N.B.—The Publishers will be glad to receive information adapted for future issues of this Almanac. Suggestions that may tend to make the Book more generally useful shall also receive attention.

JOHN DAVIES, PRINTER, HOBART TOWN, TASMANIA.

PREFACE.

The Compiler of the 'Tasmanian Almanac and Guide to Tasmania,' has the pleasure once more to tender his thanks for the assistance he has received in the preparation of this manual of reference.

Every care has been taken to render the information supplied in this volume as complete and as correct as possible.

Only those persons who have been actually engaged in such a task can be aware of the amount of labour attending the production of a book that is 'statistical' in its character, and the materials for which have to be gathered from so many and such widely-spread sources.

During the past two or three months "Facts and Figures" "Facts and Figures" have so completely taken possession of the Compiler's brain, and held 'high revelry' there, that he now finds it difficult to deal with anything so 'imaginative' as the writing of a preface;—he is heartily glad to lay down his pen and to commit his book to the care of his enterprising Publishers, and (he trusts) an appreciating Public.

Hobart Town,
31st December, 1864.

Those marked thus (*) are strictly kept, and no business transacted.

N.B.—All Jewish Festivals, Fasts, and Sabbaths commence the evening previous.

A SUMMARY OF THE PRINCIPAL ASTRONOMICAL OCCURENCES, ETC.

By F. ABBOTT, F.R.A.S.

The astronomical department of the *Tasmanian Almanac* is, necessarily, limited to a small space. Tables of occultations, eclipses, and other phenomena are omitted to make room for a compendium of more useful information.

* The accuracy of all the geographical positions in the Southern Hemisphere has been questioned by the Astronomer Royal, as not being trustworthy for the forthcoming transits of Venus in December 1874, and December 1882. To meet this objection arrangements have been made by Mr. Ellery, of the Melbourne Observatory, and the Council of the Royal Society of Tasmania, to verify the longitude, if possible, by a series of chronometrical exchanges.

ECLIPSES, ETC.

In the year 1865, there will be four eclipses; two of the Sun, and two of the Moon.

1. A partial eclipse of the Moon, April 11th, not visible in Tasmania.
2. A total eclipse of the Sun, April 25th, not visible in Tasmania.
3. A partial eclipse of the Moon, Oct. 5th, not visible in Tasmania.
4. An annular eclipse of the Sun, Oct 19th, not visible in Tasmania.

This latter eclipse, although chiefly confined to the North Atlantic, Africa, and America, will be partially seen in England, Ireland, and Scotland.

On November 16th, there will be an occultation of Venus with the Moon, at 3h. 53m. 13s. p.m., Hobart Town time.

On November 17th, at 4h. 14m. 29s. a.m., there will be an occultation of

Saturn with the Moon. Both these occultations are visible in the parallel of south lat., but, unfortunately, in our long., they occur by daylight, and on the 18th is New Moon.

A new comet was discovered by M. Respighi, at Bologna, on Dec. 28th, 1863; also independently by M. Backer, at Nauen, on Jan. 1st; and M. Karlinski, at Cracow, Jan. 9th. The elements of this comet bear a close resemblance to those of the comet of 1810.

A new minor planet, No. 79, has been named *Eurynome*, the elements of which are given by Tischler, and published in the *Astronomische Nachrichten* of January 16th.

A new minor planet, No. 80, was discovered on the 3rd of May last, in the constellation Scorpio, by Mr. N. R. Pogson, Government Astronomer at Madras; it has been named *Freia*, and was very near the place where Mr. Pogson discovered the minor planet *Isis* in 1856.

Professor Adams' determined distance of the Moon has been reduced by Mr. Breen 26 miles from 238,793. Mr. Breen's results have been adopted in the *Nautical Almanac* for 1867.

In the *Astronomische Nachrichten* for May 28th, is published a valuable series of double-star measures by Baron Dembowski, of Gallarate; nearly 200 stars are treated of by his new optical means.

The star maps of Professor Argelander are completed for the Northern Hemisphere, amounting to 324,198 which are visible with a telescope of 4½ feet focus. M. Auwers' catalogue of 2,500 Nebulæ has also been completed and published.

M. De la Rue, has amplified his photographs of the moon, to the size of Beer & Madler's 38in. map.

The most important and expensive publication on the science of astronomy is Mr. Carrington's observations of the spots on the sun, from November, 1853 to March 1861 made at Redhill, and illustrated by 166 plates. This work cost £3,000, and was aided by a grant from a fund placed at the disposal of the Royal Society by Her Majesty's treasury.

The Astronomer Royal has been very pressing since his first paper was read to the Astronomical Society on May the 8th, 1857, in fixing upon the best situation for observing the forthcoming transit of Venus over the Sun's disc. For the northern observations he thinks no better place than Bermuda could be fixed upon, and for the southern observations his ultimate decision is pointed to a position between Sabrina Land and Repulse Bay, (discovered by Captain Gillis), where Professor Airy considers it most desirable that a reconnaissance should not be long deferred. The points to be ascertained are (1st), whether the coast is accessible on December 6th. (2nd) Whether a latitude of 65° can be reached. (3rd) Whether the Sun can be seen well on December 6th, at three hours on each side of the lower meridian.

Professor Donati, of Florence, has published (Astro. Nach.) a sketch of the spectrum produced from Comet 2; he remarks that it resembles the spectrum produced by metals, the black bands being broader than the luminous.

Two hundred ducats (about £90) have been offered by the Academy of Sciences at Vienna, for the best research on the movement of the fixed stars.

AN APPROXIMATE TABLE OF EQUATION,

The Tables of "Mean Monthly" Results in these sections are formed from the days in each month in which the three daily records are complete, no imperfect register being used. The mean results are taken from the sums of each column, and not from the maximum and minimum. The difference from average is obtained from the twenty years standard tables. The results for the direction and force of the wind are registered according to Lind's Wind Guage. All the other instruments are by Negretti and

Zambra. The standard barometer has been tested by that of the Royal Society of London, and the thermometer at the Kew Observatory.

The Mean of the Barometer is +0·050 inches above the average.
" Temperature is 0.47° below the average.
" Evaporation from wet bulb, is +0.49° above the average.
" Temperature of Dew Point is 0.22° below the average.
" Maximum in Sun is +18.2° above the average,
" Terrestrial Radiation on grass is 8.20° below the average.
" Amount of Rain is +14.09 inches above the average.
" Spontaneous Evaporation is +4.84in. above the average.

The total force of the wind is 290.26lbs. per square foot above the average of the four years from 1857 to 1860 inclusive.

GARDENERS' KALENDAR.—*Fruit Garden*—Where budding is required it may still be performed, choosing, if possible showery weather. Cut off all unnecessary shoots from young trees, if they are not required for scions in the Spring. Continue to pinch off all lateral shoots from the vines. *Flower Garden.*—Choice carnations may be increased by cuttings and layers with shade and moisture. Choice flowers should be marked for seed. Annuals that have done flowering should be removed, or some will become troublesome weeds. *Kitchen Garden.*—Plant celery in trenches; plant succession of French beans; sow turnips when the weather is moist, take up early potatoes that are ripe; gather all kinds of seed as they ripen, cut off all runners from strawberries that are not wanted for plants, to give strength to the roots. *Greenhouse.*—Calceolarias, Cinnerarias, &c., may still be sown. Geraniums that have done flowering should be cut down, and re-potted as soon as they begin to make fresh shoots. Cuttings struck now will make good plants next year with care. Continue to shade and water as directed last month.

GARDENERS' KALENDAR.—*Fruit Garden.*—But little is required in the fruit garden this month, besides attending to the buds. Strawberry runners should be kept moist to form robust plants in time for transplanting in the first Autumn rains. —*Flower Garden.*—Cut off all flower stalks as soon as done flowering, except those required for seed. When seed is not required the flowering season is prolonged by cutting it off as soon as formed. Verbenas, pentstemons, petunias, and other herbaceous perennial plants may now be propagated by cuttings. Encourage the asters chrysanthemums, dahlias, &c., by frequent watering. You may use the rake now to preserve a neat appearance. *Kitchen Garden.*—In showery weather some vegetables may be sown to come in during the winter. Mark out plants of the cabbage tribe to be permitted to run to seed. Earth up peas and potatoes; hoe and stir the surface wherever necessary, among all descriptions of crops. *Greenhouse.*—As the principal displays of this season are over, we must turn our attention to preparation for the succeeding, by propagating, by seed and cuttings, and preserving such old plants as are desirable for another year. Now is the time for forming plants of the early flowers too frequently neglected by amateurs, until the flowering season. Sow mignonette for winter flowering.

GARDENERS' KALENDAR.—Prepare borders for forming new beds of strawberries on the first approach of rain; and the ground intended to be planted with fruit trees, should now be well worked. Collect the leaves as they fall and convert them into manure. *Flower Garden.*—Continue the general directions given for last month, and sow seed of perennial and annual flowers for Spring flowering as they ripen. *Kitchen Garden.*—Sow cabbage, cauliflowers, lettuce, spinach, and onions for early use. Sow turnips, thin out those sown last month. Earth up celery, take up potatoes, and house onions when well dried. *Greenhouse.*—Continue the general directions, given for last month.

ST. PATRICK'S DAY.—The shamrock is said to be worn by the Irish, upon the anniversary of this their tutelar saint, for the following reason. When he preached the gospel to the Pagan Irish, he illustrated the doctrine of the Trinity by showing them a trefoil, or three-leaved grass, with one stalk; which operating to their conviction, the shamrock, which is a bundle of this grass, was ever afterwards worn upon this saint's anniversary, to commemorate the event.

GARDENERS' KALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be proceeded with in dry weather, taking care to leave the surface of the ground loose after the operation. The general pruning of fruit trees, vines, &c., may be commenced towards the latter end of the month, especially such as are in a weak state of growth. All the ground should now be dug up roughly, burying the leaves and what manure can be afforded. *Flower Garden.*—Now is the time for putting in order all flower borders, shrubberies, &c., by pruning the shrubs and roses, trimming the edges dividing and regulating the herbaceous plants, digging the borders and thereby creating a neat appearance during the winter months, and obviating the necessity of digging amongst the roots of plants in the Spring; it likewise breaks into the favorite haunts of the slugs, whereby they are more easily found and destroyed; where new borders are to be formed, and planted it should now be done. *Kitchen Garden.*—Plant out cabbage, cauliflowers, and lettuce. Sow peas, broad beans, and carrots, for early use. Sow spinach and onions. *Greenhouse.*—But little can be done in the greenhouse now beyond giving plenty of air on all favorable occasions, watering when the earth becomes dry, and keeping the plants free from vermin and dead leaves. Keep all growing plants as near the glass as possible.

GARDENERS' KALENDAR.—*Fruit Garden.*—The planting of vines and fruit trees should be completed this month; should it not be convenient to do so, the trees intended to be planted next month, or later, should now be lifted and laid in by the heels, which will keep them back, always choosing dry weather for the operation, stir the ground around those planted previous to heavy rains as soon as it is dry enough for the purpose. All pruning should be finished this month. *Flower Garden.*—Continue the general directions for last month, and complete the planting of deciduous trees and shrubs. Keep the ground between the bulbs free from weeds. *Kitchen Garden.*—Plant early potatoes, &c., in a warm dry border. Early peas and beans might be sown once a fortnight, or three weeks, from this time forward. Sow the main crops of onions and carrots, also some radishes, lettuces, spinach and early cabbage. Propagate plants which are increased by rooted off-sets. Transplant for seed, if not done in autumn, carrots, turnips, beet, celery, parsnips, &c. *Greenhouse.*—Continue the general directions for last month. Fuchsias that have shed their leaves should now be prepared for the following season by cutting back and re-potting them. Geraniums that are growing tall and thin should have the ends of the shoots pinched off, which will make them more bushy and compact. Repot cinnerarias and calceolarias as soon as the present pots are filled with roots. This rule will apply to growing plants generally.

GARDENERS' KALENDAR.—*Fruit Garden.*—Planting and pruning vines and fruit trees, if not finished, should be done immediately. Vine cuttings may be planted. Prepare for grafting, the proper time is as soon as the stocks are well started. Raspberry and strawberry borders may still be prepared, and new ones formed, if not already done. Look carefully over the apple trees, and dress the parts affected by the *Aphis*, or American blight. Manure freely the vines and fruit trees that are weakly. *Flower Garden.*—Flower beds should now be manured and dug; edgings formed, trimmed, and repaired; herbaceous plants divided; biennials planted. Roses may now be pruned, and most sorts increased by cuttings. Seeds of hardy annuals may be sown in the borders; tender ones may be sown on a moderate heat for transplanting. Choice dahlias should be placed in a gentle heat, for the purpose of propagating by cuttings. Verbenas, shrubby calceolarias, pentstemons, &c., may be increased by the same means. *Kitchen Garden.* — Asparagus: earth up, plant, sow. Beans, broad: plant. Beet, red: plant out for seed. potted in fresh soil. Cacti and other plants may be watered more freely than in the depth of winter. Sow seeds of balsams, cockscombs, egg plants, &c., &c., on a gentle heat; keep all plants clear of *aphis*, scale, &c., by washing and fumigation.

GARDENERS' KALENDAR.—*Fruit Garden.*—The principal work this month is the grafting, which is performed in various ways, the principal aim of which is to bring the bark of the stock and the scion to fit closely, loosen the ground with a hoe after the operation: the same between vines and fruit trees in general, in dry weather. *Flower Garden.*—Seeds of annuals, biennials, perennials, and shrubs should now be sown; tender ones raised in heat may be transplanted towards the end of the month. Dahlia roots may be planted, propagate choice varieties as recommended last month; take the cuttings out of heat as soon as they have struck root, and protect them from the frost till it is safe to plant them; lay shrubs that are difficult of propagation by other means; keep the hoe at work in dry weather, but do not use the rake, except for covering small seeds. *Kitchen Garden.*—Asparagus beds, keep free from weeds Sow red beet and French beans. Transplant cabbage, transplant lettuce. Sow carrots celery, turnips, spinach, radishes, vegetable marrow, scarlet runners. Plant potatoes, sow peas, and earth up those that are ready. Cucumbers may be sown in ridges. Transplant onions, keep the hoe among the crops (as the weeds will grow fast), it will assist the crops in their growth. *Greenhouse.*—Follow the directions for last month. The plants in flower will require watering copiously and shading from the mid-day sun.

GARDENERS' KALENDAR.—*Fruit Garden.*—Look over the vines and rub off all superfluous buds. Destroy caterpillars on fruit trees. Keep the surface of the ground loose with the hoe at all convenient seasons, whether there be weeds or not. Place a layer of fresh stable manure between the rows of strawberries; it will increase the size of the fruit and render it free from grit or sand. *Flower Garden*—Seeds of Annuals may still be sown. Tender species raised under shelter may be transplanted into the borders, choosing showery weather for the operation. Dahlias from seed and cuttings, and other tender plants, may be planted about the middle of the month. Mark the flowers of choice bulbs, etc., with the view of collecting their seed. Stake and tie the shoots of herbaceous and other plants as they advance. Where quality, rather than quantity of flowers is the object, the number of flowering shoots should be reduced. Destroy slugs, *aphis*, scale, bugs, etc., or they will destroy your choice plants. *Kitchen Garden.*—Continue to sow and plant as last month. Earth up potatoes and peas, sow all kinds of brocolis, Scotch kale, savoys and cauliflowers. Sow tomatos and capsicums. Thin early sown carrots, turnips, and spinach, and keep them free from weeds. *Greenhouse.*—Azaleas, camelias, ericas, etc., that have done flowering, should be taken out of the house and placed in a shady situation, towards the end of the month. Water sparingly the bulbs of achimenes, gloxinia, gesnera, etc., until they appear above the ground. Re-pot all fast-growing plants as often as the pots fill with roots. Use the syringe in the evening during sunny weather; guano or manure water occasionally will assist flowering plants whose pots are full of roots. Wage continual war against the insects.

GARDENERS' KALENDAR.—*Fruit Garden.*—Stop all shoots of vines, except the leaders at one joint beyond the fruit, and lay them to their trellis or supports; pinch off all unnecessary shoots in young fruit trees. Vines, newly planted fruit trees, &c., will be much benefited by a mulching of half decomposed stable manure. Rub off the shoots from stocks that have been grafted, and remove the clay and binding as soon as they have joined, which may be known by their shooting vigorously; lay as many strawberry runners as may be required for new plantations, and remove all others. *Flower Garden.*—The planting of dahlias and tender annuals if not done, should be immediately; support all tall growing flowers as they advance, keep the surface of the ground loose with the hoe; clip and trim all edgings except roses; mark choice flowers for seed. *Kitchen Garden.*—Thin and hoe red beet, carrots, and all other spring crops. Plant out capsicums and tomatos. Prick out celery in small beds from the seed beds. Earth up peas, French beans, and potatoes. A succession of peas and French beans may be sown. *Greenhouse.*—sow seeds of primula, cinneraria, calceolaria, camellia, geranium, &c., give plenty of air and water and shade during sunny weather.

GARDENERS' KALENDAR.—*Fruit Garden.*—Where the vines have not been attended to, as directed last month, they should be done immediately, and as the lateral shoots appear they should be taken off, to within one joint of the main shoots. Where young apple or plum trees are infested with the red spider they should be frequently syringed with tobacco water, or soft soap well diluted. Brush off the American blight as it appears on the young shoots of the apple trees. Peaches, &c., on walls will now require frequent attention. Budding may be performed towards the latter end of the month. *Flower Garden.*—Dahlias, hollyhocks, &c., will now require frequent attention. Where fine show flowers of dahlias are required, one stem alone should be allowed to grow, and the lower lateral shoots removed from that, and the number of flower buds reduced, a liberal mulching will greatly promote their growth during the approaching hot weather. Bulbs of choice hyacinths, tulips, ranunculuses, anemones, &c., should be taken up and stored as they become dormant. Neatness is now the general order. *Kitchen Garden* —Earth up French beans and peas, and scarlet runners, a succession may be planted, prepare trenches and plant celery; transplant all kind of brocolis and cauliflowers, savoys, and cabbage for winter use; tomatos and capsicums, if not put out, should now be done; vegetable marrows may yet be sown; sow turnips this month, and earth up late potatoes. *Greenhouse.*—Cinnerarias, calceolarias. etc, that are intended to be kept for another season should be removed into a shady situation as soon as they have done flowering. Fuschias geraniums, &c., that are flowering may be watered occasionally with liquid manure; shade and water freely during hot weather.

SAXBY'S WEATHER SYSTEM.

List of days on which the weather may reasonably be suspected as *liable to change, most probably towards high winds or lower temperature,* being especially periods of *atmospheric disturbance.*

1865.—January 3rd—9th—16th—24th—30th.
„ February 5th—13th—20th—**26th.**

N.B.—February 26th is likely to be a very dangerous period, with probably a high tide.

„ March 5th—12th—19th—**26th.**

N.B.—March 26th will probably be a dangerous period with high tide.

„ April 1st—8th—16th—22nd—28th.

N.B.—The 24th to the 28th may very likely prove greatly unsettled.

„ May 6th—13th—20th—26th.

N.B.—From 20th to 26th is likely to be a very unsettled period.

„ June 2nd—9th—16th—22nd—29th.
„ July 7th—13th—20th—27th.
„ August 3rd—9th—16th—23rd—30th.
„ September **6th**—12th—19th—27th.
„ October 3rd—9th—16th—24th—31st.
„ November 6th—13th—20th—27th.
„ December 3rd—10th—18th—24th—31st.

The preceding apply to all parts of the earth's surface—even (in a diminished degree) to the trade belts.

N.B.—If the day marked prove calm and still, distrust the day after, and *especially the second day after.*

The changes vary in intensity, but even at *quiet* periods they may be plainly traced in the scud flying with a velocity totally at variance with the state of the air at the earth's surface, and the clouds at such times generally have a liny or stratified appearance, which usually indicates approaching rain.

My own impression is that the winters of 1864 and 1865 are more likely to prove frosty than windy.

In bringing the above to the test of experience, a few memoranda may prevent unintentional injustice towards the system.

1. Do not consider the prediction a failure if the weather prove moderate. The above days are dates of *change*, not of *necessity* periods of bad weather.

2. Watch for changes of wind at such times, and what sailors call its *uneasiness*—flying about from point to point with unsteadiness.

3. A characteristic of these lunar periods (when they prove quiet) is *fog* and *haze*, very often setting in the day before or a few hours before the date given.

4. When the mercury falls for a day or two before a lunar day, expect its effects to last just about so long afterwards The lunar period being the middle of the time of disturbance.

5. The barometer *is not always affected* by these lunar periods—but there is a tendency in the mercury to *either change its direction* up or down at such times, or the apex of a curve projected by it will happen at such period.

6. The rising of the barometer on or after the 'second day after' generally indicates the return of fine weather.

7. If, on or about the 'second day after,' the mercury fall rapidly, prepare for a Cyclone. (This only applies to the Atlantic district, and the western coast of France, England, Ireland, &c., on reaching which their presence is generally announced by Admiral Fitz Roy's Coast warnings.)

GREAT BRITAIN AND IRELAND.

Reigning Sovereign and Family.

VICTORIA I., Queen of Great Britain and Ireland, born at Kensington Palace, London, May 24, 1819, the daughter of Edward, Duke of Kent, fourth son of King George III., and of Princess Victoria of Saxe-Saalfeld-Coburg, widow of Prince Emich of Leiningen. Ascended the throne at the death of her uncle, King William IV., June 20, 1837; crowned at Westminster Abbey, June 28, 1838. Married, February 10, 1840, to Prince Albert of Saxe-Coburg-Gotha; widow, December 14, 1861. Issue of the union are:—1. Princess *Victoria*, born November 21, 1840; married, January 25, 1858, to Prince Frederick William, eldest son of King William I. of Prussia. There are offspring three sons and a daughter, namely, Frederick William, born January 27, 1859; Charlotte, born July 24, 1860; Henry, born August 14, 1862; and a son, born September 15, 1864. 2. Prince *Albert Edward*, heir-apparent, born November 9, 1841; married March 10, 1863, to Princess Alexandra (born December 1st, 1844), eldest daughter of Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, present King of Denmark. Issue, a son, Albert Victor Christian Edward, born, January 8, 1864. 3. Princess *Alice*, born April 25, 1843; married, July 1, 1862, to Prince Ludwig, of Hesse-Darmstadt. Issue, a daughter, Victoria, born April 5, 1863. 4. Prince *Alfred*, born August 6, 1844; entered the Royal navy, August 31, 1858. 5. Princess *Helena*, born May 25, 1846. 6. Princess *Louise*, born March 18, 1848. 7. Prince *Arthur*, born May 1, 1850. 8. Prince *Leopold*, born April 7, 1853. 9. Princess *Beatrice*, born April 14, 1857.

Cousins of the Queen.—1. *George* V., King of Hanover, born at London, May 27, 1819, the son of Duke Ernest Augustus of Cumberland, fifth son of King George III. 2. Prince *George*, Duke of Cambridge, born at Hanover, March 26, 1819, the son of Duke Adolphus of Cambridge, sixth son of King George III. 3. Princess *Augusta*, sister of the preceding, born at Hanover, July 19, 1822; married, June 28, 1843, to Grand-duke Frederick William of Mecklenburg-Strelitz. 4. Princess *Mary*, sister of the preceding, born at Hanover, November 27, 1833.

Aunt of the Queen.—Princess *Augusta*, born at Cassel, July 25, 1797, the daughter of Landgrave Frederick of Hesse-Cassel; married, May 7, 1818, to Duke Adolphus of Cambridge, youngest son of King George III.; widow, July 8, 1850.

The Queen reigns in her own right, holding the crown both by inheritance and election. Her legal title rests on the statute of 12 & 13 Will. III. c. 3, by which the succession to the crown of Great Britain and Ireland was settled, on the death of King William and Queen Anne, without issue, on the Princess Sophia of Hanover, and the 'heirs of her body, being Protestants'. The inheritance thus limited descended to George I., son and heir of Princess Sophia, she having died before Queen Anne; and it has ever since continued in a regular course of descent.

NOTE.—All the above clergymen are surrogates for issuing marriage licenses except those marked *

The Church of England has 101 places of worship, estimated to seat 14,204 adults. The number of members of the Church of England returned in the census of 1861 being 49,233. The number of Baptisms in 1862 was 1,620; of marriages, 270; and of burials, 711. The total income of the 41 clergymen holding the position of incumbents in 1862, was £13,592, with the addition of parsonage houses in 15 cases. The parochial church lands are returned at 1721½ acres. The episcopal endowment estate 1,200 acres; the archdeaconry endowment, 30 acres and 7 houses; the college estate, 3,200 acres.

Church Synod.—The governing body of the Church of England is the Synod, established in 1858, under the Act 22 Vic, No. 20, and consisting of the bishop, all licensed clergymen in the cure of souls, and lay communicant representatives, elected by the congregations; no Act being valid unless it carries the consent of all three orders. The Synod must meet once at least in every year, and a dissolution and fresh election of lay members must take place every three years. The appointment of clergymen to vacant cures is made under regulations laid down by the Synod, by which at present, the appointment belongs to the bishop in sixteen cases, and to Boards of Patronage (each consisting of at least seven members of Synod) in twenty-four cases. To the Synod also, since 1st January, 1863, belongs the duty of administering the annual sum (£8,770) assigned to the Church of England under the "State Aid Distribution Act." The present officers of the Synod are:—Trustees, Ven. Archdeacon Reibey, E. S. P. Bedford, and W. S. Sharland; Church Advocate, W. L. Dobson, M.H.A.; Treasurer, Thos. Giblin; Secretary, the Rev. F. H. Cox, B.A., Finance Secretary, Rev. A. Davenport, B.A. The Southern and Northern Finance Committees consist respectively of the archdeacon and seven members elected by a general ballot of the Synod. [For a complete account of the proceedings of the Synod since its commencement, see the "*Church News* for the diocese of Tasmania," No. 2, June 1862."]

Wesleyan Colonial Mission Fund.—Treasurers, Rev. W. A. Quick, and J. Crookes; Secretary, Rev. J. Hutchison.

Wesleyan Foreign Missions.—Tasmanian Auxiliary.—Treasurer R. S. Waterhouse; Secretary, Rev. Spencer Williams.

Horton College, Ross.—This College is the result of contributions by friends of education in Tasmania; Captain Horton, of Somercotes, Ross, having commenced the enterprise by a gift of twenty acres of land as a site for the College, and a contribution of £1000.

The object contemplated is to afford to the sons of Protestants the

advantage of a sound general education, in connection with a Christian home, and careful moral, and religious training.

The foundation stone of the College was laid in January, 1852. In October, 1855, under the presidency of the late Rev. John A. Manton, the first pupils were received. Since that period the average number of students has been about fifty; up to the present time about 250 have been entered on the College books. The entire cost of the building and furnishing was about £4,500. To this sum an expenditure of £2,200 has been lately added in additions and alterations, which comprise a dining-hall, school-rooms, class-rooms, library, lavatory. and dormitories, with a residence for the Head Master.

Surveys required in the Unsettled Lands, or on any Islands except those at present included in the Survey Districts, shall not be charged for according to the above Scale, but may be made the subject of private bargain between the applicant and any authorised Government Surveyor, subject to the approval (as respects the time of undertaking the work *only)* of the Commissioner of Crown Lands.

3. *Clause* 19.—Should two or more selections of the same piece of Crown Land be made at the same time, the Commissioner shall send it to Auction.

4. *Clause* 25.—Any lot having a frontage on a road, river, lake, or the sea, shall have its width and depth so regulated as not to exceed the proportions of 1 to 2, (the first figure representing the *width.*)

5. *Clause* 36.—Any person (with consent of Commissioner in writing,) may transfer his interest in any land purchased of the Crown, whereof the payment is not complete, on payment of a fee of 3d. in the pound on the cost price. This regulation to apply to Pre-emptive Right Lands and to Lands in the unsettled districts.

Transfers of leased lands will be charged for at the rate of twenty shillings for the first lot, and ten shillings for every other adjoining one.

6. *Clause* 44.—Improvements on leased lands to be paid for when required for sale shall be valued by the District Surveyor. But if his valuation be thought unfair by the lessee, arbitrators shall be chosen, one by the Lessee and the other by the Commissioner ; and if they cannot agree, the Governor-in-Council shall appoint an umpire whose decision shall be final. Cost of valuation to be defrayed by the lessee.

Occupation Licenses.

7. *Clause* 50—Land held under an occupation license may be resumed on a notice of not less than three months. No compensation will be allowed for improvements, which may be removed at any time before the expiration of the notice.

The rental of any land held under an occupation license will be £1 for every hundred acres, and £1 for any lesser area. Rental must be paid in advance.

Timber Licenses.

8. *Clause* 51.—Licenses to fell and remove timber from any Crown land available for such purposes, are to be obtained at any Police Office, or from the official Inspector of Timber Licenses, on payment of 2s. 6d. a week for every person employed (carters excepted),subject to the conditions contained in the form of license supplied.

Licenses to make bricks, quarry stone, burn charcoal, &c., are to be obtained in a similar manner and on the same terms as those relating to removing timber.

Mineral Lands.

9. *Clause* 52.—Application to rent any mineral lands to be made in writing to the Commissioner of Crown Lands, stating the area required and the description of mineral to be worked ; to be accompanied by a plan made by some duly authorised Government Surveyor from actual survey, which must fix the position of the land applied for. £5 to be paid by applicant at time of application as a guarantee of sincerity, to be remitted from rent.

10. The Commissioner of Crown Lands shall within 90 days, (time fixed to protect original discoverers), or such longer time as may be indispensably necessary for any reference required in the case, issue an authority to select same, to continue open for one year ; but if selection be not made within that time, land to be considered relinquished, and available for disposal.

11. Claim to lease to be forfeited if applicant remove any mineral except for samples (not to exceed a ton in all) before taking up lease.

12. Priority of right to select to be given to first applicant, unless in any case where the original discoverer be concerned, who shall be allowed to come in as first applicant, provided he claims to do so within ninety days of the receipt of the first application to lease.

13. If two or more applications for the same lot be received simultaneously, priority of choice shall be settled by lot to be drawn in the presence of the Commissioner of Crown Lands. If more than one lot be thus applied for by the same person, the choice of lots to be given in turns after first drawing.

14. All applications to have mineral lots shall be published at least once in the Government *Gazette*.

15. Applications to lease coal lands shall not exceed 320 acres nor be less than 40 acres, except in special cases.

16. Any other mineral or metal, not more then 80 acres nor less than 20 acres.

17. The rent for any lot containing metal to be 5s. the acre per year, and 2s. 6d. the acre per year if coal-bearing only, or such higher rental as the Governor in Council may affix.

18. Any applicant for lease of any mineral lot of which he can prove himself first discoverer, shall have, beside the advantage of priority of right as determined in the foregoing regulations, the first year's rent remitted.

19. Governor-in-Council may at any time disallow the practice of private selections of mineral lands, and direct that the leases of the same be sold by auction. Such order not to interfere with any rights secured under existing leases.

20. Upset price affixed to mineral lots thus leased by Commissioner of Crown Lands after reference to Inspector of Mines, if such officer be appointed, or if not, then according to the best evidence he is able to obtain of the value of each lot.

21. In case of the leasing of any mineral lot that may have been forfeited or thrown up, a fair valuation shall first be made of all useful surface improvements and of the machinery on the ground which shall be added to the upset, and paid to the former lessee, if the lease be sold.

22. But if such lot be not sold, the value of the machinery shall be abated by one-fourth every quarter; and if it remain unsold at the end of one year, the owner of it shall not be entitled to any compensation on account of it. But he may remove it, provided he do so within three months after the end of one year named, or a longer time may be given him if there be no incoming tenant.

23. If lot be relet to former lessee no payment will be allowed for machinery, or improvements, &c.

24 The value of such machinery, improvements, &c., to be fixed by two valuators, one chosen by the Commissioner of Crown Lands and the other by the outgoing lessee; and in case of dispute, the valuators may appoint an umpire; or if valuators do not appoint an umpire in three months, the Commissioner may do it. The umpire's decision to be final.

25. On termination of lease the Government may purchase useful improvements and machinery, pumps and mining materials; that is, if the latter are not removed, or if lessee does not renew the lease at valuator's prices, to be ascertained as prescribed above.

26. Mineral lots put up and passed may be put up again, on request of any one guaranteeing upset price.

27. Lots to be surveyed in rectangular figures where practicable; length not to exceed depth in greater proportion than 2 to 1.

28. Leases to be forfeited if rent be not regularly paid, or if mine be improperly worked, or if £2 an acre be not expended yearly thereon in working the same, or if three men have not been regularly employed at

least nine months in each year in *bona fide* mining work, or if evidence be refused to the Inspector of Mines or authorised substitute working the same.

29. Lessee, after three years' occupation of any lot, may buy it outright at a valuation to be determined in the manner prescribed in Regulation 24.

30. Sales of any Leases that are to be disposed of by auction to be made at any ordinary land sale, or at a special one.

Unsettled Lands.

31. *Clause* 65.—Applicant for gratuitous leases shall make a money deposit at the Survey Office of £1 for every thousand acres leased to him, as a guarantee of good faith, to be returned to him after the first year of occupation, but to be forfeited in case of non-occupation

32. *Clause* 67.—£1 shall be paid for every transfer.

NOTE.—It is high water new and full moon at Launceston, at 1h. 30m. p.m., and at George Town, at 11h. 45m, a.m. The tide in the Tamar flows five hours and ebbs seven hours, and rises from twelve to fourteen feet in settled weather.

IMMIGRATION DEPARTMENT.

Commissioners—The Colonial Secretary (President), the Colonial Treasurer, Henry Butler, Askin Morrison, James Milne Wilson ; Secretary, F. C. Tribe. Immigration Agent, Hobart Town, George Smith ; Immigration Agent, Launceston, William G. Sams.

Offices.—Public Buildings. Hobart Town and Launceston.

The Commissioners of Immigration have issued the following Regulations for persons desirous of introducing servants or relatives from the United Kingdom, under the Bounty System adopted on the 21st December, 1858 :—

An Immigrant resident in Tasmania who may wish to bring to the colony any relative from the United Kingdom, being a British subject, and being either a mechanic, domestic servant, or laborer, should apply to the Immigration Agent at Hobart Town or Launceston, in writing; and Bounty Tickets will be issued (subject to the approval of the Commissioners) on the following rates of payment by the applicant :—

Family Ticket for man, wife, (or either of them) with the children under 12 years at time of embarkation	£15
Single Male Ticket	10
Single Female Ticket	5

The Tickets should be sent to the Agent appointed by the applicant in the United Kingdom, who will take the proper steps for procuring passages in vessels sailing direct to Hobart Town or Launceston, or to Melbourne, whence the emigrants will be forwarded to their destined port, and will in all cases be provided for at the expense of the ship owners until their friends may be enabled to receive them, provided that the period for such accommodation does not exceed fifteen working days from date of arrival.

In the event of the parties sent for declining to emigrate, the tickets should be returned to the applicant, who can have the payment refunded to him on presenting them at the Immigration Office.

Bounty Tickets shall be considered as out of date, if not presented for payment of passage monies within 18 months from the date thereof.

Half passage money will be paid in the event of a death during voyage.

Full rates payable on Bounty Tickets by the Board of Immigration.

For each adult	£16
For each child between the ages of 3 and 12 ...	8
For each child under 3 years	4

SAVINGS' BANKS.

There are two of these institutions in Tasmania,—one at Hobart Town (established 1845), and the other at Launceston (established 1835)—which are carried on under the provisions of the Act of Council, 12th Vict., No. 1, commonly known as the "Savings' Bank Act," under the direct control of Managers approved by Courts of General Quarter Sessions.

At Hobart Town, Mr. W. V. Morriss is Actuary; Mr. F. B. Campbell, Cashier; Mr. J. B. Walker, Accountant. At Launceston, Mr. H. Dowling is Actuary; Mr. G. Pullen, Cashier; Mr. Ambrose Dowling, Clerk.

The deposits at Hobart Town at the last half-yearly meeting in September, 1864, amounted to £138,941 14s., the number of accounts open being 4,136, and the Bank has a reserve fund of £12,660 9s. 7d.

The deposits at Launceston at the same date amounted to £68,458 4s. 1d., the number of accounts open being 2,730, the reserve fund being £5,731 15s. 11d.

Since the commencement of the Bank at Hobart Town 22,240 accounts have been opened, and £1,221,698 10s. 10d. have been received. At Launceston 16,148 accounts have been opened, and £877,840 9s. 3d. deposited.

On the 1st November, 1862, an Act came into operation (26th Vict. No. 15) which enables any person to remit through the post any sum as a deposit to any Savings' Bank at the postage of *one penny* for every four ounces, for which small charge the packet is to be *registered* by the Post-master; thus securing to the depositor an official receipt for the safe delivery of the packet to the Savings' Bank.

Formation.—This Society was founded at a meeting held at Government House on the 14th October, 1843; the then Governor, Sir J. E. Eardley-Wilmot, Bart., being in the Chair. The meeting consisted of Members of the Tasmanian and Horticultural Societies, and of other Gentlemen interested in the advancement of Science, and the progress of the Colony. Sir Eardley-Wilmot subsequently assigned to the Society a large portion of the Government Garden, with an allowance of £400 per annum from the Public Treasury to pay the officers of the Society, and generally to promote its objects. On the 12th September, 1844, the Governor announced that Her Majesty the Queen had signified her consent to become the Patron of

the Society—that the constitution of the Society had been approved, that the grant of £400 per annum had been confirmed—and that its designation should thenceforward be, "The Royal Society of Van Diemen's Land, for Horticulture, Botany, and the advancement of Science."

Principles and Constitution.—1. The leading objects of the Society are to develop the physical character of the island, and to illustrate its natural history and productions. 2. The Society consists of a President, twelve Members of Council, a Treasurer, a Secretary, and an indefinite number of Fellows. 3. The Lieut.-Governor of the colony for the time being is President. 4. The President is annually to nominate and appoint from the list of persons elected Members of the Council, *four* to act as Vice-Presidents in his absence. 5. The President and Council have the ordering and management of the property, officers, servants, and affairs of the Society. 6. The elections of all persons into the Society is to be by ballot, according to the rules now or hereafter to be established.

VAN DIEMEN'S LAND AGRICULTURAL COMPANY.

Established 1825 by Act of Parliament, 6 Gec. IV., Cap. 39, and incorporated by Royal Charter. Capital, £300,000, in shares of £30 each. Court of Directorts in London. Office, 6, Great Winchester-street. Governor, Brice Pearce; Deputy-Governor, ————. Directors—T. Alexander, Major Clifford, John Du Croz, V. Knight, L. Nathan, C. J. Pearse, J. Richardson, G. Rooper, J. S. Stanhope. Auditors—C. H. Moore, S. Hickson, J. Trenow. Secretary—H. Cattley. Chief Agent in Tasmania—C. Nichols. Head Office in Launceston on the premises of Messrs. Du Croz & Co.

The territories of the company are situated at the following places in the north-west quarter of Tasmania:—100,000 acres at Woolnorth, 20,000 acres at Circular Head and the coast adjoining, 60,000 acres at Emu Bay and the Hampshire Hills, 10,000 acres at Middlesex Plains, 150,000 acres at the Surrey Hills, and 10,000 acres estimated good land in Trefoil, Walker's, and Robbin's Islands, containing about 26,970 acres, but which were estimated at 10,000 acres in the grants to the Company, that being the supposed quantity of available land therein. The sub-port of Stanley, at Circular Head, is within the limits of the port of Launceston. Vessels can enter and clear there from and to foreign places with great facility, as it is easy of access, and has good wharfage accommodation.

LAUNCESTON AND WESTERN RAILWAY.

Office, Brisbane-street, Launceston.

Committee of Promoters.—*Chairman:* Sir Richard Dry; *Vice-Chairman and Secretary:* H. Dowling. *Committee:* J. Aikenhead, J. K. Archer, T. K. Archer, W. Archer, sen., J. Atkinson, W. S. Button, J. Crookes, Adye Douglas, R. H. Douglas, M. Gaunt, S. Henry, J. F. Hobkirk, J. P. Jones, R. Q. Kermode, A. McNaughtan, J. Robertson, W, Ritchie, A. F. Rooke, I. Sherwin, J. H. Smith, A. Webster, C. J. Weedon, and the members of Parliament for the northern division of the island, *ex officio*.

The Committee continue to hold periodical meetings, having in view the promotion of the early construction of the railway.

During the Session of 1864, Mr. Adye Douglas proposed the following

resolutions with reference to the undertaking, but they were lost, on a division, by 16 to 12.

1. That it is desirable a railway should be constructed from Launceston to Deloraine through the districts of Evandale, Norfolk Plains, and Westbury ; and that for the purpose of constructing such railway, His Excellency the Governor be recommended to introduce a bill for the consideration of this house, authorising the raising of the sum of £400,000 by debentures.

2. That provision be made in the said Bill for the guarantee of the interest on the said sum at not more than 6 per cent. per annum ; and for a rest fund for the ultimate liquidation of the principal sum ; and that for the purpose of securing such guarantee, a railway district shall be formed, comprising the town of Launceston and the road districts of Patterson's Plains, Breadalbane, Longford, Carrick, Westbury, Exton, Deloraine, Chudleigh, Upper Meander, Midhurst, and part of Evandale ; before such railway is commenced, the railway district to declare in the manner to be provided in the said Bill, its willingness to raise such amount by assessment as will be sufficient to secure the interest on said sum of £400,000 ; and further providing that the rest fund aforesaid shall be applied to the payment of the capital debt, and that on payment of the capital debt the railway shall become the property of the said railway district.

3. That Commissioners shall be appointed by the said district and the Governor-in-Council, for the purpose of carrying out the provisions of the said bill.

And, contingent upon their being carried that an address be presented to His Excellency the Governor that he will be pleased to submit a bill to this House embodying the above resolutions.

NORTHERN RAILWAY LEAGUE.

The Committee of the League have held weekly meetings without intermission, since their appointment in September, 1863.

The officers are, *President*, Sir Richard Dry; *Vice Presidents*, W. S. Button, Adye Douglas ; *Treasurer*, A. Webster ; *Secretary*, W. A Collins. Two sub-committees have been appointed, one for printing, and the other parliamentary.

A Bazaar in aid of the funds was held in the large hall of the Mechanics' Institute, Launceston, on Thursday, Friday, and Saturday, the 11th, 12th, and 13th August, 1864 ; the net sum realized being £557 5s.

Several public meetings have been held in Launceston for the promotion of the Railway cause.

The most successful gathering was on the evening of Thursday, 1st December, 1864, at a *fête* given by the Committee in the public gardens, Launceston. Over 2,500 persons were present.

The Committee have issued "Northern Railway Papers," Nos. 1 and 2—the first being an exposition of the constitution of the League; and the second an argument in favor of the proposals of the promoters, drawn from a comparison of revenue, population, and Government expenditure, North and South.

As a test of railway principles, the election of Aldermen for Launceston has resulted in the return, at the head of the poll, of two candidates put forward in the railway interest.

The constitution of the Railway League will be found on page 99 of the Almanac for 1864, and the detailed list of officers, town and country, on page 40 of advertisements.

MAIN LINE RAILWAY ASSOCIATION, HOBART TOWN AND LAUNCESTON.

Chief Offices, Royal Exchange Buildings, Hobart Town.
Chairman, Alfred Kennerley. *Treasurer*, John Lord, M.H.A. *Hon. Secretary*, Charles B. Allison. Committee, 32 members.

THE MERSEY AND DELORAINE TRAMWAY COMPANY (LIMITED).

Office, 113, Macquarie-street, Hobart Town.
Capital £50,000 in 10,000 shares of £5 each.
Managing Director, George Whitcomb, *Bankers*, the Bank of Van Diemen's Land. *Solicitor*, Benjamin W. Campion, Launceston. *Counsel*, Hon. W. L. Dobson, M.H.A,

This Company is formed for the purpose of constructing an iron tramway or railroad, to be worked by horse or steam power, between Deloraine and the Mersey, with (if hereafter desired), branches to Cheshunt, Chudleigh, and Kentish Plains.

The fullest power to carry out their designs has been given to the Company by Act of the Colonial Legislature, who have also granted to the Company the "Crown Lands for half a mile on each side of the Deloraine and Mersey Tramway."

This land, estimated for the thirty miles of tramway at 19,200 acres, must necessarily, within a short period, be greatly enhanced in value by its proximity to the tramway.

The land also, required for the formation of the tramway, has already been obtained free of cost for two-thirds of the entire length.

A TRIP UP MOUNT WELLINGTON, HOBART TOWN.

By J. G. Horsey, Esq., of Sydney.

This mountain is situated in the county of Buckingham, and about six miles west of the city of Hobart Town, the highest point being 4166 feet above the level of the sea. Its appearance from the town in clear weather is most imposing, but the summit, at times, is enveloped in clouds of fog, and occasionally in the winter season capped with snow of no inconsiderable depth. During the summer months the residents in the neighbourhood make up parties of perhaps six or twelve, and starting with the sun just peeping over the eastern hills, ascend its summit, a distance in reality of about eight miles; but, owing to the very steep and difficult track to be traversed, is equal, in regard to labour, to double that distance. In winter very few venture up, it being, at times, impassable, from the depth of snow, or dangerous, on account of the uncertainty of fogs which, at times, come over so suddenly that a person could not, on such an occasion, without great risk of slipping between the rocks, or losing his way, descend its rugged sides in safety.

Our party, consisting of three, being on a visit to the colony, having spent two days in the quiet city of Hobart Town, admiring the delightful scenery around and the magnificent river on which it is built, resolved to spend a day on the Mountain. Making inquiries, we were rather discouraged by being informed that it was very imprudent at this time of year (the month of May) to attempt it, for the reasons just mentioned, our informants relating to our astonished ears accounts of some unfortunates having gone up and never having been seen or heard of again; or of some others who were lost for days and at last discovered in the last stage of exhaustion; then of broken limbs caused by slipping off the rocky points with which it in some parts abounds; or of illness caused by drinking the nearly freezing water on its summit. All these pleasing little anecdotes made us thoughtful; we looked at the terrible hill and woudered how anything so beautiful could be dangerous. However, discrediting two thirds of our information, and resolving to risk the other, we called our worthy host, and having made arrangements with him to prepare us a little of something eatable and a small bottle of brandy each for the following morning, we sallied forth to the adjacent livery stables and ordered a dog cart to be ready, so that we might save all the walking possible.

A tolerably clear and sunny morning followed, and each partaking of a hearty breakfast, we strapped our provisions and opera glasses at our sides, and at half-past nine o'clock drove off along Macquarie-street, the only two miles of our road along which a vehicle could pass. This was soon accomplished, and descending at Degraves' (the Cascades), which is at the base of the Mountain, we started on foot. It was now a quarter to ten. This road, of a very clayey nature, is not very steep; it sweeps gradually upwards curving to the right hand along the top of one side of Ferntree Gully, at the bottom of which, on the edge of a stream, we noticed a farm-house, from whose chimney a small streak of bluish-colored smoke mingled with the semi-leafless boughs of the tall trees with which it is surrounded. After walking about a mile, the Huon road branches off to the left; continuing onwards and entering the dense forest through which our road lay, we arrived at the first steep ascent. Our labors commenced; upwards a little to the left, then to the right, we arrived, out of breath, on what is called the First Level. Here we stopped a moment to rest. Onwards again, we saw before us another treat in store. Again we went steadily upwards, but this time found it no easy task, as the track was covered with loose stones, which threatened every moment to introduce the nose to some geological specimen. A quarter of an hour of this laborious exercise, without the slightest prospect of another "level," suggested the propriety of a halt a few moments, and upwards again, winding

right and left, and jumping over falling trees which lay across our path, until at last we found a second but very short level. Here another moment's stay, and then a fresh ascent of some difficulty, passing a curious tree, called the Hollow Tree (a huge trunk with an opening through it of about twenty feet in height, tapering to a point), till, after a great many slips and jumps, and several halts, we at last emerged from the dense mass of noble trees through which we had passed, and came upon the "Huts," at The Springs, three in number, each guarded by a small but very noisy dog, under chain, the *dumb* trio welcoming us with no small amount of barking and straining to get at us. Entering the best of the three huts, we were accommodated with seats before resuming our journey. The one we were in is built of logs, containing but one apartment, in which lives a man, his wife (who was ill in bed at this time), children and a woman acting as nurse. We were informed afterwards that this man receives a small remuneration from the Government for his services, rendered if necessary to anyone who should go past his abode, but who not returning by nightfall needs assistance to find his way back. Here, too, the late visitor in returning, may sleep, the room being divided on such an occasion by a screen. These huts are situated about half way between the Cascades and the mountain top, and from here a limited but beautiful view is obtained, the trees around having been to a great extent cut down. After stopping about a quarter of an hour, and ordering a meal to be ready on our return, and procuring the services of a man to accompany us as guide, at ten minutes to twelve we again started, turning from the hut door to the right along a narrow path with a deep thickly wooded gully on our left hand, and a clear running stream and hillock on the right, and pursuing this for about three hundred yards we turned upwards to the right, leaving the track leading to the waterfall (about six miles distant) on our left hand. Our ascent now began to assume a still more rugged appearance, it being steep, rough, and wet, and requiring a great deal of exertion to ascend it without falling. A quarter of an hour brought us to the first ice-house, a log building not now in use, built to preserve ice gathered from the mountain for use in the city. Passing this we came upon fresh difficulties; it was now climbing over dead logs, and pushing through dead brushwood, which lay thickly covering the rugged and slippery track. After passing the new icehouse, and scrambling upwards for about half-an-hour, we halted at the upper ice-house, or rather the charred and roofless remains of a rude building formerly used as such. Lighting our pipes we enjoyed a seat on the stones, our legs beginning to feel the effects of the up-hill work we had been doing. Soon beginning to get very cold, however, we made another start, leaving the ruins and the very extensive view seen from here behind us, and taking a path at right angles to the one we had just pursued, pushing our way through and amongst the weather bleached dead scrubs and logs, which here lay thick and troublesome, we at last came up to the Ploughed Field. This is the most difficult and dangerous part of the ascent, it being an extensive plain of hugh masses of rock heaped one on the other in wild confusion, between some of which there are crevices of from four to ten feet in depth, to fall down any of which, without assistance at hand, would be dangerous in the extreme, as it would be impossible to get out again even supposing you escaped with a whole skin. The greatest caution is, therefore, necessary, in crossing this "field;" from here to the summit there is no track to follow, the wind blows with great force and the temperature is extremely cold; all vegetation ceases, nothing to be seen but barren rocks. Tying our hats on we commenced like so many frogs to leap from rock to rock, now balancing on one of a very uneven and slippery surface, next leaping off again, after being nearly blown backwards by a sudden gust of chilling wind, and then a halt for breath, or to obtain something like a perpendicular before another leap, varying the performances by scrambling

over one large boulder rock, or climbing up or slipping down another. *Labor omnia vincit.* After about twenty-five minutes' severe exercise, with red noses and burning ears we reached the opposite side of this novel field, where the unpleasant-looking crevices were supplied with the more safe substitute of soil. Again climbing over a few upright and slippery rocks, where

'Twas oft so steep, the foot was fain
Assistance from the hand to gain—

little streams of water trickling down their sides and forming miniature lagoons at their base—we came upon the "Plains." This is a rugged and damp extent of masses of rock, extending a mile and a half either way; but the rocks being smaller in size, it is less difficult to cross than that just described. Pools of stagnant water are very numerous here. The wind is most trying, it being, with a strong breeze, almost impossible to get along without being capsized. We noticed heaps of small stones on the tops of the large rocks, which had evidently been placed by some previous and cautious excursionists, to mark the track across. They extended from the Ploughed Field to the Pinnacle, situated at the further side of the Plains. To a stranger these marks would be most useful, as he could reach the Pinnacle without fear of deviation, and (what is more important) find his way back to the Field. Our guide informed us that kangaroo are sometimes shot on these plains in the summer time; also, that by crossing to the right, we should arrive at the Giant's Grave—two perpendicular rocks supporting another horizontally, and near to which the Rocking Stone, a huge egg-shaped rock, so nicely-balanced that one person can rock it to and fro. But preferring to lose no time in arriving at the summit, we went across towards the Pinnacle at which after walking about a mile and a half amongst the rocks, we arrived at half-past one o'clock, having been exactly three hours and fifty minutes from where we left the dog-cart at Degraves'. The Pinnacle is a square structure built by Government on this, the highest point of the mountain, of logs of wood laid one over the other horizontally, about fourteen feet in height and seven or eight through, the centre being filled up with stones. Taking a seat to leeward of the Pinnacle, so as to escape the severity of the wind, we turned our attention to the magnificent view and vast extent of country before us. Below lay Hobart Town, more resembling in appearance a beautiful model than a real city, so small appeared the numerous buildings, streets, and wharves, and vessels in and around it; beyond, on the banks of the Derwent, the Domain, Botanical Gardens, and Government-house, and New Town; following the course of the river to the northward, the bridge crossing it at Bridgewater (the main road through to Launceston), and on the other side the Dromedary, a mount in the neighborhood of Bridgewater about 3245 feet in height—the several ranges in the counties of Monmouth, Somerset, and Glamorgan; and (we are informed), in clear weather, the Ben Lomond Ranges in the county of Cornwall are plainly visible, the highest point of which is 5019 feet, above the sea, and is distant in a straight line from Mount Wellington about ninety miles. Again, in the distance to the eastward, Pittwater, Storm Bay, Norfolk Bay, the hills on Tasman's Peninsula, and others in the county of Pembroke, and a small portion of the blue waters of the Pacific; to the southward Cape Direction, and the entrance to the Derwent; and the hills of North Bruni and South Bruni, the mouth of the Huon, River, and the high ranges in the county of Kent, the highest point of which (Mount Picton) is 4,340 feet. This prospect is grand beyond description—its magnificence must be witnessed to be thoroughly appreciated. Changing our position to the other side of the Pinnacle, and looking westward, we found the view nearly hidden by the rugged rocks on the west side of this mount, and Collins' Bonnet, an adjacent hill of considerable height, all that was visible being the blue tops of the ranges on the west

border of the county of Buckingham, the highest point of which is 4,721 feet above the sea. Again turning to the north, and peering through our glasses at the many tiny farms and homesteads scattered far and wide, with their little patches of cultivated land around them, and

> "Far to the south and east, where lay,
> Extended in succession gay,
> Deep waving fields, and pastures green,
> With gentle slopes and groves between!"

and tracing out on the natural chart before us the numerous roads and townships, we thought of retracing our steps downwards, our guide considering it prudent to get across the Ploughed Field in case a fog should overtake us before we could get on the other side—an occurrence not at all unlikely from the cloudy appearance to the northward at that time. So taking a last look around and feeling well rewarded for the exertions undertaken, we rose from our rocky seats and started at about half-past 2 o'clock across the Plains, feeling exceedingly stiff about the legs, and uncomfortably cold about the nose, ears, and finger ends. Arrived at the Ploughed Field we sat down behind the rocks out of the wind to refresh ourselves with sandwiches, brandy and water—the latter obtained from among the crags around us. Feeling warmer, we crossed the Field, with much labor and difficulty, finding it, strange to say, much more laborious than when we were going up. Passing the dilapidated ice-house, we soon began rapidly to descend, now more pleasant, having got out of the severity of the wind to which we had been exposed—down, down, every yard increasing our fatigue, passing the lower ice-house at twenty-five minutes to four; and again another tiring descent, we arrived at the huts at the Springs about four o'clock, gladly resting our weary limbs and aching legs for a while before proceeding. Our meal was ready, consisting of steaks, potatoes, bread, and tea, *minus* milk, a superfluous article on the mountain. It is needless to explain the relish with which we all three did full justice to the viands thus set before us on a rude but clean table of home manufacture. It was evident that no trouble had been spared by the host during our absence in doing all in his power to make us comfortable. At his request we wrote a short account of our trip in a book, kept by him for that purpose, stating times of starting, arriving, and returning, with our names, &c., for the information of others in future. After a stay of forty minutes, and remunerating our guide, we resumed our downward journey, entering the labyrinth of trees again, and dragging our now weary limbs down the very steep and slippery descents, occasionally varying these amusements by scrambling over a fallen tree, or having to take a circuitous way round a similar obstruction of too large dimensions to get over. Soon the sun's expiring rays between the trees disappeared, and approaching darkness began rapidly to surround us. Down, still down we went, till a quarter to six, when we passed the Huon Road, and skirting Fern Tree Gully in the darkness (which lay deep and quiet on our left hand), we came upon the lights of the city—the two straight rows along the sides of Macquarie-street, commencing at Degraves'. Passing the brewery, we arrived at the Cascade Inn, situated a little further on, finding there, much to our delight, a car about to start for town. Refreshing ourselves, we took our seats, and were soon rattling along Macquarie-street, arriving at our hotel at half-past six o'clock, having been exactly nine hours accomplishing this most gratifying excursion.

By a blazing fire, stretched out in easy chairs in the coffee room, our boots replaced by slippers, and a soothing cloud of tobacco smoke ever and anon above our heads, we all came to the conclusion that, regardless of the labor (which we then admitted to be trifling) necessary to its accomplishment, all is repaid by the magnificent view obtained on a trip up Mount Wellington.

COUNTRY DISTRICTS.

The colony of Tasmania is divided into seventeen Rural Municipalities and nine Police Districts. Six Councillors are, in the first instance, elected by the ratepayers of the respective municipalities. Two Councillors retire annually, in December, but are eligible for re-election. The Councillors elect one of their number as Warden, whose term of office extends over one year. The Governor has the power of appointing the Warden and Councillors to be Justices of the Peace within their respective municipalities during their term of office; provision is thus made for the discharge of all legal business which formerly devolved on paid officers of the central government. In most of the police districts, stipendiary magistrates are appointed to office by the Government; in a few instances there are no stipendiary magistrates, but the business of the Courts of Quarter Sessions, Courts of Requests, and Police Court is transacted by the Justices of the Peace residing in the district.

There are two flour mills near the township of Bothwell, owned respectively by Messrs. George Nicholas and T. Axford, both situated on the banks of the Clyde, and worked by means of that stream. The inhabitants are abundantly supplied with pure water from the Clyde River, running through the centre of the township, about a mile beyond which it plunges about forty feet into the basin below, forming the Falls of the Clyde, which are well worth seeing. The large rivers Shannon and Ouse also flow through this district. On the north-east boundary are situated Woods' Lake, and Lakes Sorell and Crescent, from the latter of which the Clyde takes its source. On the north-west boundary is the Great Lake, whence the Shannon derives its origin. A trip to the Lakes (the nearest being 23 miles, and the furthest 35 miles from the township), well repays a stranger's trouble, and rewards his curiosity. This district possesses as fine stone for building purposes as any part of the colony. There is an excellent quarry within one mile of the township, from which slabs of free-stone, eight feet in length, and four inches thick, have been taken. Good timber for building purposes, fencing, &c., is also plentiful, affording employment all the year round for sawyers and splitters.

This district is principally of an agricultural character. Mount Dromedary—a prominent mountain, situated between Bridgewater and Broadmarsh—supplies the district with a large quantity of sawn and split timber; all the piles used for the formation of the causeway at Bridgewater were obtained here. The River Jordan flows through the district; in the summer months it is inconsiderable in size; also Bagdad Creek and Strathalie Creek run through the Tea Tree. There are eight inns in the district; three at Pontville, two at Bridgewater, one each at Bagdad, Broadmarsh, Black Brush. Five flour mills, Mr. Gunn, Broadmarsh, (water); Mr. Holmes, Broadmarsh, (steam); Mrs. Lamprill, Brighton, (wind); Mr. Aylward, Brighton, (water); Mr. Harrison, Bagdad, (water).

The district of Clarence is noted for its fine fruit and onions; from its proximity to the Hobart Town market, these productions are being each year more extensively cultivated. The free-stone of Kangaroo Point enjoys an established reputation throughout the Australian colonies; large shipments have been made to Melbourne and several New Zealand ports, where it is used with much effect in the more prominent buildings. Stone of excellent quality and color has been found on the estate of Lindisfarne, the property of the Hon. James Whyte, Premier. A fine stone quarry has been opened on the property of G. Stokell, Esq., at the Half-way Hill, and rented by A. M. Nicol, builder of Hobart Town The new Commercial Bank is being built with stone from this quarry.

G. Webster, Old Wharf. The schooner "Twins" also trades between Swansea and Hobart Town, calling at intermediate places. A vessel is usually laid on between Swansea and Melbourne during the fruit season Two colliers constantly ply between Seymour and Hobart Town. and sailing vessels occasionally call at Bicheno.

FLOUR MILLS—Four, viz., Watermills, at Riversdale on the Wye River; Gala Mill, on Swan River; and Mayfield, on Buxton's Rivulet; Wind Mill at the Grange.

INNS.—Swansea, two, viz., Pier Hotel, by T. Stephenson; and Swan Inn, by R. Makepeace. Bicheno, Native Youth Inn, by J. Tilley.

STATISTICS.—December, 1864, population 1,200; area, 390,000 acres. Amount of valuation roll, private property £8,942, rented crown land £675, total £9,617; number of ratepayers on valuation roll, 166; 107 Municipal electors, representing 263 votes. 4,189 acres in cultivation, including 927 acres wheat. 343 hay, 334 oats, 313 mangold wurtzels, 280 barley, 266 potatoes, 1676 English grasses and orchards, and 50 carrots, onions, turnips, tobacco, &c.; 528 horses; 2,201 horned cattle; 47,120 sheep; 1,466 pigs; 28 goats; 15,440 bushels of apples were grown last year.

The boundaries of this Municipality have been altered during the year 1864, and a considerable area ceded to the Campbell Town Police district. This portion being thinly inhabited, the loss to the population has been more than compensated by the establishment of the works of the Seymour Coal Mining Company. The statistics given above of course refer to the Municipality in its present state. It will be seen that the principal products of Glamorgan consist of grain and apples, a large quantity of the latter being annually shipped direct to Melbourne. Apple orchards are rapidly increasing. An abundant supply of fine timber, affording the means of constant employment for splitters and sawyers, exists in close proximity to the sea side. The Seymour coal mines are being energetically worked, and contain an inexhaustible supply of good coal. Coal is also found in many other parts of the district. Granite rocks of immense extent exist on Freycinet's Peninsula, and in the neighborhood of Bicheno, some of which are supposed to be of much value. Every variety of salt and fresh water fish abounds in the rivers and bays; also extensive oyster-beds in the Swan and Little Swanport Rivers. Glamorgan labors under the disadvantage of being shut out to a great extent by ranges of rugged hills from the rest of the colony; the roads to Falmouth, Avoca, Campbell Town, Eastern Marshes, and Spring Bay, all being extremely rough. The Council have entered energetically upon the work of altering and improving the roads as far as the limited means at their disposal will allow, and have recently initiated in country districts the practice of setting up mile stones shewing distances on each road to the Council Chamber at

Swansea. The climate here is unsurpassed, and very little sickness is found to exist. The scenery is romantic and beautiful. On the sea side, Rocky Hills and Swansea may be particularly noticed. At the former place the road winds round the summit of a lofty hill some hundreds of feet above the sea for about a mile, affording a view which has been universally acknowledged to be one of the grandest in Tasmania. The Swansea Bay, too, is very pretty, and has been compared with the Bay of Naples, to which it is said to bear a strong resemblance. Freycinet's Peninsula and Schouten Island encircle it at a radius of about 20 miles, and almost entirely shut out the open sea from view. Nothing can exceed the picturesque beauty of their huge granite cliffs at sunset on a calm fine evening. Vessels can remain at anchor at Swansea in almost any wind, and can ensure safety in the roughest weather by running over to a bay at Freycinet's Peninsula. The principal rivers are the Swan, which flows through the centre of the district, and the Little Swanport River which divides Glamorgan from the adjoining municipality of Spring Bay. The former is a large river with numerous tributaries including the Wye, Cygnet, and Apsley, but its navigation is unfortunately prevented by a shifting sand bar and several mud flats. For many miles between the mud flats this river is of sufficient depth to float the largest vessels. It abounds with swans, pelicans, wild ducks, &c. There are many smaller streams which afford an abundant supply of fresh water all the year round, amongst which are the Douglas, Meredith, Stony, Buxton's, and Lisdillon Rivulets. Swansea is the largest township on the East Coast of Tasmania, and has doubled its population and buildings within the last few years. Among its most noteworthy buildings may be classed the Council Chamber and Police Office, the public school, Mr. Graham's stores, and the Pier Hotel. The Police Office is one of the largest in the island, and is replete with every convenience. Mr. Graham's offices and stores form an immense building, of larger dimensions than the building occupied by Mr. Huybers in Murray-street, Hobart Town, and known as "Cleburne's stores." Travelling inland, one passes through the fine estates of Cambria and Riversdale, belonging to John Meredith, Esq., also those of the Messrs. Amos (Glen Herriot, Glen Gala, Cranbrook, and Gala Mill). The latter are beautifully laid-out agricultural farms, surrounded for the most part by straight hawthorn hedges, and divided into square or rectangular paddocks, imparting to the whole a thorough English appearance.

STATISTICS.—O'Brien's Bridge, population, 400; yearly value of property assessed, £10,562; police rate, 6d. in the £.

The District of Glenorchy is principally of an agricultural and horticultural character. Much attention being paid to the farms and gardens throughout the municipality. There are two flour mills, and one bone mill in this district and an extensive manufactory of soap, candles, and vinegar, owned by Mr. William Murray, of "Murray Field" O'Brien's Bridge. There are two tanneries and fellmongery establishments.

There are several quarries of excellent freestone and unlimited beds of limestone, which have been extensively worked by Mr. Lowes and Mr. Shoobridge. Good timber for shipbuilding and other purposes abounds in the gullies of Mount Wellington. Large beds of oysters have lately been discovered in the Derwent at Glenorchy, from which the market has been extensively supplied.

CRICKET CLUBS at New Norfolk, Macquarie Plains, Fenton Forest Redlands, and Falls.

RIFLE CLUB in course of formation.

STATISTICS.—December 31, 1863 population, 2,690; 5,491 acres in cultivation: 605 horses; 1,532 horned cattle; 41,331 sheep; 82 goats; 1,527 pigs; 1 ass.

Irrigation works on a large scale have been brought to much perfection in this district. Mention may be made of the estates of Dr. Officer, also at Valley-Field, E. Shoobridge; Redlands, R. C. Read; Fenton Forest, Captain Fenton; Clarendon, J. F. Walker. Coal, limestone, and freestone in various localities. Hops are extensively cultivated round New Norfolk. Lobsters have been introduced into the Derwent. Mullet; the Derwent at the Falls is famous for this delicious fresh water fish. The salmon ponds are situate at the River Plenty, about six miles from New Norfolk, and are well suited for the purpose, with all necessary arrangements for artificial breeding and nursing young fry. A large pond (not less than one acre) is about to be constructed, into which the young salmon will be removed shortly before the arrival of the next shipment of ova expected in April next, thus leaving the present ponds and nursery beds available for its reception. Of the salmon ova which arrived in April 1864, the first hatched out on May 5th, and the process of hatching continued over the lengthened period of six weeks, when Mr. Ramsbottom estimated there were upwards of 3,000 young fry. The first trout

hatched on May 4th, and the hatching continued successfully for about fourteen days, when Mr. R. concluded there were about 350, which up to the present time have rapidly increased in size, some measuring three inches. The trout are now enjoying the advantage of a large circular pond, nine feet deep, into which water flows rapidly down a serpentine rill 220 feet in length and six feet in width.

The schooners "Robert Burns," Hall, master, "Twins," Luttrell, master, and "Kingston," Hopwood, master, trade between Hobart Town and the ports on the East Coast.

The Harbour of Spring Bay admits vessels of large tonnage, to which it affords a safe shelter in all weathers; for this purpose it is second to none in the Australian colonies—it possesses excellent oyster beds from which the Hobart Town and Melbourne markets are supplied. Fish are also abundant. Superior freestone abounds close to the shore at Spring Bay, and good limestone is found on Maria Island. The district also possesses excellent timber for building purposes. Prosser's Plains, in this municipality, is noted for the excellence of its dairy produce. An extensive freestone quarry is now being worked by Messrs. Glaister & Co., contractors for the new Post Office, Melbourne, and the stone obtained therefrom is spoken of as being of the very best quality, and the supply unlimited. A considerable portion of the stone which is being used in the construction of the new Post Office, Melbourne, has been obtained, and is still being supplied from the quarry. There is a mineral spring on the Oakhampton Estate in this municipality, the water of which has been analyzed in Hobart Town and found to possess very nearly the same properties as the waters of Cheltenham. Several persons who have taken this water state that they have derived considerable benefit therefrom.

Campbell Town is an agricultural and pastoral district, containing many magnificent estates of great wealth. The Elizabeth and Macquarie rivers flow through it, and the South Esk divides it from the municipality of Fingal. The Hospital is in a flourishing condition, and has been of great benefit to the surrounding districts, as well as to Campbell Town. Since the retirement, through abolition of office, of the Police Magistrate, Thos. Mason, Esquire, the Justices of the Peace resident in the district attend the Police Office regularly in accordance with a roster, and transact all police business. Turkish baths are now in the course of erection attached to the Hospital. There are three first-class hotels in the township, thus rendering it a most eligible summer residence for invalids affected by the heat of the neighboring colonies.

VOLUNTEER CORPS.—*Fourth*, or *Huon Rifles*; 60 rank and file. (*See page* 98.)

REGATTA.—An annual regatta held on the Huon River.

STATISTICS - 31st December, 1863. Population, 2,579; 4,278 acres in cultivation; 320 horses, 1,578 horned cattle, 1,502 sheep, 157 goats, 1,329 pigs.

PRODUCTS.—Gold and copper have been found in small quantities; iron and coal in abundance, the latter of an anthracite character. Felspar is also found, and white sandstone of a superior quality is a considerable article of export to Melbourne for building purposes. Timber, potatoes, and apples are also largely exported from Franklin. Fruit trees of all descriptions have been planted extensively in this district, and the small fruit being very abundant, two branch establishments of Hobart Town houses for the manufacture of jam, have been lately commenced, one each at Franklin and Port Cygnet. There are nine saw mills and three flour mills in this district.

The fine Huon River, which frequently passes through bold and magnificent scenery, is navigable as far as Victoria, there, in consequence of the river suddenly turning an acute angle it has a most singular appearance, looking from the Ferry Inn, as though two rivers sprang from the ground beneath. There is a fine extent of agricultural land here; above this spot navigation of the river is impeded by a series of falls, but it is admirably adapted as a home for that king of fish, the salmon. The epicurean cucumber mullet are plentiful, and at midsummer the gorgeous orange blossom of the blandfordia elegantly fringe the water line in places; the celebrated Huon pine is not to be seen without a difficult journey some miles farther. The most striking natural curiosity seen from the river is where the outlines of a distant mountainous range of hills form the sculptured bust of a sleeping beauty called the Huon Belle; the hair, forehead, eyelashes, nose, lips, chin, throat, and bust, all with remarkable fidelity.

This District has been by some considered the Cinderella of the Tasmanian family, and has been proportionately looked down upon by her more wealthy and highly-favored sisters, but a change might yet come over the spirit of the dream, the sleeping beauty awake, and assert her dignity as La Belle Huon; the slighted possessor of the glass slipper has already enriched her family by the exportation of many hundred thousand pounds worth of timber palings, shingles, potatoes, and fruit, and with her abundance of coal, iron, and wood, might yet become the richest mining district in the island; the prowess of her sons in aquatic sports needs no comment, and has frequently put the highly trained crews of the capital on their mettle. About a score of fine craft constantly trade on the river.

CLIMATE.—The climate of the whole district is most salubrious Even in winter there is a mildness throughout the atmosphere, and in summer the occurrence of a hot wind is not on record. George Town is much frequented during the summer and autumn months, by numerous visitors, not only from the interior, but also from the neighboring colony of Victoria, for sea-bathing. Flinders' Group of Islands, separated from the main land by Banks' Strait, is included in this district, and contains a population of about 150 souls, chiefly half-caste of aboriginal extraction. The staple commodity of these islands may be said to be the "Petrel," commonly known as the "Mutton Bird," which are killed and salted every year; the oil collected from the dying birds is considerable in quantity, at an average value of 4s. per gallon. Many hundreds of dozens of their eggs are also brought to Launceston, and generally find a ready sale.

STATISTICS.—31st December 1863.—Population of the electoral district, 19,449; 18,015 acres in cultivation, 1,370 horses, 2,658 horned cattle, 5,890 sheep, 635 goats, 2,980 pigs, 2 asses, 3 mules.

At Sandy Bay the beach is adapted for sea bathing, and accommodation for this purpose is afforded by subscription baths. Extensive flower, fruit, and market gardens are here cultivated. The road to Brown's River is much frequented, as a pleasure drive, by the citizens of Hobart Town; the scenery on this road is noted for its romantic beauty.

The suburban township of New Town is beautifully situated on the main road from Launceston to Hobart Town; Mount Wellington, and the range of hills adjacent, forming a noble background to the lovely scenery here displayed.

Dairy produce, potatoes, and timber are the chief products of the district; freestone is plentiful, and there is coal on the land of J. Abbott, Esq., at Gordon. Much of the land is of inferior quality, but the patches of good are very superior. The district is generally well watered by rivulets, &c.—the Brown's River, North West Bay, and Oyster Cove Rivers being the chief streams.

The township of Kingston is chiefly noted for its delightful beach; it has also attractions in the shape of rural scenery and bream fishing.

The little village of Margate, situated on North West Bay, with its salmon ponds, and fresh water mullet fishing, is also well worthy of the visitor's attention.

POLICE DISTRICT OF HORTON.

(Which includes the settlements at Woolnorth, Circular Head, Table Cape, Emu Bay, &c., in the County of Wellington.)

COUNTIES.—The boundaries enclose the counties of Wellington and Russell, and parts of Montagu, Lincoln, and Devon.

PRINCIPAL TOWN.—*Stanley*, population about 400. It is a Port of Entry and Clearance, is built under the singular Promontory of Circular Head; is provided with good hotels, churches, a well-supplied reading room; has Courts of Requests and Quarter Sessions, a masonic lodge, cricket club, schools, &c. The sea washes three sides of the town, affording very fine beaches as roads and promenades to the inhabitants. The site is

rather exposed, but the climate beautiful, and most conducive to health. The mean annual temperature here is 59·7. There are excellent chalybeate springs about 8 miles from the town.

OTHER TOWNSHIPS.—*Burnie*, at Emu Bay, at about 55 miles from Stanley; population about 80; is a Port of Clearance. The position and climate of this place are as fine as any in the island. *Wynyard*, near Table Cape, at about 43 miles from Stanley; population about 80; is a Port of Clearance. The townships of Port Maldon and Somerset on the River Cam, and Smithton on the Duck River, are places thinly inhabited, but at which considerable shipments of produce are made. There are several other town reserves where much land has been sold, but in which there are not yet any inhabitants.

MEMBERS OF PARLIAMENT.—*Legislative Council*—Hon. W. E. Nairn, elected June 29, 1859. Horton is included in the electoral district of Meander (Returning Officer, F. Belstead), the principal part of which is about Deloraine, a locality between which and Horton there is an almost impassable country, and with which it has not any other connecting link. *House of Assembly*—John Davies, elected Nov. 12, 1862. Horton is included in the electoral district of Devon. Returning Officer, Charles Friend.

POLICE.—*Resident Stipendiary Magistrate and Coroner*, H. T. A. Murray. *Police Clerk*, W. H. Walsh. *Chief District Constable*, J. K. Percy.

CORONERS.—H. T. A. Murray, and H. J. Emmett, at Stanley, George Shekleton at Table Cape.

JUSTICES OF THE PEACE FOR THE TERRITORY.—George Anderson, F. W. Ford, C. J. McKenzie, William Moore, H. T. A. Murray, George Rouse, George Shekleton.

DEPUTY REGISTRARS OF BIRTHS, &C.—At Stanley, H. J. Emmett; at Burnie, George Rouse.

COURTS OF GENERAL SESSIONS OF THE PEACE.—At *Stanley*, on 3rd Monday in January, April, July, and October. *Chairman*, H. T. A. Murray; *Clerk*, W. H. Walsh.

COURTS OF REQUESTS.—*Stanley*, on 3rd Wednesday of every month; *Burnie*, on 1st Wednesday of January, March, and every second succeeding month. Both are Courts of Maximum Jurisdiction. *Commissioner of both Courts*, H. T. A. Murray. *Registrar at Stanley*, W. H. Walsh; *Registrar at Burnie*, J. H. Munce.

PLACES OF WORSHIP AND MINISTERS OF RELIGION.—*Church of England*, St. Paul's Church, Stanley, with two country chapels, Rev. H. E. Drew; a Parochial Library is attached to St. Paul's Church; St. George's Church, Burnie, with chapels at Wynyard and Somerset; Mr. R. Smith, catechist. *Church of Rome*, St. Mary's Church, Stanley, St. Mary's Church, Burnie, and Table Cape, Rev. M. Burke. *Church of Scotland*, St. James' Church, Stanley, Mr. James Ferguson, and other lay readers; a church library is attached. Grove Chapel, near Table Cape, is a building unattached to any religious communion, erected by George Shekleton, Esq., who conducts the services.

POST OFFICES.—*Stanley*, J. Edwards; mails arrive every Saturday evening, and leave early on Monday morning. *Burnie*, J. H. Munce; mails arrive Wednesday and Friday, and leave every Tuesday and Thursday. *Wynyard*, J. A. White; mails arrive from Launceston, and the other parts of the colony, and leave in return on the same days as at Burnie.

MEDICAL PRACTITIONERS.—At Stanley—Jas. Smith and J. W. Pring. Between Table Cape and Emu Bay, Thomas Wilson.

DISTRICT SURVEYOR.—Nicholas Simmons, at Wynyard.

ROAD TRUSTS.—*Horton*, between Rivers Montague and Detention. *Chairman*, F. J. Holmes, rate, 6d. in the £. *Table Cape*, between the Rivers Detention and Cam. *Chairman*, C. J. McKenzie, rate 1s. in the £. *Emu Bay*, between the Rivers Cam and Leven. *Chairman*, James H. Munce, rate 6d. in the £.

PUBLIC SCHOOLS.—*Under the Board of Education.—Stanley*, Mr. and Mrs. Duniam. *Wynyard*, Mr. and Mrs. Hainsworth. *Burnie*, Mrs. Morris. *South Road, Circular Head*, Mr. and Mrs. Cowbro. Private School.—*Stanley*, Mrs. Berjew.

BENEVOLENT SOCIETY.—*Stanley*, President, H. T. A. Murray; Treasurer, James Ferguson. Visitors, Rev. H. E. Drew, Rev. M. Burke, and Dr. Smith.

STANLEY READING ROOM.—This institution, supported by the subscribers, is well supplied with British and Colonial papers, magazines, &c. It is under the management of the Rev. H. E. Drew, Dr. Smith, James Ferguson, and J. Edwards. The committee is elected yearly. Lectures are frequently given in the reading room.

CRICKET CLUBS.—*Stanley—Captain*, E. Stutterd; *Secretary*, J. Berjew. Cricket clubs also at Wynyard and Burnie.

MASONIC.—*Lodge of Peace, No.* 719 (*England*)—H. Duniam, W.M.; James Smith, P.M.; H. T. A. Murray, Treasurer and Record Keeper; J. G. Stutterd, S.W.; James Ferguson, J.W.; George Anderson, S.D.; J. B. Ferguson, J.D.; R. Dallas, Tyler.

STATISTICS.—Population, between 2,000 and 3,000; acres in cultivation about 8,000, including improved grass meadows, 560 horses, 4,687 horned cattle, 10,000 sheep, 100 goats, 1,133 pigs.

The exports of timber, corn, potatoes, &c., from this district to the neighboring colonies during the year ending 30th June, 1863, had a value of £35,290 12s. 10d., and were exported in vessels with a total tonnage of 8,252 tons. This may be taken as the annual average. In addition to these foreign exports, large quantities are shipped coastwise to Launceston, including nearly all the wool, which is thence transhipped to London.

The exports in the year above alluded to were produced in the three chief divisions of the district, in the proportions indicated by the value passed at each clearing port, viz. :—

From Stanley - - - -	£23.718	8	10	...	4,945 tons
„ Wynyard - - -	7,216	10	0	...	2,333 „
„ Burnie - - - -	4,355	14	0	...	974 „
	£35,290	12	10	...	8,252 tons

The exports in 1864 exceeded £42,000.

GEOGRAPHICAL FEATURES.

RIVERS.

Blythe, Emu, Cam, Inglis, Detention, Black, Duck, Montague, Harcus, Welcome, Hellyer, Arthur, M'Intosh or Pieman, with many smaller streams.

MOUNTAINS.

Eldon Range.—The original range of this name (not the same as that in Sprent's map), first visited by the late energetic explorer, Henry Hellyer, is described by him as composed of conglomerate—a formation which under-

lies a vast area in the district, and is frequently seen on the surface. This range lies on the south side of the M'Intosh River, between the tributary waters of the Brougham and Canning, and is one of the most extensive in Horton.

Blue Peak Range.—A considerable range, but little known, lying between the Rivers Hellyer and Arthur. Precipices of slate of great height are frequent therein.

Surrey and Hampshire Hills.—These form one large tract of elevated country, covered with open grassy forest and plains, producing indifferent pasture. The formation on the surface is chiefly conglomerate, basalt, and granite. The red granites at the Hampshire Hills are very beautiful. St. Valentine's Peak is one of the most beautiful mountains in the colony, and rises from the midst of these hills to a height of 3,637 feet.

Campbell Range.—A wooded basaltic and slate range of a broken character north of the River Hellyer. Mount Cleveland, Mount Block, and many others of considerable height.

HARBOURS.

The coast line extends from the River Blythe round the N.W. angle of the island nearly to Macquarie Harbour—and the mouths of the several rivers before enumerated are generally easy of access at high tide. In addition to these may be named the Woolnorth and Hunter Island anchorages, Robbins Passage, Duck Bay, Circular Head Bay, and Emu Bay.

The district of Horton is the largest police district in Tasmania, and embraces large tracts of country entirely unknown. Although it contains much of the finest agricultural land in the island, it has also immense barren wastes, where the conglomerate, schist, quartz, and metamorphic rocks prevail. The richer lands lie chiefly, if not entirely, on basalt and clay. The settled portions of the district are progressing at a rate which doubles the population in about six years, but that progress is very much retarded by the circumstances under which the settlement of its lands have to be effected. Every acre of the richest land is covered with a jungle of the densest character. Gigantic trees tower aloft to a height varying from 200 to 300 feet; these are *thickly* spread, and between them grow underwoods of various species with branches interlacing at every foot, between these grow ferns and other small plants, so that the mere aspect of the spot to be cultivated often deters the awe-struck immigrant from cutting out a home in such a formidable-looking spot. The cost of rendering such land fit for the plough may be averaged at from £15 to £20 per acre, yet so fertile is the soil that an ample remuneration awaits the enterprising man who dares to persevere in the arduous task necessary to reclaim it. Another circumstance which retards its progress is the want of roads and bridges. It is exceedingly difficult to get from one end of the settled portions to the other, and consequently the commercial communication is chiefly by water in small vessels of an inferior class. The energy of the Northern Board of Works has partly remedied this defect in the last few years, but there is still too much room for improvement. Indeed the difficulty in reaching the older and more settled districts of the island is so great, and the facilities of communication with Victoria so many, that the district is more connected with the latter colony in all commercial matters than it is with Launceston. Hopes were entertained that the visit of the Ministry to this district in February, '64, would lead to the opening of a passable road so far as Stanley, and also to the establishment of a bi-weekly mail to that town, but the settlers have still to wait the change from hope to fruition.

POLICE DISTRICT OF LAUNCESTON.

IN THE COUNTIES OF CORNWALL, DEVON, AND DORSET.

TOWNSHIPS.—LAUNCESTON, (*see page* 128.) *St. Leonards*, 5 miles from Launceston. *Hadspen*, 7 miles from Launceston, and a portion of Carrick.

ELECTORAL DISTRICTS.—For Legislative Council, *Tamar*. Returning Officer, Mayor of Launceston, For House of Assembly, *Selby*. Returning Officer, J. Whitefoord.

MEMBERS OF PARLIAMENT.—*Legislative Council*, Hon. Sir R. Dry, December 23, 1862; Hon. Thomas Corbett, June 5, 1863. *House of Assembly*, I. Sherwin, November 11, 1862.

POLICE.—*Police Magistrate*, Wm. Gunn. *Police Clerk*, C. Spotswood. *Bench Clerk*, J. Coulter. *Chief District Constable*, James Propsting. 12 constables—viz., 2 each at Carrick, St. Leonards, and Muddy Creek, (West Tamar)—1 each at Young Town, King's Meadows, Hadspen, Thorpe, (East Tamar), Invermay, and Westwood.

Corra Linn, situate a short distance from St. Leonards, is much frequented by visitors, on account of its picturesque scenery and romantic bridge. *The Devil's Punch Bowl*, on the Penquite Estate (Launceston) is

a deep and precipitous gorge, as if cut out of the solid rock. *The Cataract*, Launceston, with its basins above, is much admired, the difficulty of access perhaps adding to the zest with which tourists visit this place. In summer many pic-nic parties resort thither. A new iron single-arch bridge (span of 190 feet) has been erected over the mouth of the Cataract River, and was opened in February, 1864.

The River Mersey empties itself into Port Frederick, which is a safe and commodious port, easy of access to vessels up to 300 tons; rise and fall of tide, 12 feet; ordinary water on the bar at high water 17 feet; low water 7 feet; spring tides as much as 18 to 19 feet. The entrance is well buoyed and beaconed, and an accident of any kind very rarely occurs. There is a licensed pilot, who also acts as harbor master. An excellent jetty or wharf has been built at the township of Torquay, and is provided with a tramroad and truck for the accommodation of the shipping.

The exports consist of coal, timber, farm produce, fruit, bacon, butter, and cheese.

Messrs. Cumming & Co. are the proprietors of extensive coal mines at the Don. Copper has been found at the Penguin, as well as lead and plumbago. The timber is of the finest quality, and admirably suited for the Indian market and for ship-building. There are several vessels constantly in the trade between the Rivers Mersey and Don, and Victoria, which are owned by residents in the district.

TASMANIAN PERMANENT BUILDING AND INVESTMENT ASSOCIATION, HOBART TOWN.

(Established in accordance with the provisions of the 14th Victoria, No. 7.)

Trustees—JOHN WALKER and W. L. CROWTHER, Esqs.
Treasurer—THOMAS GIBLIN, Esq.
Solicitor—S. G. FLETCHER. *Surveyor*—HENRY HUNTER.
Auditors—Messrs. A. CAIRNDUFF and H. T. C. COX.

Entrance Fee 2s, 6d. per share, Transfer 1s. per share, Subscription 10s. a month, representing £50 shares, payable on the second Tuesday in each month, between the hours of 6 and 8 p.m.; but the amounts may be received by the Manager at any previous time from 9 to 5 daily.

Six per cent. allowed on deposits of not less than £10 for periods not less than 3 months. Discount allowed for payments in advance, &c.

Meeting of Directors second Tuesday monthly at 4 o'clock.

The Association comprises Investers and Borrowers. The payment of 10s. per month for seven years, which amounts to £42, will realise about *Fifty Five Pounds.*

LOANS ADVANCED.—For 3 years at £1 12s. 6d. per month for each £50; 5 ditto, £1 1s. ditto; 7 ditto, 16s. ditto; 10 ditto, 12s. 6d. ditto, which sums of repayment include both principal and interest.

The advantages of borrowing through the Society are but imperfectly known, and much misapprehension exists even among intelligent men. The problem is, how can both borrowers and lenders be equitably dealt with? And the experience of the Tasmanian Permanent Building and Investment Association is a practical illustration of the double advantage. Investers receive a larger profit than can be derived from any other known source of safety, and borrowers pay less in the aggregate, than by ordinary mortgages at the very lowest rate of interest.

Example.—Loan of the Society, £250 for seven years, repaid, by instalments of £4 per month, amounts in the aggregate to £336; ordinary loan of £250 for seven years, at 8 per cent. amounts in the aggregate to £390. In favor of borrowing through the Society, £54.

Many striking examples could be readily afforded from the actual operations of the Society, but it is believed that when the leading principles are understood, there will be a large increase of membership, and thus exemplify the grand characteristic of co-operation. "*The greater the number, the greater also the individual benefits.*"

ROBERT WORLEY, *Managing Director,*
Elizabeth-street, Hobart Town.

NOTE.—The Fines and Entrance Fee have been reduced one-half from January, 1863, and several other amendments are contemplated, with the view of extending the benefits of the Association, among the industrial and provident portions of the community, and minimizing the charges incident to the varied transactions of the Society.

PORTRAITS IN OIL OR WATER COLORS,

IN THE BEST STYLE.

THE following is an extract from the critical notice of A. BOCK'S Sennotype pictures in the *Omnibus*, March 22nd, 1864:—

"The resemblance is perfect—lifelike; and while the coloring has all the exquisite softness of ivory miniature painting, or of some of those masterly paintings on copper and enamel which may occasionally be met with in Italy, there is a degree of outstanding solidity which can only be obtained by the action of the sun. We confidently recommend a visit to the Studio of Mr. Bock, who has, we cannot doubt, opened up for himself a new and sure road to fame and fortune."

Sennotypes are also taken by Mr. Bock for Albums, Lockets, and Brooches, by a modification of the process invented by himself.

DENTIST,

MAY BE CONSULTED EVERY DAY AT

110, Collins-street, Hobart Town,

(*Next Degraves' Brewery.*)

MINERAL TEETH, which never decay or change color, and so resemble natural teeth as to defy detection, fitted to the mouth without extracting stumps, or causing pain; mounted on Pure Gold Plate or VULCANITE, this material ensures an accuracy of fit, hitherto unattainable, and restores the impaired functions of articulation and mastication to their natural vigor.

Mr. SHARP wishes to urge upon parents the necessity of having their children's teeth attended to, as in many cases of deformity or over-crowding, a little timely precaution frequently prevents much misery.

Teeth stopped with pure gold or white enamel cement.

Teeth extracted WITHOUT PAIN under the influence of Chloroform.

Mr. S. supplies a Tooth Powder for removing the brown discoloration of the front teeth; also SHARP'S SPECIFIC for toothache.

NORTHERN TASMANIAN PERMANENT BUILDING & INVESTMENT SOCIETY,

LAUNCESTON.

ONE HUNDRED POUND SHARES.

Trustees:

JOHN CROOKES, RICHARD GREEN, and M. GAUNT. Esqs.

Chairman—The Hon. THOS. CORBETT, Esq., M.L.C.

Deputy Chairman—GEORGE FISHER, Esq.

Secretary—MR. JAMES JOHN HUDSON.

Treasurer—BANK OF VAN DIEMEN'S LAND.

Solicitor—C. A. W. ROCHER, Esq.

Entrance Fee, 5s. per Share; Transfer Fee, 1s.

Subscription, 11s. per month per Share, payable on the first Monday in each month.

Shares - - £100
Half Shares £50
} Realised in ten years.

This Society receives deposits of sums of £5 and upwards, repayable at three months' notice; interest, 6 per cent.

Loans advanced at the following rates:—

5 years	- -	2	2	4	per month per £100
7 ,,	- -	1	13	1	,, ,,
10 ,,	- -	1	6	3	,, ,,

Which sums include principal and interest.

EXAMPLE.—For a loan of £300, for 7 years, the repayments would be £4 19s. 3d. per month, amounting in the aggregate to £416 17s. 0d.; an ordinary loan of £300, at 8 per cent., for 7 years, amounts to £468, being £51 8s. 0d. in favor of borrowing from this Society.

The advantages to the various classes are therefore as follows:—

Depositors have 6 per cent. interest with perfect security. Investers have a larger profit than can be derived from any other known source of safety.

These advantages are secured by re-investing the monthly payments, as they accrue on security of freehold property.

ROYAL INSURANCE COMPANY, FIRE AND LIFE.

Capital—Two Millions Sterling.

Annual Revenue considerably exceeds £400,000.

The estimation in which this Company is held in England, and the perfect confidence reposed by the wealthy classes in its resources, is evidenced by the fact that the Corporation of the City of London, on the occasion of the visit of H.H.R.H. the Prince and Princess of Wales to the City, effected an Insurance for £50,000 on the additions and decorations to the Guildhall, and selected this office, as can be seen in the Money Article of the *Times* of 1st June, 1863, out of fifty-one Companies for this purpose.

LIFE BONUS DECLARED 1860.

Two per cent. per annum on the Sum Insured, said to be the largest ever continuously declared by any Company.

PROFITS DIVIDED EVERY FIVE YEARS.

The enormous capital and Reserve fund of this Company is offered to Insurers in this Colony.

To Insurance of Lives, there is no question so important as that of security, and the estimate in which this Company is held in England is evidenced by the unexampled increase of its business.

TESTIMONIAL.

Hobart Town, 30th January, 1864.

"Dear Sir,—I cannot leave the Colony, without acquainting you that I have for many years derived great benefit from your Antibilious Pills, insomuch that, under Providence, I ascribe the vigorous health and green old age enjoyed by me, at over eighty years of age, to a free use of that invaluable Medicine. Indeed, the best proof of the estimation in which your Antibilious Pills are held by me, is that I have taken forty dozen of them to England; and I have no hesitation in pronouncing them one of the *best and safest medicines in the world.*"

IMPORTANT CAUTION!

GROSS FRAUDS are now being practised by obscure manufacturers, more particularly in France and Germany — who imitate the labels of A. ROWLAND & SONS' Perfumery. To prevent the substitution of counterfeits for the *genuine* articles, it is requested to purchase only of respectable dealers, and to observe the annexed small copies of A. R. & S.'s labels as they appear round the articles.

ROWLANDS' MACASSAR OIL, for promoting the growth, restoring, improving, and beautifying the human hair. Each bottle has a *Glass Stopper*, instead of the cork, as formerly—all with the *cork* are counterfeits.

ROWLANDS' KALYDOR realises a healthy purity of complexion, and a softness and delicacy of skin, eradicates freckles, tan, pimples pots, and discolourations. Each bottle has a *glass stopper*.

ROWLANDS' ODONTO, or Pearl Dentrifrice, imparts a pearl-like whiteness to the teeth, eradicates tartar, strengthens the gums, and renders the breath pure and fragrant.

CAUTION.

CHLORODYNE.

IN CHANCERY.

Vice-Chancellor Sir W. P. Wood stated that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne—That the statements of the Defendant Freeman were deliberately untrue, and he regretted to say that they had been sworn to. Eminent hospital Physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's.—See *Times*, July 13th, 1864. The public, therefore, are cautioned against using any other than Dr. J. COLLIS BROWNE'S CHLORODYNE.

This INVALUABLE REMEDY produces quiet refreshing sleep,—relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body—without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively, using it in great quantities in the following diseases:—

Consumption, Asthma, Bronchitis. Whooping Cough, Neuralgia, Diarrhœa, Rheumatism, Spasms, &c.

EXTRACTS FROM MEDICAL OPINIONS.

From Dr. Montgomery, late Inspector of Hospitals, Bombay.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery; to it I fairly owe my restoration to health, after eighteen months' severe suffering and when all other medicines had failed."

From W. Vessalius Pettigrew, M.D.—"I have no hestitation in stating that I have never met with any medicine so efficacious as an Anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

From the Rev. S. C. Aitken, Cornwall.—"Sir—I have used Chlorodyne in a great variety of cases of illness amongst my poorer neighbors, and have found it invariably more or less efficient. In diarrhœa it has never failed in one single instance to effect a cure. In cases of toothache, and even confirmed rheumatism, it has almost invariably given relief. In the almost numberless cases of consumptive cough, which abounded in the neighborhood, it afforded ease, which the sufferers could obtain from nothing else. I have also found very great benefit from its use myself, and am now able to take duty as usual, after my life was despaired of from apparently developed phthisis."

CAUTION.—To avoid spurious compounds, or imitations of "Chlorodyne," always ask for "Dr. J. Collis Browne's Chlorodyne," and see that his name is on the Government Stamp.

Sold only in bottles, at 2s. 9d. and 4s. 6d., by all Chemists.

Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury Square, London.

JOHN GOSNELL & CO'S PERFUMERY,

Patronized by Her Majesty and the Royal Family.

JOHN GOSNELL & Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, the Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon III., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL & Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL & Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL & Co.'s CHERRY TOOTH PASTE gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

JOHN GOSNELL & Co.'s INSTANTANEOUS HAIR DYE.—The only hair dye which produces a good natural color with perfect certainty, and with the least possible trouble.

JOHN GOSNELL & Co.'s PATENT TRICHOSARON is adapted for universal use, and is the most serviceable and convenient Hair Brush ever invented. Letters Patent granted November 6th, 1852.

Merchants and Shippers supplied on liberal terms.

12, Three Kings Court, Lombard-street, London.

Nothing Impossible.—The greatest and most useful Invention of the day, AGUA AMARELLA.

MESSRS. JOHN GOSNELL & CO., Three Kings Court, Lombard-street, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect color. Price, One Guinea per bottle; half bottles, 10s. 6d. Testimonials from artists of the highest order, and from individuals of undoubted respectability may be inspected.

Messrs. JOHN GOSNELL & CO. have been appointed Perfumers to H.R.H. the Princess of Wales.
