scale.

Scale of Votes.—Under £30, 1 vote; £30 to £80, 2 votes; £80 to £160, 3 votes; £160 to £240, 4 votes; £240 to £360, 5 votes; £360 to £460, 6 votes; £460 and upwards, 7 votes. No elector can have more than seven votes in any district, and joint owners or occupiers cannot have more than seven votes amongst them.

CAMPBELL TOWN WATER DISTRICT.—Trustees—C. H. Leake (chairman), F. Hart, D. Taylor, James Gibson, R. Jones. Sec., T. H. Power. Rate, 4d. The Campbell Town Waterworks are now completed, at a total cost of about £12,000. The erection of this dam has established a lake containing an area of 1,200 acres, of an average depth of 15ft., insuring a perennial stream in the Elizabeth River, sufficient for a supply of water to a large city, in addition to irrigating a very considerable area of land. The great drawback to a summer residence in Campbell Town has thus been removed. Great sport is anticipated, as the lake is already swarming with wild ducks and swans. The new road from Campbell Town to Swansea passes along the margin of the lake.

MINERAL RESOURCES.—The Mount Bischoff Tin Mining Company, H. W. F. Kayser, Manager: C. H. Hall, Assistant Manager; F. A. Horne, accountant; A. A. Littler, Forwarding and Receiving Clerk, is registered. Capital £60,000, in 12,000 shares; paid up, £29,600; dividends paid to December, 1885, £594,000. The Mount Bischoff Tin Mines were discovered in 1872 by Mr. James Smith, now residing in Westwood, Forth (see Fenton's History of Tasmania). A line of railway, a mile in length, connects the township with the company's mine, over which the crushing stuffs and tin sand is conveyed to the batteries and dressing sheds by a 25 horse power locomotive. There are 55 head of stampers constantly at work. The ore dressing appliances are unrivalled in the colonies, and compare most favourably with those of the old world. The average yield of ore per year is 2,500 tons. The ore is crushed and dressed fit for the smelting furnaces, at a cost of £14 per ton. About 270 men and 30 boys are regularly employed by the company. Systematic and extensive prospecting has proved enormous

deposits of rich stanniferous ground, and the mine is now acknowledged to be the richest in the world. The other principal mines are the Stanhope, West Bischoff, North Bischoff Valley, Bischoff Extended, Waratah Alluvial, Phœnix Alluvial, Magnet, and Bischoff Silver Lead, on all of which operations are being carried on. Antimony, galena, copper, and other valuable ores, are found in many parts of the district. Nearly the whole of the country to the west and north-west of Mount Bischoff has been proved to be auriferous, and gives employment to a large body of men, many of whom have found some very rich patches of alluvial gold. The gold taken from this district during the last three years is valued at £120,000. A company was recently formed at Waratah to work a rich quartz reef, which is situated at a place known as Hall's Creek, 25 miles north-west of Bischoff; 25lbs. of specimens taken from the reef, yielded over 40ozs. of gold. A large outcrop of Bismuth was discovered some years ago at Mount Ramsay, 12 miles south-west of Bischoff, and several sections were taken up, but the proprietors have done very little towards developing their valuable property.

The township of Waratah contains a population of about 1,800. There are twenty-five business places, the principal of which are three large hotels, one temperance hotel, six large general stores, butchers, bakers, etc. The surrounding country is covered with a dense forest of myrtle ("fagus cunninghamii"), sassafras ("atherosperma moschatum"), celery-topped pine ("phyllocladus rhomboidalis"), beach ("eucryphia billardieri"), and horizontal ("anodopetalum biglandulosum"). The view from the summit of Bischoff over the vast expanse of beautiful variegated foliage, with mountain peaks rising up in all directions, is admitted to be one of the grandest sights in the colony. Persons interested in botany would find this district an excellent field for labour; an almost endless variety of small plants, ferns, and moss, may be found in the gullies and creeks about the township. The Gordon lily ("blandfordia marginata"), Waratah ("telopea truncata"), and laurel ("anopterus glandulosus"), grow in abundance in different parts of the district. The land in the vicinity of the township is very fertile, and vegetables are grown with but little trouble, thus proving that myrtle land is suitable for cultivation.

CONVEYANCE.—Webster's mail coach leaves the British Hotel, Hobart,

9 a.m. daily (Sundays excepted). Running to Honeywood, and returning following morning, leaving Honeywood at 7·30; the coach leaves Franklin at 9·30, and Victoria at 10·30 a.m. daily; arriving at Hobart at 3·30 p.m.

STEAMERS.—The s.s. *Minx*, and s. s. *Pearl* run twice a week between the Channel and Huon River Settlements, and Hobart. The s.s. *Huon* leaves Shipwrights' Point for Hobart on Tuesdays and Fridays, at 8 a.m. A conveyance leaves Franklin in time to catch this steamer.

SAW MILLS.—There are fourteen saw mills in the district cutting large quantities of timber for home consumption and for exportation.

MANUFACTORIES.—Jam manufactories at Franklin and Port Cygnet and at Shipwrights' Point.

SHIPPING.—There are twenty-two vessels, averaging about 50 tons burthen each, trading between the Huon district and Hobart. These vessels make two or three trips each per month, carrying large quantities of agricultural produce, timber, and fruit.

COAL of good quality is being worked at Gardiner's Bay, the seam being from 2ft. to 4ft. 6in. thick; 300 tons were raised during the year 1882.

THE HUON.

To the visitor or tourist a summer trip to the Huon River is a delightful excursion. The best way to see the scenery, both by water and by land, is to take the steamer from Hobart to Franklin, and return by coach. The steamer leaves the wharf at Hobart at 8 a.m., and keeping close to the western shore of the Derwent for about twelve miles, enters D'Entrecasteaux Channel, after passing many small islands of much beauty and singular formation, and stopping occasionally to land passengers or freight, Huon Island, at the entrance of the River Huon, is passed, and soon Port Cygnet is reached. The bay or estuary of Port Cygnet is deep and well sheltered, and would afford safe anchorage to a large fleet of ships. Crossing to the other side of the river the steamer arrives at Shipwrights' Point, where a regatta is held annually. The rising settlement of Geeveston, with its sawmills, orchards, etc., lies to the left, and would well repay a visit. On leaving Shipwrights' Point the steamer crosses a bar, and at about 5 p.m. arrives at the capital of the district, Franklin—so named in honour of Sir John Franklin, the great Arctic Navigator, who was Governor of Tasmania from 1837 to 1843. The town of Franklin is built on the western bank of the river, and extends in a somewhat scattered manner for about a mile. Good hotel accommodation may be had here, the Temperance Hotel especially has a reputation for attention and comfort, and is much frequented by tourists, as its visitors' book amply testifies. A few days may be pleasantly spent at Franklin and its neighbourhood. The visitor will probably pass some of his available time in a boating excursion round Egg Island, or to the township of Victoria, a few miles higher up the river, and he will be charmed by all he sees around him, more especially by the mirror-like effects of the water. Every object is reflected with wonderful accuracy of colour and minuteness of detail, the overhanging trees and foliage in all their fantastic forms, the tints of the clouds, and colour of the sky, with the green of the orchards and gardens beyond, together form a picture

which will never be forgotten, and will be frequently recalled to the mind's eye as a "thing of beauty and a joy for ever." At the back of Franklin is "The Tram," a road made for the conveyance of timber from the heart of the primeval forest. The lover of nature will be attracted to this spot by its gigantic trees, its ferns of all sizes in wild profusion, its mossy glens, and by its dense solitude, broken only by the sound of the woodman's axe. An excursion may also be made to the fishing grounds below the bar, where fish are generally plentiful, and the shore offers facilities for picnics. Peacock's jam factory is also an object of interest; here much of the fruit produced in the district is preserved by steam power, and is exported to the neighbouring colonies. Leaving Franklin by coach we travel for about five miles near the bank of the river, and crossing a substantial bridge, arrive at Victoria. At this place the river is much narrower, and the water runs more rapidly. A pleasant stay may be made here, the Picnic Hotel being noted for its good accommodation for travellers and visitors. The country around consists of fine orchards and pasture land, reminding one of a country district in one of the Southern counties of England. Brown trout are sometimes caught in this locality. The journey back to Hobart is made through mountain and forest scenery of great beauty. The road runs through acres of gigantic ferns and picturesque mountain gorges, and in some places distant views of the open sea are obtained. Hobart is reached about 3·30 p.m., and the traveller is generally delighted that he has had an opportunity of seeing the many interesting features of the Huon district.

BEACONSFIELD.

Beaconsfield, the third town in importance in Tasmania, is situated on the West bank of the River Tamar, and three miles from the shipping place, which is at Beauty Point Jetty. The distance from Launceston is about twenty-eight miles by road, and thirty miles by water. Distance from George Town ten miles, that is to say, three miles to the jetty, and seven miles by water from the jetty to George Town. The town covers an area of about 400 acres, and is built upon mostly level ground—with a few undulations—and is at the foot of Cabbage Tree Hill ; it consists

of one main street, about one mile and a half in length, with several cross streets. There are upwards of 700 houses and tenements in the town. The population is estimated at 1,700. There are five places of worship, viz., Church of England, Presbyterian Church, Wesleyan, Primitive Methodist and Baptist. Three commodious buildings are used for public meetings, entertainments, etc. Two Templar Lodges are established in the town, also a lodge of Oddfellows, M.U. The "Sons and Daughters of Temperance" have also a lodge, and there are two Bands of Hope, one Rechabites', and one Foresters' Lodge. The National Bank of Tasmania has a branch at Beaconsfield, and there are three Life Assurance Agencies—the Australian Mutual Provident Life, the Mutual Life Association of Australasia, and the Colonial Mutual. There is a daily mail to Beaconsfield. Travelling accommodation.—Steamers ply daily between Beauty Point Jetty and George Town ; also a conveyance by road to Launceston.

THE GOLDFIELD.

The goldfield covers an area of about 600 acres, exclusive of the Blue Tier (Salisbury) portion. About 600 miners are employed, the Tasmania Co. alone employing about 200. Six quartz claims are in work and four alluvial. The quartz claims give employment to one battery of fifty head and one of ten head of stampers, and the alluvial claims to six batteries of fifty-eight stampers in the aggregate. In all, there are eight batteries on the field, with a total of 108 head of stampers. Seven are driven by steam power, and one by water. The Salisbury portion of the field is five miles from the town. Four quartz claims are in full work and one alluvial. The Tasmania Gold Mining and Quartz Crushing Company, Beaconsfield, was formed October, 1877. Capital 3,000 shares of £5 each, 300 fully paid up, and 2,700 contributing. Capital of the Company increased in June 1881 to 30,000 shares of £5 each, 3,000 paid up, 27,000 contributing paid up to 24s. Since formation of Company 121,513 tons quartz have been crushed, yielding 8 tons 1cwt. 3qrs. 14lbs. 7oz. retorted gold, value £579,573 19s. 1d., out of which £357,750 have been paid in dividends, the reserve fund amounts to £6,650.

Office of the Company, Mining Chambers, Patterson-street, Launceston.

DIRECTORS.—W. Hart, M.H.A. (Chairman), the Hon. A. Douglas, M.L.C. Hon. F. W. Grubb, M.L.C., J. H. Hart, and C. B. Grubb ; Robert H. Price, Manager ; Joseph Davies, Mining Manager ; Samuel Wilson, Battery Manager.

LEFROY.

Lefroy has a population of about 600. It is distant from Launceston by road 27 miles, from George Town by road 11 miles, with coaches on alternate days to Launceston, and also to George Town to connect with the steamers which ply from that place to Launceston. There is a daily mail, and a telegraph office ; two substantial places of worship, Church of England and Wesleyan, a public school under the Board of Education, and one private school.

THE GOLDFIELD.

The principal claims are the New Chum, and the West Chum, each of which has a substantial battery. The goldfield is scattered, and covers an area of about 1,000 acres.

Bailiff of Crown Lands.—

Steam Communication between Hobart and the West Coast Ports is irregular and only occasional since the failure of the Companies.

Mining.—The goldfields are those of Corinna, north of the Pieman River, and King River, east of Macquarie Harbour. The principal auriferous localities comprised in the former are the Whyte, Donaldson, Savage, and Lucy Rivers, tributaries of the Pieman, and the Castray, a tributary of the Whyte, about 28 miles N.W., together with Long Plain and the Specimen Reef Country, some 25 miles north of the Pieman. These diggings have yielded a large quantity of alluvial gold since their discovery, five years ago. Here, also, is situated the Rocky River, the scene of the discovery in 1883 of the large nuggets, 243oz., 144oz., and 40oz. respectively, besides a number of smaller ones. In spite of all the difficulties encountered by prospectors and diggers in such a country, and the difficulty of carriage of provisions, new discoveries of much promise are constantly being made.

The quantity of gold, approximately ascertained, derived from Corinna for the 12 months ended 30th June last, was 1,140oz. On the *King River* fields, the operations of prospectors have, as yet, only partially and imperfectly extended to a few localities comprised within a radius of eight or nine miles; and many very rich, though limited, patches of gold have been found, besides several very promising reefs. At Mounts Lyell and Sedgwick, in the West Coast Range, a particularly promising auriferous country is being slowly developed—

very slowly—on account of the total absence of any pack track or means of transport of supplies through the extremely broken, densely timbered, and boggy country. And here three valuable alluvial claims are being worked by means of hydraulic sluicing by co-operative parties. The approximate quantity of gold obtained on the King River fields during the same period was 1,250oz., though a much larger quantity, of which no precise record could be obtained, is known to have been taken away by diggers from all these gold fields.. The tin region between the Heemskirk Range and the sea coast, comprising some 15 or 20 square miles, has disclosed large quantities of tin both alluvial and in "lode." In several of the mines which were undertaken by Companies, lodes were found containing very rich patches of ore, alternating with very poor spaces. And a very great expenditure was incurred in road-making, and the erection of buildings and machinery, the transport alone of material entailing an almost ruinous expense, in the excessive charges for freight. The consequent exhaustion of the available funds of these companies in premature work, and their inability, therefore, to explore the lodes at any sufficient depth to test their value has caused the entire collapse of the undertakings. The lodes still remain undeveloped and untested, except in one instance, at any depth which, for tin mining, can be deemed other than mere surface work. The forfeiture of the greater number of these sections, having thrown them open to the public, co-operative parties of miners have taken up many claims of 20 acres each for alluvial working, and these are now operating with great success. The Act passed in the recent Session of Parliament to enable tin "diggers" to work alluvial ground on a similar system to that for gold, under Miners' Rights, which has been as yet, only applied to Heemskirk and the strip of coast north of the Pieman River, is expected to encourage a considerable industry in that direction. Lodes of galena, rich in silver, and also of manganese, have been discovered near Mount Zeehan, about nine miles south from Heemskirk. Though several sections have been taken up under lease on these various lodes, no further operation has yet been attempted, principally on account of the difficulty of access, the country throughout being very boggy.

During the past the Gordon, King, and Pieman rivers have yielded large quantities of valuable pine and also blackwood, but for the last three years, the Government having prohibited pine-cutting, that industry is suspended.

SAWMILLS.—A. Gill, W. Lade, and W. Welling.

Gold-mining is carried on actively by some of the leading companies.

Tin-mining is the staple industry of the district, and a very large amount of tin is shipped to Launceston from Bridport and Ringarooma Port. The development of the tin lodes in the Ringarooma district will probably in a few years make the district one of the most flourishing and important in Tasmania. The present out-put of tin ore is from the alluvial deposits, of which the Brothers' Home, Arba, Native Youth, and Weld mines have been, and still are, prominent examples. Some extensive water schemes have been commenced in the vicinity of Mount Cameron for working the tin deposits there. There is a large area of first-class land in the district, but the dearness of labour, the badness of the roads, the distance from markets, and the density of the timber and undergrowth, have, until lately, considerably retarded the advancement of Ringarooma. The construction of the railway to Launceston will, however, greatly improve the district. The roads are now being greatly improved, and the mines offer a local market for farm produce ; but the expense of clearing new land, and the impossibility of procuring farm labour, will delay the rapid advance of the country from an agricultural point of view unless some relief is afforded by the introduction of suitable immigrants. Wages of ordinary labourers 5s. to 8s. per day.

A considerable portion of the forest lands of Circular Head and the whole of the Peninsula belong to the V.D.L. Co.; the Peninsula, which formerly was devoted to growing grain and potatoes, has of late years been laid down with English grasses, and comprises some of the best fattening ground in the island. The last census returns show a decrease of 58 persons on the property on the Peninsula, whilst in the district of Circular Head generally there has been an increase of 129.

STANLEY,

The nearest Tasmanian port to Victoria, being only 20 hours' run from Melbourne, possesses an excellent harbour, and is visited by a considerable number of vessels, from Australian ports. The s.s. Devon arrives from Launceston weekly ; Stanley is in telegraphic communication with Victoria ; has 3 inns, 4 churches, and a library and reading room open to visitors. The township is picturesquely situated at the base of the Bluff, a precipitous mass of greenstone about 500 feet high, from the summit of which a magnificent view of the North Coast is unfolded—eastward as far as the Tamar River, and westward to Cape Grim, including the adjacent islands. The climate of Stanley is peculiarly favourable, owing to its position on a peninsula jutting out into Bass' Strait, even in the warmest weather, which rarely exceeds 70 deg. Fahr., cool breezes from the sea are continually felt. To the east and west of the township, as far as the eye can reach, stretch sandy beaches which are a famous resort of conchologists, many of the rarer Australian *Mollusca* being confined to this locality. Mineral springs occur in the immediate neighbourhood, the water of which has been analysed, and found to contain the ingredients of some of the German chalybeates. The splendid forests which specially distinguish the North Coast of Tasmania are everywhere within reach of a short ride. A fine series of Tasmanian plants may be collected, including some of the rarer *Cryptogams ;* the *Cyathea affinis* and *Todea africana,* with the three beautiful *Hymenophyllums,* being particularly luxuriant. The accommodation at the hotels is good and the charges reasonable. Horses and vehicles can be had on hire for excursions, and boats for fishing in the bays.

Stanley, from its nearness to the Continent of Australia, and from its remarkably equable climate, offers peculiar advantages as a watering place and summer residence where change and out-door recreation are desirable.

combe, near the northern boundary of the municipality. Many parts of the district, notably the vicinity of Quamby Bluff in the west, and Black Sugar Loaf in the east, have every sign of being rich in minerals.

Remarks.—This municipality is almost entirely an agricultural district, and comprises a large area of the best land in the colony. The system of farming has of late years vastly improved, and the sheep and cattle kept are of superior quality. The district is celebrated for its long-woolled sheep. Game, in the shape of hare, quail, snipe, with deer and kangaroo, is tolerably plentiful. The Meander River, which flows through the district, affords good trout fishing ; and the sportsman will find comfortable quarters at any of the hotels in the district.

In applying the table, when the exact amount is not given in the top line, select the columns necessary to make up the required sum and add them together. Thus when the bushel is 3s. 2d., add the amount given in the 3s. column to that in the 2d. column ; the total is the price per cental.

RULE TO FIND WEIGHT OF CATTLE, ETC.

Take measurement of the girth where it is the smallest, round the body, close behind the shoulder ; take the length from the front of the shoulder to the insertion of the tail. Multiply the square of the girth in feet and inches, with the length in feet and inches and the product by ·24, ·26, ·28, or ·30, according to the fatness of the animal ; the result will be the weight of the carcass in imperial stones. The weight of the carcass is to the live weight of an animal as 1 to 2, or a little more in cattle ; as about 4 to 7 in fat sheep ; as 2 to 3 in fat pigs. These proportions will vary according to the condition and breed of the animal.

LEGAL WEIGHTS FOR GRAIN, ETC.

Weights established by law for the sale of grain and flour.—Ton of flour, 2000lb.; hundredweight ditto, 100lb.; quarter ditto, 25lb. Bushel of wheat, maize, beans, peas, tares, or rye, 60lb.; bushel of barley, 50lb.; bushel of oats, 40lb.; bushel of bran or grass seed, 20lb.

AGENTS AND CORRESPONDENTS IN ALL PARTS OF THE WORLD.

The Bank grants Letters of Credit on Demand, or Bills, at three or thirty days' sight, upon its Branches, at the customary rates, on the money being deposited. Similar Letters of Credit may be procured from its Agents in all the principal towns throughout England, Scotland, and Ireland. The Bank also negotiates, and sends for collection Bills on the Colonies, the terms for which may be obtained on application at its London Office. At its Branches in the Colonies it undertakes all descriptions of **Banking and Exchange Business.**

Circular Notes are issued by its Branches, in sums of £10, £20, or £50, negotiable by its correspondents in the chief cities on the Continent in Europe, in North and South America, Ceylon, Mauritius, India, China, Japan and Africa.

Share Registers are kept at **Melbourne, Sydney, Brisbane, Adelaide, Hobart,** and **Launceston,** and at **Christchurch,** New Zealand, to any of which English and Colonial Shares can be transferred—the Bank affording every facility to its Proprietors for this purpose. **Dividends** are paid upon receipt of **Telegraphic** advice.

REDUCTION IN RATES OF REPAYMENT.

The above Society offers to the public *advantages unsurpassed by any in the Colonies.* Investors and Borrowers are treated most liberally and Borrowers participate in the profits ; and having a large business the Directors are able to carry out the rules in a liberal spirit, and are not dependent on fines as a source of revenue.

TO INVESTORS.

Investing or subscribing shares are of the ultimate value of £100. Monthly Subscription 11s. for the term of 10 years, and £1 2s. 4d. per month for 5 years. Half shares are issued. Shares may be withdrawn at any time with interest added. **Liberal Bonus** paid at end of term.

TO DEPOSITORS.

Deposits are received daily from £5 and upwards at highest current rates. Interest paid to date of withdrawal without reduction in rate. Depositors incur no risk as Advances are only made on Real Property, and, according to the Rules, Deposits are made a first charge on the Assets of the Society.

TO BORROWERS

Special advantages are offered, the rates have been reduced and are now lower than any other Society, terms of repayment, easy ; and an Annual Bonus is declared on all advance shares. Loans may be paid off at any time on most liberal terms. No redemption fees charged.

Prospectuses and every information on application to the Offices, Central Brisbane-street, Launceston.

Season tickets are also issued between any intermediate stations on a scale of charges corresponding with those above stated, and on the same conditions, and can be obtained for the intermediate stations and sidings not mentioned in the above table, at Proportionate Rates. All season tickets date from the 1st day of the month.

Children under 12 years of age are charged half rates only, as also under 15 years of age when attending school.

Youths attending School, and Apprentices under 18 years of age, two thirds the adult rates. All persons claiming the benefit of these regulations may be required to produce evidence and to sign a declaration prepared by the Company.

A deposit of five shillings is required on each ticket, which will be returned to its holder if the ticket be delivered up immediately on its expiry to any Station Agent of the Company, who will thereupon refund this amount.

Annual tickets may be paid for in two half-yearly instalments, the rate for six months being paid on taking out the ticket, and the balance at the commencement of the second half-year.

No rebate or allowance can be made on Season Tickets under any circumstances.

THE PRINCIPAL RECEIVES A FEW BOARDERS.

METHODIST LADIES' COLLEGE,

LAUNCESTON, TASMANIA.

Founded by and under the Government of the Methodist Church of Tasmania.

To be opened January, 1886.

President.—Methodist minister to be appointed by the Conference.

HEAD MASTER.—G. THORNTON LEWIS, B. A., London, Bedford Medallist, Morley and Taunton Scholar, Woodhouse Grove School; honours and prize man University of London; Emeritus Professor of Classics, Graff Reinet College; late (for 8 years) Govt. Inspector of Schools Cape Colony; at present head master (acting) Horton College.

LADY PRINCIPAL.—MISS SWINDELLS, whose residence on the Continent, where her education was completed, has given her that command of modern languages which is seldom acquired except by natives.

Assisted by a staff of highly efficient resident and visiting teachers.

The object of this institution is to secure for girls the same educational advantages which have hitherto existed for boys at the best collegiate schools in this and the neighbouring colonies. Besides providing a high class education in all branches, the Committee and staff will aim at fostering and maintaining a healthy moral tone among the pupils, and surrounding them with Christian influences. The site is admirably chosen, distant not more than a mile from the centre of the town, on the Elphin-road, commanding a magnificent view of the surrounding country. The property is tastefully laid out, and provided with recreation and lawn tennis grounds. The building, now approaching completion, is handsome and commodious, affording acommodation for 40 boarders and a large number of day pupils, and being furnished with all the modern appliances requisite for a superior school, it will be entitled to rank with similar institutions in the neighbouring colonies.

The well-known salubrity of the Tasmanian climate offers additional inducements to students from the other colonies.

Pupils from the neighbouring colonies who have have paid the usual fare by the T.S.N. Company's steamers, after six months' residence at the College, are granted a free passage back.

Special attention given to physical education, and ample opportunities afforded for recreation.

Religious instruction of a strictly undenominational character given in all the classes by the President

Prospectuses on application to Walch Bros. and Birchall, Lauuceston; Hopwood and James, Launceston; J. Walch and Sons, Hobart: and R. Gee, Launceston.

Important Improvements, Securing Greater Excellence and Lower Rates.

Improved Key Action. Reducing the force necessary to manipulate the Keys nearly one-half.
Improved Stop Action. Very effective and reliable, yet simple in construction.
Improved Reeds or Vibrators. Manufactured by newly-invented machinery, thus securing complete uniformity and thoroughness.
Improved Centre Pressure and Self-adjusting Reed Valve. Makes the action more instantaneous, sure, and perfect.
Improved Knee Swell. Producing the most perfect *crescendos* and *diminuendos.*
Improved Voicing Reeds. Producing special excellence such as no other instrument in the world can equal.
Resonant and Vibrant Cases. Increasing both the volume and qualities of the tone.

☞ *Send for Illustrated Price Lists, and Terms for Monthly Payments. Prices from EIGHT to FIFTY POUNDS.*
